# AMONG THE AUTOMOBILISTS

## HIGH WAY BETWEEN NEW YORK AND JERSEY CITY NEEDED.

### Trustees of New Jersey Automobile and Motor Club Urge Improvement of Plank Road Connecting the Two Cities—Roads in Pennsylvania.

The urgent need of a good road between Newark and Jersey City has aroused the officers of the New Jersey Automobile and Motor Club of Newark, and an effort is to be made to have the plank road between the two cities improved. Some time ago the Advisory Board of Trade and the club, under the leadership of Joseph H. Wood, a former president, took the matter up and succeeded in having the State Legislature pass an appropriating Bill for the undertaking. The capital interests on only the outskirts of the two cities but all those who make trips in their cars between New York and Philadelphia, many of them go by way of Newark, joined as the two roads connecting Newark and Bound Brook are the plank road and the turnpike, are both in bad condition. At a recent meeting the board of trustees of the Newark club adopted the following resolution:

[illegible]

However, on April 1 it was found that upon the officials of either of said counties lacked confidence with the provisions of said act, it is

Resolved, That the club, through its trustees, communicate with the county officials charged with the making of such improvement, with a view to urging immediate action, and to take such other action as may be deemed advisable in order to secure compliance with the act as passed.

The Pennsylvania State Highway Department has issued about 10,000 automobile licenses so far this year. This is about 4,000 more than were issued last year. Joseph W. Hunter, State Highway Commissioner, has predicted that the total number of licenses issued this year will pass the 20,000 mark. The license fee is $1 annually, and a portion of the money is used to pay the expenses of the automobile division of the Highway department, the balance being used for experiments in road building.

It seems that London taxicab users are having trouble with local authorities over the amount of waste gasoline that has been running into sewers. The Motor Car Journal of London makes the following comments on the situation:

Last week we were able to indicate the care and promptitude with which the London County Council is seeking in conjunction with the borough authorities to deal with the discharge of petrol into the sewers. The danger has become a serious one and several instances of risk to life as well as actual damage to property could be given in support of the serious warning already addressed to our readers. Those responsible for control of minor bye and motor cab garages should take heed that no waste petrol is allowed to be thrown down the gullies, such a practice expensive to their companies but it is also dangerous to the public.

In order to obviate the risks run in such places, as well as trade and other garages where large quantities of petrol are about, a simple form of interceptor is being suggested in connection with the drainage system. The device, three chamber, the drainage going into the first chamber with a flush and the most noisy and vaporizing above the water. Thence the drainage flows into the second compartment, any petrol that may have escaped from the first chamber being here intercepted. Should, however, the matter not be so intercepted, the foreign element is thrown out and avoided through which it passes on entering the sewer, oils, &c., are taken to the top of the water in the process, and the periodical extraction of this interceptor will do something to secure the safety of London's drainage system. We are glad to know that the responsible authorities have taken the subject in hand, for it becomes an alarming problem. It behooves the motor industry to accord their support to such simple precautions as are now suggested.

Californians are much interested in automobiling, which sport they are able to enjoy the year around on account of the absence of snow, and during the winter months a great number of visitors take their cars with them to enjoy driving over the hilly oil sprinkled roads of that State. There is much enthusiasm there over racing, and two new tracks are being planned. L. D. Spreckels is reported to be figuring on a cement automobile track for Coronado, which is expected to be the fastest one mile track in the world. Another track is projected for Crestmore, near Riverside. It is proposed to have the surface made of crushed marble, which the promoters think will allow of very high speed.

An American automobile tourist who spent some time in France this summer thus summed up the touring question recently: "The only way to make and enjoy an automobile trip properly is to stop whenever you see something you would like to examine or study. There is no use in burning up the country at so many kilometers an hour. Observation and contemplation should enter into the trip, otherwise you find at the end of your excursion that you have done nothing but cover distance and swallow dust."

The Indianapolis city council will be asked to pass an ordinance allowing local physicians to break the automobile speed laws in answering emergency calls. Such an ordinance was suggested by a police Judge recently when he discharged a doctor, who had been arrested while making a fast run to see a patient. Several physicians have been drafting an ordinance that they believe will meet their needs. The proposed ordinance has raised a difference of opinion among physicians who have no automobiles. A majority are in favor of the measure that would assure immunity from arrest when driving fast. Dr. T. A. Wagner, one of the oldest practitioners in the city, has taken a stand against it. He declares that in the thirty years he has practised he could count all the cases on the fingers of one hand where a few minutes saved would have saved the life of a patient. Dr. Wagner uses automobiles exclusively in his practice.

# FRANKLIN

## A New Move

## Broadway, Amsterdam Ave. and 73d St.

Franklin has moved to separate headquarters—more room, better facilities, and an even higher standard of service.

Franklin service cannot be confined by walls. It grows in volume and efficiency; and reaches out to give every patron the utmost convenience and satisfaction.

This means not only larger salesrooms, and a thoroughly-equipped repair shop—and we have opened both—but it means they are conducted in the Franklin way. It means: to anticipate the motorist's every need, and supply it without delay.

The Franklin has made a good move, and Franklin service will always be "on the move" for larger, better growth.

The 1908 Franklins are here—the greatest advance in motor-cars since automobiling began. Come and see them.

**Franklin Models for 1908:**

16 H. P. Runabout, $1,750
16 H. P. Touring Car, $1,850
28 H. P. Touring Car or Runabout, $2,850
42 H. P. Touring Car or Runabout, $4,000
