FINANCIAL AND COMMERCIAL.

TUESDAY, June 22.

Prices in the stock market to-day pursued the path which nearly all persons of experience in Wall Street and close students of existing conditions expected that they would following yesterday's break. There was in general throughout the day a slow buying back of stocks that had been sold speculatively for the fall accompanied by a certain amount of purchases by people who have for a long time been waiting for a fair reaction upon which to make accumulations; and the result of this was that although net changes in quotations for the day were irregular the majority of the active stocks left off at a higher level than they did yesterday and that the market as a whole evinced a harder undertone. The improved technical position of affairs was rather clearly shown in the view of many observers in the effect of what seemed to be another raid upon prices made in the last hour of the Stock Exchange session. Hasty and "at the market" selling of stocks took place at this time in all the principal issues, but a stronger resistance was presented to this attack than was exhibited at any time on Monday and the market in the last fifteen minutes of the dealings rebounded with a rather notable resiliency. In the middle of the day the market was utterly stagnant and seemed to disclose a rather even balance of speculative forces for the time being. The extremely oppressive weather of the day was undoubtedly to some extent a factor in the trading.

Every one knew before the close of business yesterday that the rumors of E. H. Harriman's death were unfounded, and it is doubtful whether any amount of stock worth mentioning was sold by persons who were really impressed by the tale. The truth is that the Harriman story yesterday was used as a pretext on the part of speculators for the decline in their endeavors to get the market down, just as it is evident on the other hand that the position of these operators has latterly had some foundation in the fact that the market had passed temporarily into a more or less topheavy condition. Just how much of a reaction in prices is necessary to correct this topheaviness must of course be a matter for individual judgment. But from certain topics to-day of Stock Exchange gossip it was obvious that yesterday's decline had served at least one useful purpose, in ridding the market of certain relatively bulky speculative accounts that have recently been carried on "shoestring" margins, and there is no doubt that to this extent the recession in prices that has occurred has been viewed with favor by the more conservative and the higher financial interests. It may very well be that some of these interests would like to see the decline continued further, but the underlying strength of certain prominent stocks was to-day much in evidence. Steady buying of the Atchison common shares continued. New York Central stock was again conspicuously strong. The various Erie issues reflected the prevailing belief that several gentlemen of the first financial prominence are about to become members of the Erie directorate. But more attention that anything else was attracted by a rise of 2½ points in Union Pacific stock to a price not far from the highest quotation ever recorded for the security. A strong argument can admittedly be made for Union Pacific preferred stock from an investment point of view alone at its present price, inasmuch as the 4 per cent. dividend distribution on the stock seems as soundly assured as that of any other similar railroad stock in the country, but naturally, the rise in the stock to-day provoked rumors that the movement was due to other causes. Sterling exchange once more advanced, owing to the pressure to make remittances to England and Germany in time for the forthcoming semi-annual financial settlements, but at the same time there seems to be no expectation in banking circles that exports of gold from the country in any considerable amount are likely in the near future. The grain markets were all heavy because of favorable crop news. A report published by the Kansas State Bureau of Agriculture, well recognized as one of the most conservative and best managed institutions of the kind in the country, made out the statistical condition of wheat in the State as practically the same as last year, which indicates a crop there of about 80,000,000 bushels, or much more than the current estimates of "bulls" on the produce exchanges. Of even more interesting character were the figures of the report giving the condition of corn at 88, the highest since 1902, and the corn acreage of the State as the largest since 1899. If these prospects are general there is at present promise of a national 3,500,000,000 bushel corn crop.
