DAILY TREASURY STATEMENT.

WASHINGTON, Aug. 6.—The statement of the receipts and expenditures of the Treasury shows:

	Yesterday.	This month.	1909.
Receipts	$2,693,752	$7,808,988	$55,535,443
Expenditures	3,569,703	7,917,731	77,960,242
Deficit	$1,075,951	$18,743	$22,424,799

The receipts from customs yesterday were $1,467,107; from internal revenue, $924,936, and miscellaneous, $301,709; national bank notes received for redemption, $1,402,660.

The cash statement of the United States Treasurer for August 5 shows:

RESERVE FUND.

Gold coin and bullion	$150,000,000

TRUST FUND.

To redeem outstanding certificates	$1,341,451,869

GENERAL FUND.

Gold coin	$40,646,372
Gold certificates	48,446,650
Silver dollars	5,802,127
Silver certificates	9,085,422
United States notes	7,060,24
National bank notes	3,185,088
Total	$114,256,493
Deduct current liabilities	76,736,545
Working balance in Treasury	$37,549,940
In national banks	36,829,433
Silver bullion, subsidiary silver and minor coin	33,102,357
Awaiting reimbursement	738,024
Cash balance	$108,239,596

FINANCIAL AND COMMERCIAL.

FRIDAY, Aug. 6.

The theory that the upward movement in stocks would culminate with the enactment of the tariff bill—a theory that was countenanced by many critics after the passage of the bill by the Senate yesterday and the subsequent sharp reaction—received no support whatever from the action of the stock market at any time to-day. The market opened firm. The tendency was upward throughout the day, and in the afternoon on increasing business it acquired increased strength, with the result that at the close very substantial gains were scored in all the active stocks, and the range, which was as broad as on any other day of the movement, showed a general and substantial interest. To some extent, no doubt, the increased breadth and strength were due to the signing of the tariff bill and the adjournment of Congress, for the termination of the tariff discussion and the certainty of four months at least without Congressional interference with business brought new customers to the commission houses. But to a much greater degree, in all probability, the market derived its strength from the remarkable expansion of business which, notwithstanding the preparation of new tariff schedules, has now been in progress more than three months without the slightest indication of any decrease in the ratio of improvement. All of to-day's trade reports were to the effect that the improvement continued steadily and to a degree converting the ordinarily dull midsummer months into a period of keen activity in most branches of business. A compilation of bank clearings for July, for instance, showed a total of 21.3 per cent. in excess of those of July, 1908, 8.6 per cent. above those of July, 1907, and far in excess of those for all corresponding months in previous years. July was a month of light trading in the stock market and New York clearings for the month were below those for June, but there was an increase in the clearings outside of this city, so that it may be inferred from these ordinarily reliable data that the business of the country as a whole has been quite as active in the midsummer months as in the late spring. The conclusion is also supported by the fact that the structural steel orders of one of the leading subsidiaries of the United States Steel Corporation were 50,000 tons in July, a gain of 4,000 tons over June, and by apparently trustworthy reports that the August production of iron by the United States Steel Corporation will make another high monthly record.

In the grain markets there were no significant changes in prices, the wheat options selling off fractionally, but this evidence of improvement being neutralized by a slight gain in the corn options. The Rock Island company's crop report for the week ended July 31 showed spring wheat in fine condition, a yield of winter wheat above expectations and a prospective enormous yield of corn, with general conditions better than the average. This and other favorable crop advices were followed by heavy buying of St. Paul, Chicago and Northwestern, Great Northern, Northern Pacific, Rock Island, Atchison and others whose value is largely dependent upon abundant crops. Gains in these shares ranged from 1½ to 4¼ points, but were no more conspicuous than advances in General Electric, Westinghouse, Steel common, American Smelting and Refining and others in the industrial list. The banks, according to compilations made from the known movements of money, have lost to the Sub-Treasury $6,000,000 and have exported $1,000,000 gold. The loss has, however, been in great part compensated by a gain of $4,000,000 from the interior.
