BUYING FEVER IN COTTON CONTINUES

Prices Advance Further to Another Set of High Levels.

WEATHER REPORT GOOD

Another advance of about 30 points carried cotton prices to new high levels yesterday. The opening reflected more or less hesitation and local selling, but it was not long before the advance gained headway and it was practically continuous throughout the session.

Crop reports are very pessimistic and even those compiled by some of the local statistical authorities are corroborative of the sensational messages received from the South. It was reported yesterday that the report of the Watkins Bureau, maintained by H. Bachman & Co., will show a decline of more than 3 points for the last two weeks.

The strength of the market was all the more remarkable in view of the fact that the weekly weather report was quite favorable in character and was by no means confirmatory of the bad crop news which is now in general circulation. The summary of the report said in part:

"The week was generally favorable for cotton. The change from the cool weather of the preceding week to the hot and dry weather of the week just ended was generally beneficial to cotton, especially in the Northern districts, where the late crop made rapid advancement, and in the eastern and central districts, where the bolls opened rapidly and plucking became general and made good progress. In Texas the crop appears not to have responded so promptly to the more favorable conditions and it is reported as in a somewhat unsatisfactory condition. Damage by boll weevil is increasing and the outlook for a fair top crop is poor."

The *Cotton and Cotton Oil News* of Dallas, Tex., does not look with favor on the advance. It says: "We cannot agree with many of our friends that Texas may not make over 3,000,000 bales. We admit, however, that the Texas crop looks like it has stopped and that there is much dead and rusty cotton and very little new fruit. We cannot see anything at this time to bull the market on except scared shorts who are covering every day and who a month ago were talking about 6 cent cotton."

The strength of the market, however, is not governed very much by conservative views. There is a rampant bull speculation under way and some of the stanchest bulls who sold out yesterday found the market closing above the level at which they unloaded their holdings.

Futures closed firm.

	Open-ing.	High-est.	Low-est.	Clos-ing.	Prev. close.
October	10.62	10.88	10.54	10.87	10.88

Exports yesterday, 15,193 bales. Total thus far this season, 251,338 bales, against 32,586 bales last year.

THE SUGAR MARKET.

Great Britain Makes Considerable Reduction in Her Bids.

The raw sugar market yesterday was dull and unchanged. Spot quotations for raws remained the same at 4.45, with rumors, however, of some sales of Cubas at 3⅝ cents. There were no price changes in refined sugar and the local demand continued fair. It was said that sugar has been freely offered since the recent sales of refined for foreign account, but that Great Britain has reduced her bids considerably. The United Kingdom is said to be fairly well supplied with sugar for the present and is getting Java and Mauritius sugars in fair volume. Sales were reported of 10,000 tons for export around 4.05 to 4.10. All refiners continued to quote granulated 5.30.

The sugar futures market on the Coffee Exchange was dull and closed a little under previous bids.

THE GRAIN MARKETS.

Wheat Prices Drop Again—Corn Resists Pressure.

The prominent cash houses placed wheat on the market yesterday. Their selling was persistent. Armour interests and following were the leaders in this respect, disposing of more than 3,000,000 bushels in the Chicago pit alone.

The supposition was that farmers had resumed their selling and that bears were more active. For a while the market resisted the big offerings, due partially to the commission house absorption at each half cent decline, but outsiders had little difficulty in accumulating their wheat contracts.

A transition to clear weather over the Northwest and incidental assurances that the recent wet spell had inflicted no serious injury on the crop were bearish news items of the day. The forecast was for fair conditions to-day. The Minneapolis list was relatively weak from the opening until the close. There was a large spring wheat movement reported, cars at Minneapolis and Duluth totalling 1,488, against 820 last week and 1,480 a year ago.

Winter wheat receipts continue rather light. The over night rains in Kansas, Missouri and Illinois will further delay the distribution. It was these rains that brought about the initial show of firmness in the Chicago market yesterday.

A marked increase in the Canadian wheat receipts is likely before long. There is an immense crop to be moved and it is intimated that Governmental authorities will not tolerate stubborn holding of wheat among the growers. The wheat production estimated for Canada was given out yesterday at 309,000,000 bushels, compared with 161,000,000 last year.

Traders sold wheat on these Canadian advices. It was figured that that country has an exportable surplus of close to 200,000,000 bushels, against 89,000,000 bushels the previous season. The official estimate may be too optimistic, just as several of the foreign documents have been, but it is conceded that Canada joins the United States in showing a record outturn this year.

Corn.—The net changes were trivial. Considering the wheat depression and the absence of frost in the corn belt the market's tone was regarded as very steady. The Government stated that the South has an excellent crop assured and that Eastern districts have had a week of ideal weather. Most complaints come from Iowa and the Northwest. It was again stated that large shorts were covering during the day, thus nullifying the effect of bearish factors. Argentine corn was offered at New York at low levels, but no business was consummated.

Oats.—The selling was against the farm movement and in sympathy with the declines in wheat. Canada has a crop of 488,000,000 bushels, against 313,000,000 last year, according to an official report. Export takings yesterday were light. Speculative sentiment keeps rather bearish.

Provisions.—Outside demand slackened and there was less speculative support. The hog market was firm.

B. R. T. INSURES 5,200 MEN.

Pays Half Premium Under Group Plan, Employees the Rest.

Of 8,000 B. R. T. employees 5,200 have applied for insurance under the group plan, according to a statement issued yesterday by the company. As a result no physical examination will be required, more than the requisite number having applied under the waiver agreement.

The plan, announced on July 30, involves a premium of nearly $60,000 a year, one-half paid by the employees and one-half by the company. Retiring employees will be continued in a $1,000 policy without cost.

2,000,000 TONS OF STEEL, ALLIES' NEED

Huge Contracts Being Closed for Delivery During Next Year.

American representatives of the allied Governments are preparing to close some huge steel contracts for shipment over the entire year of 1916. It is estimated that probably as much as 2,000,000 tons will be required for the manufacture of ordnance and projectiles in this country and in Europe. The preliminary estimates for France alone are 50,000 tons a month for the entire year. Great Britain's requirements will probably be as great as those for France and Russian requisitions are expected to be larger. Italian purchases have scarcely commenced. Great Britain is also expected to purchase additional projectiles for the Belgian army.

New York agents for Great Britain have closed a contract for about 1,000,000 6 inch shells calling for about 20,000 tons of steel blooms and billets. The steel order has been placed with an Eastern mill for shipment over the first half of next year. Another purchase of 1,000,000 3 inch shells has been made for France and the contract for the 12,000 steel bars required has been placed with an American mill for shipment in the first quarter or first half of next year.

• • •

Preparations are being made for placing heavy contracts for elevated road extensions in Philadelphia. The project includes a belt line at South Philadelphia connecting League Island and the docks along the shipping front. One contract for a highway bridge to carry Broad street over the railroad has already been placed. The plans cover a four track system, two tracks to be used by the Pennsylvania Railroad and two by the Baltimore and Ohio Railroad. New terminals for the railroads will also be provided. Coaling docks and elevators will also be constructed. That portion of the work in which the city of Philadelphia will share one-half of the expense will call for the expenditure of $10,000,000. The other portions that will be constructed by the Pennsylvania and Baltimore and Ohio railroads alone, it is estimated, will require the distribution of $20,000,000 to $25,000,000. It is understood also that the present terminals of the Pennsylvania Railroad will be required by the city of Philadelphia. Probably 200,000 to 250,0000 tons of steel will be purchased eventually.

• • •

According to reliable reports from structural interests, the Public Service Commission of New York will call for bids on various sections of additional subway work between now and Christmas calling for 100,000 tons of steel plates and riveted work. Of this total it is understood that the Interborough alone will require about 40,000 tons. The New York Municipal Railways, the construction subsidiary of the Brooklyn Rapid Transit, must construct additional subway and elevated roads in the greater city calling for 275,000 tons of steel.

• • •

Rail contracts have been closed as noted yesterday for over 44,000 tons of standard sections, including 8,000 to 10,000 tons more for the Russian Government to be rolled by the Lackawana Steel Company. The Seaboard Air Line has ordered 7,000 tons from the Tennessee Coal, Iron and Railroad Company. The Lackawanna Railroad has bought 5,000 tons from the Pennsylvania Steel Company and 5,000 tons from the Lackawanna Steel Company. Miscellaneous contracts amounting to 13,000 tons have been placed by domestic roads with the Illinois and Carnegie Steel companies. Another Eastern road has bought 4,000 tons from the Maryland Steel Company. The estimated value of these rails, f. o. b. mill, is $1,232,000.

• • •

R. W. Gillespie, district sales manager of the Pennsylvania Steel Company, has been appointed general manager of sales, with headquarters at Philadelphia, to succeed John C. Jay, Jr., who has been elected chairman of the board of the Maxwell Motors Company, as noted yesterday. Mr. Gillespie began his career for the Pennsylvania Steel Company on July 1, 1904, being employed at the Steelton plant; in 1905 he was transferred to the New York office and on May 1 the following year became assistant sales manager at New York. On August 1, 1912, he became district sales manager in the East. His present appointment becomes effective October 1 this year.

• • •

The S. K. F. Ball Bearing Company has been incorporated with a capital of $2,000,000 fully paid in under the laws of Connecticut, to manufacture and sell ball bearings. The present company succeeds the selling organization of the same name that was incorporated in 1910 with a capital of $50,000. The company has secured a site of eight acres at Hartford, Conn., upon which it will build a factory. A special grade of Swedish crucible steel known as the S. K. F. steel is used by both the American and Swedish manufacturers. This steel will continue to be imported and utilized at the Hartford factory. Special machines similar to those used in Sweden will be installed. Among the directors of the new company is B. W. Hanson of the Pratt & Whitney Company, Hartford. The European war has but slightly affected the importations of Swedish ball bearings thus far, but with an American factory consumers in this country will be protected against war contingencies.

• • •

The recent purchase of basis iron by the Lukens Iron and Steel Company included 10,000 tons at $17 delivered and 25,000 at $17.25 delivered for shipment over the first quarter of 1916. There is a heavy demand for low phosphorus pig iron for making steel for war munitions. Several inquiries are now in the market for low phosphorus metal which cannot be placed readily, consequently the Pennsylvania Steel Company is preparing to blow in another furnace on low phosphorus ores in the Lebanon Valley. The Thomas furnace at Milwaukee has also been blown in on low phosphorus ores. This stack has a capacity of 150 to 200 tons per day.

DAILY TREASURY STATEMENT.

WASHINGTON, Sept. 15.—The statement of the receipts and disbursements of the Treasury shows:

	Sept 14.	This mo.	Fiscal yr.
Receipts	$2,589,293	$22,582,674	$181,809,646
Disbursements	3,313,887	26,783,476	166,929,638
Deficit	$724,594	$4,020,802	$35,119,992
