FINANCIAL NEWS AND COMMENT

Heavy Rains Over the West and Northwest of Immense Benefit to the Crops.

PRICES OF STOCKS WEAK

Quotations for Warehouse Steel Rise in All the Leading Cities of the Country.

All developments yesterday were with one or two exceptions of a sort to induce financial optimism of a thoroughgoing and fundamental nature. First place among these must be accorded to the most violent decline in the wheat market that has occurred in several months owing to a downfall of rain over the Fourth of July holiday which covered almost the entire spring wheat section and which in the opinion of many people in the grain trade substantially insures the season's spring wheat harvest. The decline was, however, more violent in the corn options on the produce exchanges than it was in wheat, because the fall of moisture extended far into the corn belt and was considered to be of even greater advantage to corn than to wheat. Meantime the weather continues fine for the harvesting of winter wheat, and the general crop prospect of the moment is the brightest of the entire year.

Also there was a further rise in the quotations for many minor iron and steel products and a general considerable advance in warehouse steel in Chicago, Cleveland, Pittsburg and all the leading places of sale in the United States. This rise was, of course, corollary to, although it was by no means a necessary consequence of, the general advance in list prices at the various mills made some time ago. It is understood upon the best authority that the new orders of the Steel Corporation are running at the rate of 36,000 tons a day and that it is expected that the corporation's report of unfilled orders at the end of the month, due to be made next week, will show substantially no decrease, although deliveries were made at the maximum rate. There is also trustworthy reason to believe that the earnings of the corporation in the June quarter were in excess of $25,000,000.

In view of all this and especially of the improvement in the crops it might have been expected that the day's stock market would be an advancing one. The only offsetting consideration to the day's favorable news was a weaker tendency in the copper market, although unaccompanied as yet by a lowering of prices. Whatever softening of undertone has been noticed has been chiefly confined to the London market and to the speculative copper options there. But the price of copper metal is now so high that it can sustain a material decline without causing any trouble to copper producers, and a reaction of this sort would probably be for the best interests of everybody concerned. Copper securities, save one or two highly speculative stocks, have at no time in the present year advanced proportionately with the price of the metal. Therefore there is no particular reason why they should decline upon a moderate fall in metal quotations, and there is less reason why such an event should be held to have any general stock market significance.

The explanation of the day's price movement commonly heard in Wall Street was that as the gentleman who has been most prominently identified with whatever general advance in stocks has occurred within the last few months was to sail for Europe for a brief vacation next week a few stock market operators of lesser rank, including one living in Boston, were taking advantage of his departure to "hammer" prices. So far as any reason was assigned for their selling it was declared to be due to the "apprehension" over the nomination of Gov. Wilson for the Presidency. They were also suffering from "apprehension," so it was declared, as to the character of the report of the Stanley steel investigating committee, to be made some time during the summer. Reasons of the kind described are, of course, drivel pure and simple; and the sole cause of the market's decline was beyond any question a powerful drive directed against it which, momentarily at least, made an impression upon prices because of the current market narrowness. But an onslaught like this never can be successful if people who own stocks do not lose their heads and part with their securities. Meantime it is again to be declared in the strongest possible fashion that any such onslaught upon market values as was made yesterday was utterly unjustified by present financial or business conditions, which are such as to warrant purchases of stocks rather than sales by conservative people.
