FINANCIAL NEWS AND COMMENT

Stocks Rebound From Early Depression—Sentiment Less Discouraged.

CURRENCY BILL A FACTOR

Wall Street Takes Note of Indications That Measure Will Be Improved.

On the whole the stock market yesterday, considered in connection with the sessions in the last half of last week, gave a rather better account of itself than for more than a month. Surface indications were that around the recent low levels a satisfactory quality of buying was finally attracted and, as it happened, evidence was furnished of a more hopeful sentiment. The chief encouragements to constructive views in the stock market community were furnished, first, by the fact that no matter what financial values had had to discount, the share list had again conducted an extensive discounting process and, second, by the tokens that reason was making some slow headway against excessive radicalism at Washington. These signs were provided by the reports showing a disposition to effect compromises in the Senate which would conduce toward improving amendment of the currency bill.

At the close irregular price changes were shown by stocks, but the tone of the market in the late dealings was rather good. It was the afternoon recovery indeed, which made observers inclined to think that temporarily anyway the selling of the list had been or could be easily overdone. There were implications after the middle of last week that the market was in the way of rallying and when it rebounded late yesterday after fresh weakness in the forenoon the circumstance was regarded as moderately suggestive of a position of technical strength, a suggestion all the more plausible because of the further contribution of news about currency legislation which Wall Street was disposed to construe as satisfactory.

For some weeks when stocks have weakened after a rally, however slight, they have failed to recover again and have only proceeded to display greater weakness. Accordingly, when the market turned up after midday yesterday the trading element was quick to infer that the status of the list had altered for the better, at last for the time being. Appearances of this sort are not particularly trustworthy, however, and there is nothing to base expansive operations upon at the moment, outside the more optimistic turn of politics in relation to currency legislation. Indeed some surprise was manifested by the stock market community in the morning, when stocks were discovered to be in free supply on the strength of the upward reaction before the week end recess.

Declines in Pennsylvania and New Haven to new low levels were unsettling, and as long as decline continued there was much talk about the Mexican situation, the various disquieting portents of politics and the sudden visitation of cold weather, which had blighted the late cotton crop prospects. The petition of the employees of the United States Steel Corporation for a discontinuance of Government litigation against the company was for the moment looked upon as evidence of apprehension, and no very pleasing deductions were drawn from the opinions ventilated by the Federal Attorney-General in the columns of THE SUN on Sunday. Naturally the suspension of a national bank in Lowell, Mass., with about $3,500,000 of total resources and liabilities, attracted attention although it did not seem to be associated with existing conditions in New England, but to be owing directly to the difficulty which caused a bank to fail last April in Providence, R. I.

Professional traders soon discovered that their selling was supplying most of the obvious pressure on stocks and their shift to the opposite side of the dealings contributed to the renewal of rallying tendencies later in the day. In this movement copper issues, notably Amalgamated Copper, were conspicuous and reports circulated to the effect that purchases of the metal had been actively resumed. The copper industry occupies to-day an apparently anomalous place in economic enterprise, for it has exhibited little or none of the symptoms of contraction seen elsewhere, although there has been no manifest suspicion of the copper position depoted by statistical figures. United States Steel shares displayed aggressive firmness. Railroad stocks were less vigorous in rallying, but sold well above their lowest.

Europe was reported a buyer, but foreign advices spoke of the security markets abroad in much the same terms of rally on profesisonal operations applicable to Wall Street. There was not in the day's foreign despatches any proof of incipient relaxation in credits or less strain on capital supplies, although there was said here to have been some London offering of loans on collateral security. Foreign exchange rose quite easily from the quotations of Saturday, which were the lowest so far for the season and if the precedent of recent weeks is followed exchange will advance until after Wednesday. No outward change appeared in the Wall Street money market.

All the agricultural commodity markets were strong, cotton making a sensational rise on reports of frosty weather. Apart from this and such other news items as have been referred to, not much engaged Wall Street notice except information relating to the currency bill. Government bonds strengthened further, the 2s being quoted in the bid price a point higher than a week ago, but it was doubtful if the latest of Mr. McAdoo's communications was in any way responsible. Hardening was under way before the Secretary of the Treasury again took up the cudgels of controversy in behalf of Government obligations.

What impressed Wall Street more than anything else in this relation was the trend of developments toward Senatorial amendment of the currency bill. When conspicuous bankers pronounce the bill already four-fifths good the natural inference is that the bill will approximate perfection if the other 20 per cent. is changed for the bettter. It is also natural to infer that not much trouble should be experienced in making this change. Much depends, however, on the relative importance of the four-fifths and the one-fifth.
