FINANCIAL AND COMMERCIAL.

MONDAY, April 26.

After moving around during the greater portion of to-day in an aimless manner, during which time it maintained, however, a strong undertone and in the early part of the afternoon became exceedingly dull, the security market fell with considerable violence in the last twenty minutes of trading. The opinion was general among close observers that the final decline was due almost exclusively to a speculative attack upon values of the end of the day nature that has been not infrequently witnessed in recent weeks, and which was to-day especially stimulated by the discovery by the Stock Exchange room trading element that large financial interests were at the immediate moment not actively engaged in buying stocks. It is of course not improbable that should the decline be continued a more active support than that which was extended to the market this afternoon will be furnished. In one sense to-day's reaction was thoroughly called for by the technical conditions in which the market is now placed; and it is unquestioned that there are a large number of people who believe that the strong prospect is for a further important rise in security prices in the present year, but who have yet parted with their securities at lower prices and would welcome an opportunity to buy back their stocks. The market opened to-day slightly higher than it closed after the more or less excited outburst of buying on Saturday and fell and rose again alternately in narrow swings until it was announced shortly after midday that there would be no decision during the day in the commodities clause case at Washington. Comparative torpor was the feature of transactions after this time until the final raid. Developments during the day were not numerous. The Turkish situation cut no more figure at home or abroad as a stock market factor than it has done hitherto, and seemed, indeed, to be well nigh utterly disregarded on the stock exchanges on both sides of the Atlantic. Obviously the underlying feeling in this respect is that a fundamental change for the better is going on in the Turkish Government and social order. Discounts in London to-day fell to a new low level for the year, and the weekly quota of gold laid down in London by the South African mines was bought by Paris, where discounts were slightly higher. An Austrian demand for gold, said to be connected with payments that the Austro-Hungarian Government will soon be called upon to make in connection with the recent adjustment of affairs in the Balkans, is, it may be, responsible for the pressure for money in London from the continent of Europe at this time. Here sterling exchange continued the moderate declining tendency shown in the latter part of last week, this being due perhaps to the effect of recent foreign subscriptions to American railway bond issues.

On the other hand so far as there was any notable aspect of the local money market to-day it was the failure of the money rates to maintain that firmness which they have recently shown. No higher than 2 per cent. was paid for Stock Exchange call loans and in the last hour of business money was offered in abundance at 1½ per cent. This easier front of the money situation was doubtless due to the large remittances immediately made here by Western institutions when they learned at the end of last week that the New York money rate was approximating the 3 per cent. level. A veritable plethora of money still exists, taking the country as a whole, and this condition cannot in all probability be changed until miscellaneous business becomes far more active than it now is. Broadly speaking every general indication of the state of business and finance was to-day even more pronouncedly in favor of a higher security market than has been the case at any time in the present year. Reports became positively numerous of the resumption of work in steel mills and of a brisk quickening of the demand for pig iron, the basic commodity of the iron and steel business. The wheat market again displayed decided weakness, owing, it seemed, to crop news of a highly favorable character from the agricultural sections. Statements of current railway earnings included such splendid showings as the Atchison's exhibit for March of an increase of $871,000 in gross and in net of $508,000 and the Southern Railway's increase in the same period of $507,000 in gross and $253,000 in net. For the third week of April the Missouri Pacific reported to-day a gross increase of $150,000, and there is an understanding in well informed quarters that the Rock Island system's increase in gross in the current month is reaching phenomenal figures.

THE GRAIN MARKETS.

Wheat Higher, Then Lower—Liverpool Suspiciously Strong — Favorable Weather West—Big Break in Argentina—Corn Lower Here, but Higher in the West.

Wheat closed lower after gaining at the start. Wholly unexpected buoyancy in Liverpool was the cause of the early strength here. That market's peculiar action of late, and notably yesterday's unlooked for advance, has created the impression that vigorous manipulative tactics have been employed. Still there was some reason for their rise, spot markets, for instance, being strong, some grades (especially Manitobas) advancing 1d. to 2d. Moreover heavy rains are delaying harvest in India and causing fear of deterioration. Bearish domestic advices soon assumed control, however. Chief among these was the seasonable weather in winter wheat territory. It was also warmer in our spring wheat States, although freezing temperatures were reported in parts of Manitoba. Naturally this created uneasiness, especially as generally lower temperatures were forecasted for to-day.

Advices from the Continent were also bearish. Most markets there were lower and Germany reported an improvement in climatic conditions and in crop prospects. The world's weekly clearances were about as expected and it seemed that the big decrease in the quantity on passage had been discounted. Our primary receipts have continued about equal to home requirements, but as fair quantities have been shipped abroad stocks have been reduced, the visible supply showing a decrease of 1,488,000 bush. for the week. Winnipeg receipts were heavy—191 cars, against 85 a year ago—and that market broke sharply after a strong opening. The big bear card late in the day was the break of 4¾c. at Buenos Ayres. Duluth reported export sales of 240,000 bush. durum wheat. Liverpool was ½@1½d. higher. Paris was 5@10c. lower. Berlin declined ½@2 marks. Antwerp broke ½ francs. Budapest was 14 kroner higher than Friday. Finley Barrell & Co., Shearson, Hammill & Co. and Lamson sold. Logan & Bryan were on both sides. Harris, Winthrop & Co. and Lake bought. Bartlett, Patten & Co. bought early, then sold, and later bought again. A Chicago house wired: "Of course wheat is still selling at a good level, but there is getting to be a great deal of reckless short selling in the pit, and while the time may not be immediate that we will get a rally it is only a question of time until that class of selling will bull the market in their efforts to cover. The operations of the late leading figures in the wheat deal have been so small as to be practically unnoticeable. Crop reports generally satisfactory. We regard September and December wheat as conservative purchases at around the existing level for scalping profits."

THE CORN SITUATION.

Corn markets were rather mixed. New York closed lower and Chicago higher, and the latter was considered the truer index. The early strength in wheat helped corn at the start. Later reports of light interior receipts caused firmness. Liverpool was lower, chiefly because of liberal La Plata offerings. Wagner was a seller. Bartlett, Patten & Co. sold early and bought later. Commission houses sold July. W. G. Press was a good buyer of May. Logan & Bryan were on both sides.

THE OATS FEATURES.

Oats were carried up at the start by other grains and by commission house buying. There was also some talk of delayed seeding in some sections. Predictions of colder weather also had a steadying influence. But when wheat and corn broke later oats followed suit, helped along by reports of fine climatic conditions, permitting rapid progress with seeding. Bartlett, Patten & Co. and Updike were buyers. Peavey Grain Company, Buckley and Creighton sold.

THE SPOT MARKETS.

Wheat was lower in sympathy with futures, but $1.40 is still asked for No. 2 red f. o. b. Manitobas, too, were comparatively firm as offerings are decreasing. Exporters show little interest. Sales were 240,000 bushels durum at Duluth. Futures closed ½@1¼c. lower.

Corn was about half a cent off, but was not pressed for sale and trade was light. No. 2 mixed, 79c. in elevator spot domestic; no grade, 74½@75½c.; No. 3, 78c.; No. 4, 74c.; steamer, 78½c. all in elevator for export.

Oats were outwardly unchanged but the undertone was weak. Old prices were asked but there was no demand. Official Closing prices on track: Natural white, 28 to 28 lbs., 58½@60½c.; 28 to 30 lbs., 59½@60½c.; 30 to 32 lbs., 59½@61c.; white clipped, 34 to 36 lbs., 58½@60½c.; 36 to 38 lbs., 59@61½c.; 40 lbs., 61@62½c.; 40 to 42 lbs., fancy, 61½@63½c.; mixed, 26 to 32 lbs., 58@58½c.

Rye—No. 2 western, 90c. c. i. f. Buffalo, 95¼c. nominal c. i. f. New York and 96c., f. o. b. New York, all nominal.

Barley—Malting, 75@78c. c. i. f. New York. Feeding, 74@76c. c. i. f. New York.

Futures were as follows:

Wheat:	Open-ing.	High-est.	Low-est.	Clos-ing.	Prev. Close.
May	125½-⅝	125½	124	124	124¾
July	115⅝-¾	116	113½	114	115⅛
