FINANCIAL NEWS AND COMMENT

Exchange Rises With Report of Progress of Loan Negotiations.

SHARE LIST IRREGULAR

There was a sharp rise in sterling exchange yesterday afternoon which carried quotations to the maximum levels of recovery so far. As this market may reasonably be taken to reflect banking knowledge of the actual status of the important foreign loan negotiations now under way the strengthening of exchange could very well be taken as a token of the favorable progress of the deliberations designed to establish large credits for Great Britain and France, which will relieve British and French remittances from some of the excessive weight that has been bearing them down and restore them to a more stable condition.

It goes without saying that such a circumstance would be of great benefit to our export commerce, but this is only another way of stating a fact which is coming to be more widely appreciated, that the successful outcome of the loan negotiations will be very helpful to American business and American values. It happened also that the pronounced upturn in foreign exchange coincided with afternoon rumors that representatives of our banking interests were working toward a promising understanding with the visiting finance commission. Nevertheless Wall Street, which is well aware of the favorable factor that the arrangement of a large foreign credit loan is almost certain to prove, did not choose to express overoptimistic anticipations in the stock market.

The share list was more irregular and had aspects of heaviness despite the aggressive advances of a few issues in the war order group. The most conspicuous of these was Colorado Fuel and Iron, but demonstrations in this direction did not influence any extensive exhibition of vigorous strength elsewhere. The prevailing heaviness was, however, more or less superficial, for an adequate absorptive demand developed at concessions, even though pressure was somewhat effective. For the most part, offerings seemed to come from professional operators and a portion of the trading element, which has been disposed to sell the market on the argument that if any obstacles prevented the negotiations of a foreign loan the disappointment would have unsettling consequences in quoted values.

There was nothing to encourage expectations of insuperable difficulty in the way of arranging the credit operation under consideration except the antagonistic efforts of German partisans, and in substantial financial quarters there was nothing but contempt for the idea that obstructionists of the sort would accomplish anything in blocking a movement which contemplates only the maintenance of the largest possible markets abroad for our staple commodities and manufactured products. Indeed, financial circles are so confident on this score that they expect campaigners against the prosperity of the country to receive a surprise when American banking interests having German affiliations participate in the loan undertakings because they are clearly designed for no other purpose than to promote our normal commerce.

In the rally in sterling exchange, demand bills were carried up to 4.70¼ at the close. Franc checks made a corresponding recovery, selling at 5.87. There have been extensive enough fluctuations in foreign exchange lately to make hasty deductions from any rise a little unsafe, but bankers gave the impression that matters were shaping in the loan conference toward the preliminaries of agreements as to the broad lines and methods of action at least.

In the indication that the negotiators were considering a reduction of the total amount of credit to be extended at this time to nearer half of the billion dollars that has been talked of than the whole amount, there was some corroboration of the idea that the plan as finally arranged would show itself to be beyond all question a plan to facilitate ordinary commercial dealings. That part of the ultimate amount in any event would be in the form of an unsecured loan to the British and French Governments was taken for granted, but there is a good deal of opinion that much of the loan will be made directly to bankers in the borrowing countries, in which case it may take partly the form of acceptances and partly accommodation on collateral security.

DAILY TREASURY STATEMENT.

WASHINGTON, Sept. 16.—The statement of the receipts and disbursements of the Treasury shows:

	Sept. 15.	This month.	Fiscal yr.
Receipts	$1,717,703	$24,411,377	$123,622,348
