LIFE ON A MAN-O-WAR. IT IS A MONOTONOUS ROUTINE, BUT PLEASANT ENOUGH.

The Immaculate Cleanliness That Every Landsman Observes When He Boards a Government Ship—What the Sailors Eat. The Doctor's Quarters—The Marines.

[Special Correspondence.]

NEW YORK, March 28.—"Do they let people go abroad that man-of-war out there?" "Yes, between 1 and 5 most every afternoon, when there are no drills going on. Jump in if you are going off with me."

The sergeant, whom I found ready to receive any visitor who might be in the boat, told me that I had struck an off day and could look about the ship to my heart's content.

if ever a monarch burned the candle at both ends, the emperor of Germany is the man. Not content with getting up at 5 o'clock a. m., and breakfasting at 6:30 o'clock with his family, he has now had a writing table such as is used by invalids placed at the side of his bed.

from aloft. Some men were playing dominoes, others were reading books from the ship's library, and a few were stretched out with their heads on coils of rope, taking an afternoon nap.

A big gun traveling around on tracks bolted down to the deck so that it could be fired from side to side, and kept so bright that one could see to shave in its polished surface, was pointed out as the largest muzzle loading gun carried in our service—a class of artillery, however, that from what I could judge was fast giving way to new breech loading guns having very much increased range and power of penetration.

Another curious fact is that while all over the country more boys than girls are born, in cities and towns there are more girls.

Concerning Color Blindness. The following is from a paper read before the Kansas Academy of Science at Leavenworth.

Why It is Cold on the Mountains. Go into a greenhouse on a sunny day, and we find the temperature much hotter there than outside.

A Hard Working King. If ever a monarch burned the candle at both ends, the emperor of Germany is the man.

THE STRUGGLE OF THE SEXES.

How Women Outlive Men—Do Cities Produce More Girls Than Boys?

In 1880 there were fifty millions of people in this country, and about 880,000 more males than females.

The boys start out nearly a million ahead and are in the majority until the sixteenth year, when the girls are a little more numerous.

The fact that the females are in the majority in all the original thirteen states but Delaware and North Carolina, especially in Massachusetts and New England, has created the impression that there is something in the climate or in the people that produces more women than men.

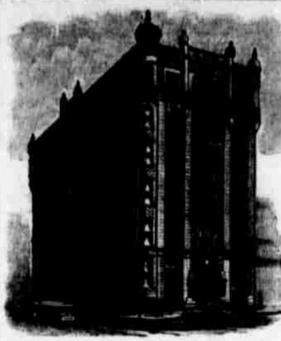

The west is drawing heavily on the manhood of the east. From this all the old states have suffered. Massachusetts seems to have lost more than any.
