FINANCIAL AND COMMERCIAL.

THURSDAY, August 4.

Price movements in the stock market to-day closely paralleled the course of the market yesterday with the exceptions that the market closed with more net gains to-day, that trading was even less active and that the price movements were in a narrower range. In the morning stocks were offered for sale on the theory that the victory of the insurgent Republicans in Iowa, following closely their success in Kansas, might induce further liquidation. No liquidation of any consequence developed, and in the afternoon the same traders who had sold in the morning bought the stocks back at somewhat higher prices. The trading was almost entirely in the hands of the professional element and net changes at the end of the session were as inconsequential as they were trivial. If the action of the market denoted anything at all it showed that no holder of a large block of stocks is worried over political developments to the point of parting with his holdings and that small holders are content with their position for the time being. For the first time in many days there was no particular stock in which there was no evidence of liquidation. The market seemed to be thoroughly sold out and, aggressive buying being again lacking, to have reached an almost exact equilibrium. Business in stocks was lighter than in many days, total sales being little in excess of 300,000 shares.

The Bank of England's weekly statement showed a decrease from 51.29 to 50 per cent. from last week in the ratio of reserve to liabilities. The bank lost $5,000,000 in gold coin and bullion holdings, the decrease in this item reflecting shipments of gold to this country, South America and the Continent, and though the ratio of reserve to liabilities is still higher than for any corresponding week with one exception in the last decade the change in its condition was followed by an advance in open market discount rates in London. In this city call money, principally on account of the slack demand from Stock Exchange borrowers, was a drug upon the market and time money was a shade easier. Firmer money abroad and easier money here were followed by an advance of fifteen points in sterling exchange rates, which diminished the probability of an early continuation of the gold import movement, just as money developments of late have diminished the need for more gold from abroad. Wheat and corn were somewhat firmer, though no unfavorable change in weather conditions was reported. The cotton options for the new crop months declined about as much as they gained yesterday, when extremely hot and dry weather was reported from sections of the Southwest. These sections were to-day relieved by rain, and cotton prices closed at about the same level as on the day of the recent Government crop report. The bond market on the Stock Exchange was as dull as was the stock market, but two new offerings of securities attracted considerable attention, not because of the size of the issues but because they were the first new issues to be brought out in two weeks.

THE CURB MARKET.

Yesterday's curb was exceedingly dull. Changes in prices were minute and the volume of business was light. Early in the session Girous and Goldfield Consolidated showed a mediocre activity. Both gained slightly during the day. Chino, Butte Coalition, Kerr Lake and Nipissing were stagnant but in evidence during the day's trading. Miami sold from 19⅞ up to 20⅛ and declined to 20 on sales of 1,700 shares. Thirteen shares of Standard Oil changed hands, closing at 609⅞. Intercontinental Rubber gained from 21¼ to 21⅝ on light sales. There were no sales of American Tobacco. Bonds were dull. Transactions in detail in the market yesterday were as follows:

THE BOSTON MARKET.

BOSTON, Aug. 4.—The Boston copper shares market was dull and featureless to-day, closing practically unchanged, with dealings confined to odd lot transactions as a rule. In the industrials department American Telephone and Telegraph continued active and strong in tone. Rails were dull and without feature.
