Bonds Legal and Not Legal for N. Y. State Savings Banks and the Provisions Affecting Them

Under the title, "Savings Bank Bonds," we have published a booklet listing:

1. A careful selection of State, Municipal and Railroad bonds which comply with the provisions legalizing them for the funds of savings banks and trustees.
2. Certain State and Municipal bonds which do not comply with legal provisions for savings banks and trustees, classified under the sections of the law excluding them.

Booklet AD-14 on request.

FINANCIAL NEWS AND COMMENT

Recovery in Stocks Reaches New Levels in a Strong Movement.

LEADERSHIP SPECULATIVE

Investment Issues in Better Demand—Government Bonds Go Lower.

The advance in stocks continued yesterday with accelerated momentum in the afternoon. The close was made at the best prices of the day, with substantial gains showing among the speculative leaders of the list. That the recovery still lacks investment character is inferential from the relative inertia of a large number of dividend paying issues, but at the moment whatever investment attention there is seems to be diverted toward bonds and short term notes, for which a better demand has already been recorded.

Dealings in stocks were in fair volume, trading showing a tendency to increase as prices rose, and the aggressiveness of the upward swing in the late afternoon suggested a further retirement of short contracts. Such foreign dealings as there were seemed to be on the selling side and realizing for domestic account was obvious in the day's transactions, but the market's absorptive capacity apparently gained rather than diminished. A token of the effect which has already been wrought by the improvement of Wall Street sentiment was contained in the announcement of the sale of a Stock Exchange seat at a recovery from the recent low level.

The further upturn carried the quoted values of the share list into new ground since the termination of the decline last month and prices are now about where they were at the beginning of June. Undoubtedly operations on the buying side are still in the experimental stage, but so far the experiment has met with no check from the supply of stocks nor from the nature of marketwise news. On the contrary it has been especially assisted by the indications that financial strain is being lessened, particularly abroad.

London advices remained encouraging and the basis for a good deal of confidence would be established if it should turn out to be true that a substantial amount of gold is likely soon to be imported by London from various quarters. This could very well be the effect of the maintenance of the English bank rate at a figure almost without precedent for so long a time in the last half century. The weekly returns of the Bank of England and the Bank of France were gratifying, but the note of caution is not lacking in the admonitions of foreign bankers. The contemporary money market is not one to be tampered with and although favorable response is being accorded to new security undertakings abroad the haste with which new financing is attempted is not particularly liked at European centres.

Further softening all through the Government bond list still failed to exert any obvious influence over the stock market community. The decline in Government securities if it keeps up could be a serious matter and it is time that something more than academic interest were taken in the Congressional progress of the Administration banking bill. There is nothing very reassuring in the success which is now attending radical efforts to project extraneous features into the measure, but it is difficult at the moment to arouse Wall Street interest in the political factor. This was indicated by the indifferent notice taken of reports that a large batch of new anti-trust law proceedings was preparing by the Federal Department of Justice.

The Lake Superior copper strike facilitated a further marking up of copper metal, which in turn contributed to the ascendancy of the copper shares in the stock market. The grain markets were quiet and rather steady, although rains were reported in various sections where there had been a deficiency of moisture, but cotton was subjected to speculative pressure and broke sharply.

The money market was distinctly easier for time funds, with a noteworthy increase in the offerings for out of town account, but while rumors were circulated of fresh negotiations of European credit through the sale of finance bills the foreign exchange market was firm and did not afford corroboration.

THE STEEL MARKET.

Orders Continue Small, but Sentiment is Cheerful.

Conditions in the steel market reflect but slight change. The volume of new business remains of small dimensions, and for the current month it is expected that the figures will show a heavy shrinkage in orders. This, it is believed, will be particularly true in the case of the United States Steel Corporation.

The present strength in Steel shares is due more to the expectation of a good quarterly statement than to an improvement in business. Sentiment is cheerful in the trade.

The pig iron market in Alabama is probably firmer to-day than it has been in several months. While there is still a large accumulation of iron on the yards, say, 200,000 tons, the output has been reduced by the banking or blowing out of five furnaces, and the inroads on the accumulations will soon cause them to be considerably reduced, while the general demand is becoming much brisker and will be more so as autumn approaches and general foundry and mill operations increase. Already several new plants have entered the market for pig iron, and there will be more by October 1.

A good index of the market was the sale of 1,000 tons of No. 2 at $11.50 for prompt delivery. While this was a special iron, it was not sold on an analysis basis. Several thousand tons have been sold on the $11 basis. Indeed, of the sales actually reported more are on the $11 than on the lower level.

One furnace interest is still on the $10.50 basis for the rest of the year, but does not appear to have affected other companies, which continue to demand $11, and are selling on that basis.

Much interest has been aroused in Birmingham by the report from Baltimore to the effect that the Alabama Company (Alabama Consolidated) was preparing to dispose of one of its properties for $1,000,000. The report was denied, but it is held that if any property is to be sold it will be the furnace plant at Gadsden, and that furthermore it would be advantageous for the Standard Steel to secure this plant and add to it its blast furnace and steel mill holdings in Gadsden. The Alabama company operates furnaces at Ironton, which make the Clifton brand of iron which brings $1 a ton premium over other Alabama irons and has besides a valuable coal and coke plant at Lewisburg, near Birmingham, and a valuable coal mining property at Searles. The output of the Searles mine has been bought by the Tennessee company for the coming year.

The Gadsden Pipe Company, which has just gone into operation, is making medium size pipe for the export trade.

The plant of the Payne & Joubert & Machine Company in Birmingham will be operated to capacity by the receivers. It is believed that the New Orleans plant of the same concern will be eventually consolidated with the one at Birmingham. A large number of orders are on hand and a satisfactory outcome of the legal proceedings are expected.

Foundry operations in Alabama are fully up to those of this time a month ago and are tending to increase. The general foundry trade outlook is deemed quite good.

Coke and coal are both strong and in demand with no change in prices. The coal mines have larger contracts on hand than ever before. Foundry coke demands $3.50 to $4 a net ton at ovens.

FINANCIAL NOTES.

The $1,020,000 Republic of Cuba 5 per cent. gold bonds of 1904, drawn for redemption on September 1, 1913, will be paid at the office of Speyer & Co. on and after that date. This is the third annual drawing of bonds of this issue and makes a total of $3,060,000 called for redemption to date out of an original issue of $35,000,000.

It is reported that the negotiations of the Kansas City Railway and Light Company with the city officials for franchises have made rapid progress recently and that at present the Mayors of Kansas City, Kan., and Kansas City, Mo., are working on the concessions of the franchises.

Judges of the Federal court at St. Louis have granted the application of the receivers of the Wabash Railroad for permission to issue new receivers' certificates to take up the certificates maturing August 1.
