FINANCIAL NEWS AND COMMENT

A Recovering Tendency Shown in the Financial Markets—No German Developments.

MONEY RATES KEEP FIRM

Wheat Declines on Favorable Crop Prospects—Political Affairs Unchanged.

The large and successive declines in the stock market in the last four business days which at the close of business on Monday had carried prices of the standard stocks to the lowest level of the year, and the absence of any further disquieting news from Germany or, in fact, from any other quarter, modified speculative pessimism in Wall Street in some degree yesterday and led to some "covering" of stocks sold for the decline by bear operators. Our stocks in London were higher before the opening of business here than they closed on the day before. The London market generally was improved and foreign houses here were buyers of stock in the hours of the day in which their own markets were open. There were no signs that the situation fundamentally had undergone any radical improvement; but it is obvious, of course, that the liquidation that has lately occurred in Germany and in all other places where congested financial conditions have existed has bettered the international financial status to a greater or less extent. Bankers here in touch with German matters united in declaring, as they did on Monday, that the rigor of the German financial situation was being exaggerated, probably for stock market effect, and there was small reason to doubt that the strain in Germany would pass as soon as preparations for the April 1 settlement were over, as they probably will be in ten days further time.

A not altogether favorable impression was made by the editorial statement cabled to this side from the Cologne *Gazette*, understood to be a semi-official organ, to the effect that the political relations of Germany were in a very tense state and that particular danger was threatening the country from France. But it was remembered that a beating of drums of this sort is common to German official papers when the Government has a loan which it wishes to float, and the common sense opinion prevailed that no great country in Europe either wishes war at the present time or is in a condition to begin one. Pleasing statements in the afternoon newspapers on Monday were, however, not confirmed by morning reports that the Turkish Government had assented to a programme of arbitration and mediation by the European Powers upon all matters involved in the Balkan war; although it was said that there were only one or two points upon which agreement was lacking. On the other hand, as regards home politics, although the life of our new political Administration has lasted but a short time the feeling is in Wall Street that it has shown itself animated by conservative principles and the matter is already beginning to be felt as a financial factor. The improved tendency of the stock market shown at the outset was continued until the close and the net gains recorded, although small in most instances, were yet general.

Call money was if anything a little firmer and time money was decidedly so. Very few time loans on what are known as "mixed" collateral are now obtainable at less than 5½ per cent., while 6 per cent. is the rate for loans based on "all industrial" securities. It was thought until just before business hours were over that preparations for gold exports for the day were to be limited to a small engagement of $100,000, presumably a special transaction, for shipment to Venezuela; but just before the ending of the official day $2,000,000 in gold bars were engaged at the Sub-Treasury for shipment to Paris by Thursday's steamer. Sterling exchange fluctuated but little and its general tenor was unyielding. Larger declines took place in the grain market than have been seen for some time, both because of the large estimates of farm reserves on hand on March 1, made by the Government on Monday, and because of the highly favorable crop prospect over our own winter wheat belt.

NATIONAL LEAD CO. REPORT.

Net Earnings and Net Available for Dividends Improve.

In its report for 1912 the National Lead Company shows net earnings of $2,492,233, as compared with $2,447,347 in 1911. After paying a preferred dividend of $1,705,732 the concern has left $786,501, which is equal to 3.8 per cent on the $20,655,400 common stock, as compared with 3.58 per cent. earned on the same stock in 1911.

As to a $1,450,000 increase in notes payable, President William W. Lawrence says that the maintenance of plants and business increase make additional capital necessary.
