FINANCIAL NEWS AND COMMENT

Bethlehem Rises Violently Over an Extreme Range of 29 Points.

UNSETTLES THE LIST

Any stock market which after a rapid rise of considerable extent can stand such tests of heavy selling and excited bullish speculation as have been applied lately has a good deal of vitality and essential strength. The further response which the share list makes to the latest trial of its endurance—the violent ascent of Bethlehem Steel late yesterday—will accordingly be not only interesting but may be instructive.

Powerful factors have been at work to influence improvement in quoted values of corporate shares, and even though the spring rise has not lacked signs that it was making an extravagant appeal to purely gambling impulses the movement has in the main seemed to reflective observers to be justified by conditions. Nothing else could explain the way in which selling pressure has been resisted and overcome, and advance has continued against episodes in the market itself which would ordinarily tend to discourage constructive efforts. The test to which the market was subjected yesterday, principally by the course of Bethlehem Steel, seemed likely to develop its position quite adequately.

The stock started upward in the early dealings and by midsession had risen more than 14 points from the opening level. This was in addition to an advance of about 50 points since the reopening of the Stock Exchange, accomplished despite positive assurances from the management of the company that the corporation's resources would be devoted for a long time to come to the development of the property and not to dividends. Late in the afternoon the shares took another rapid flight and sold more than 14 points above the midsession figure, a total rise for the day of 29 points.

Subsequently there was a sharp break, but the close was made at a net gain of 17 points for the session. It goes without saying that the rest of the market was unsettled by the performance of Bethlehem Steel and prices sold off rather sharply all around in the late dealings, but although the tone of the market was nervous at the close, the list still displayed underlying firmness, which was more or less impressive evidence of its fundamental strength.

Various stories, none of them new, were circulated to account for the Bethlehem Steel racket. They ranged all the way from alleged efforts of some interests to acquire control for the purpose of merging the Bethlehem Steel Corporation with another concern to a plan for the declaration of a substantial stock dividend against the equities which have been accruing to shareholders from the large amount of earnings put back into the property in the last few years. The extraordinary earning power which the corporation has demonstrated has been accountable for the buying favor extended to the shares in the last few months, but the most acceptable interpretation of the movement yesterday was that the stock had cornered itself, as the saying goes. There is relatively a small stock capitalization and between an insignificant floating supply and surrender to speculative temptation to sell it short traders had presumably brought about a situation which could only be described in terms of a corner.

Whatever was the cause of the demonstration in Bethlehem Steel it is worth observing that in various Wall Street quarters last night the question was asked if self-interest as well as the public interest did not call for Stock Exchange action to assure a more orderly movement of prices when a stock, or when stocks, disclose a situation which might be getting beyond the control of the automatic processes by which the market is customarily regulated. The problem is a difficult one, but there is more than a suggestion in the financial history of the last few years that the Stock Exchange could well afford to recognize a greater responsibility for the conduct of the market which it maintains than it has assumed in the past. Nor can the problem be solved by dismissing any spectacular exploit of the market as a phenomenon of speculation with which the Stock Exchange has no concern.

Outside the features of the market itself there was very little in the news of the day which attracted attention or had any bearing on the dealings.

CONSOLIDATED EXCHANGE.

When Bethlehem Steel rushed up to 116 on the Consolidated Stock Exchange yesterday prices reacted all along the line. The high point of Bethlehem compared with an opening price of 88, which was also its lowest for the day, and a closing quotation on Wednesday of 87¼.

The stock closed on a sharp drop from its highest, the final price being 105½. Transactions in it totalled 5,480 shares. This was included in a grand total for all stocks of 40,750 shares. It was noted that while the general list reacted there was no great pressure to sell in the late afternoon. In a number of other directions special activity and strength developed, notably in the cases of American Can, Goodrich Rubber and United States Rubber. Commission houses again handled a heavy business, including a large turnover of fractional lot orders. The trading was well distributed over a broad list, transactions taking place in seventy different stocks.

MONEY AND EXCHANGE.

The New York Federal Reserve Bank rates were 4 per cent. for thirty to ninety days and 5 per cent. for longer bills.

Open market discounts, prime acceptances, maturing up to ninety days, 2⅝ @ 2¾ per cent.

Commercial paper rates were 3½ @ 4 per cent. for sixty and ninety days bills and for four to six months best names; 4¾ @ 5 per cent. for others.

Time money continued dull. Rates were 2½ @ 3 per cent. for sixty and ninety days, and 3 @ 3½ per cent. for four months; 3¼ for five months and 4 @ 4¼ per cent. for longer periods.

Call money on the floor of the Stock Exchange yesterday ruled at 2½ per cent.; high, 2½ per cent.; low, 2 per cent.

Domestic exchanges on New York: St. Louis, par; San Francisco, 60c. premium; Minneapolis, 35c. premium; Chicago, 5c. premium; Cincinnati, 5c. discount; Montreal, $6.56¼ premium.

Call money in London was 1 @ 1¼ per cent.; short bills, 2⅝ per cent.; three months bills, 2¾ per cent.

Sterling exchange held firm. Final quotations were: Demand, 4.79¾; cables, 4.80 1-16.

The weekly statement of the Bank of England shows the following changes: Total reserve increased £116,000; circulation decreased £233,000; bullion decreased £117,000; other securities decreased £1,240,000; other deposits increased £7,936,000; public deposits decreased £8,420,000; Government securities decreased £1,000.

The proportion of the bank's reserve to liabilities is now 18.40 per cent., against 18.30 per cent. last week.

Bar silver in London, 23¾d.; in New York, 50¼c.

New York Clearing House statement: Exchanges, $298,269,698; balances, $22,127,515; Sub-Treasury credit balance, $191,470.
