FINANCIAL NEWS AND COMMENT

Industrial Stocks Display Rising Strength—U. S. Steel a Leader.

DEALINGS PROFESSIONAL

Even though yesterday's rising demonstration in the industrial department of the Stock Exchange list was regarded as a predominantly professional speculative performance it was a rather remarkable exhibition of market strength in view of the developments over the week end in the field of foreign affairs. Uncertainties in this direction have been held more or less responsible for the failure of quoted values lately to make any response to the notable constructive financial and business factors, and it could hardly be said that uncertainties permitted themselves to be more favorably considered at the outset of the new week.

Mexican advices were admittedly less brilliant, but Wall Street has at no time looked upon the Mexican situation as furnishing as much conjectural cause for concern as the posture of the European war and the difficult issues with which it has persistently confronted our neutrality. The increasing desperation of the conflict was further attested by the incessant Zeppelin raids in England and Scotland, by the persistent pressure of the German offensive at Verdun after a month of slight gain at enormous cost and the additional exploits of submarine warfare on merchant shipping. It would be hard to tell from the Stock Exchange day what Wall Street really thought of the Sussex case. Possibly the action of the stock market was not so much an expression of opinion respecting the outcome of Washington's latest submarine crisis as a hint that the matter was something for Germany to be more anxious about than the United States.

Whatever the facts of the market's relation, if any, to the environment of international news, the course of prices was emphatically upward. Without a material increase of dealings, but with a fairly even distribution of trading from hour to hour, the industrial list rose and gathered strength with the advance. There were supplementary indications corroborative of a last week's theory that much of the selling lately had been of poor quality and that the market had been oversold. The impression conveyed by the transactions was that professional trading effort, having found that prices were sold down as far as they would go, changed to the long side and was being exerted in behalf of recovery. Advance was at first limited to comparatively few issues, but as the session progressed the movement spread through various industrial groups, although rails remained neglected. Features were not restricted to the more volatile war munitions shares, although these were prominent. The leadership of United States Steel, for example, provided a wide influence for strength.

Routine news of important market-wide bearing was scanty. The Miami Copper dividend was increased from the rate of $5 a year, paid in the last quarter, to $6 a year.

CUSTOMS DECISIONS.

RAGS—Scrap gunny bagging in small fragments, full of holes, dirty and irregular in size, imported by Felix Salomon & Co., was the subject of a customs controversy adjusted by the Board of General Appraisers yesterday in favor of the protestants. The Collector assessed duty under paragraph 48 of the tariff act of 1913, and the board finds that the entry should have been allowed under paragraph 648 as rags.

STRAW SLIPPERS—The Board of United States General Appraisers held yesterday that slippers composed of straw lined and ornamented with cotton terry cloth are properly dutiable as manufactures of straw at the rate of 20 per cent ad valorem under paragraph 365 of the tariff act of 1913. This ruling sustains a protest of J. J. Gavin & Co. against the Collector's classification of these slippers as cotton wearing apparel, with duty at the rate of 30 per cent ad valorem, under paragraph 372.

FRENCH SILKS—Judge Fischer of the Board of General Appraisers rendered yesterday the following reappraisement decision on the foreign market values of silks imported here from Albert Godin Bard & Co of Tarare, France: "Crêpe m silk muslin chiffon 2A, entered at 13 franc per meter; floc m silk muslin crepe Everlas entered at 13 franc per meter; 36in m. silk muslin lingerie 2B, entered at 12 franc per meter. All similar goods. Packing and carriage included. Reappraised at same prices, packed." These silks were exported October 26 and entered at this port on November 8, 1915.

DIAMONDS—Following several recent reappraisement decisions advancing the foreign market values of diamonds shipped here from Amsterdam, Holland, Judge Sullivan of the Board of United States General Appraisers handed down yesterday a decision raising the value of these stones imported here from H. D. Mantel of Amsterdam. When entered at this port these stones were valued at 47.50 florins per carat. There were 2,341 stones in the shipment, aggregating 270.18 carats, which made the entered value $3,134.42. The General Appraiser makes an advance to 53 florins per carat, amounting to $3,825.95 on the entire shipment. This brings the total value at which these stones should have been entered up to $4,727.31. The decision of General Appraiser Sullivan reads: "2,341 stones, 270.18 carats, entered at 47.50 guilders advanced to 53 florins per carat. Add packing." These stones were exported February 5 and entered at this port on March 7, 1916.

BOOKS PRINTED IN GERMAN—The Concordia Publishing House of St. Louis won yesterday before the Board of General Appraisers in a claim for the free entry of certain books printed exclusively in the German language. Duty was taxed thereon at the rate of 15 per cent ad valorem under paragraph 239 of the act of 1913 as books, and it was contended that they were entitled to free entry under paragraph 428, either as "books and pamphlets printed wholly or chiefly in languages other than English" or as "textbooks used in schools and other educational institutions." Judge Fischer, who renders the board's opinion in this case, writes: "Irrespective of the question whether these books are textbooks and as such used in schools and other educational institutions the proof, which is uncontradicted, shows beyond question that they are printed exclusively in the German language, and for that reason they are clearly entitled to free entry under paragraph 428."

DRUMS—An interesting reappraisement decision involving the foreign market value of drums shipped from Hamburg, Germany, and which were seized by a British war vessel and taken into a British harbor and held for prize court proceedings was handed down yesterday by Judge Fischer of the Board of United States General Appraisers. These drums were shipped by Philip Baier & Co. of Hamburg, exported from London on November 4, 1915, and entered here November 29, 1915. The issue involved is explained by the General Appraiser as follows: "While the invoice would indicate that these drums were exported from London and therefore might be deemed to be British merchandise, the facts disclosed show that the drums were German merchandise shipped from that country nearly eight months before the date of the invoice and that the reason for the shipment from London on the later date was due to the fact that the vessel containing the articles was seized by a British war vessel, which took it into a British harbor, where it was held for prize court proceedings, and that it was subsequently released and permitted to be shipped to the United States. I find that it is German merchandise shipped from that country on March 31, 1915, and that the prices prevailing in the markets of that country on that date must prevail here." The price as fixed reads: "Drums, entered at 6 United States dollars each. No advance."
