FINANCIAL NEWS AND COMMENT

War Stocks Are Conspicuous Features of Weakness in a Heavy Market.

AN IRREGULAR RALLY

There were peculiar features in yesterday's stock market which prevented the weakness displayed during the greater part of the day from being wholly attributable to the particular factors of uncertainty in our international relations which have undoubtedly exercised a good deal of depressing influence on the general share list. Weakness was most pronounced in several of the more conspicuous representatives of the so-called war stocks, while the rails and most of the standard industrial descriptions displayed a fair degree of underlying firmness. At the same time the action of the market as a whole was such, despite rallying manifestations in the afternoon, as to suggest that quoted values were remaining more or less subject and sensitive to developments in the immediate diplomatic crises represented by the Mexican and German questions.

That the moderate recovery toward the end of last week had not been especially significant was indicated in the early dealings. Under the leadership of some of the stocks chiefly affected by a Mexican interest the list made a display of rising strength at the opening, but advances did not last long. Active selling pressure was applied and continued persistently throughout the forenoon, and under the weight of sales substantial declines were forced in many directions. There was a cessation of active liquidation and speculation for the decline in the afternoon, but the recoveries which took place before the close were not altogether convincing, because they seemed to be owing in the main to a suspension of sales.

Total transactions marked a decrease from the maximum volumes attained last week, when the new downward movement of the market was started, and this was a favorable circumstance. Incidentally the market was brought into an interesting position by the course of prices, for the average of representative shares was carried down to the previous low levels of the year reached at the end of January and again at the beginning of March. In both cases the decline was arrested at this level and was succeeded by a more or less extensive upturn.

The net result of the trading was an irregular array of price changes. Various industrial specialties, some of them in the war stock group or related to it, ended with material gains. The war order list was, however, the weak feature of the market, presumably because technically this has been the weakest quarter. Liquidation of these volatile specialties was obvious, but it seemed to be induced by speculative operations stimulated by recent statements implying a prospect of diminishing contracts for military supplies. Generally speaking the action of the war stocks could be explained as the market's response in its most vulnerable directions to the dubious aspects of the foreign affairs which have been giving Washington so much concern.

The Mexican muddle was not looked upon as quite so disturbing. Although the financial community was rather incredulous of the reports of Villa's death, it was taken for granted that Washington would be disposed to seize any opportunity which offered to withdraw from the embarrassments of the Mexican venture. It was the nature of the advices from Washington about the new note which the Administration has been preparing for German consideration which held the stock market in a depressed state of check. Wall Street was sceptical about the reports that the note would be something in the nature of an ultimatum, but it was not inclined to do any discounting along the line of scepticism.

French exchange exhibited increased strength in reflection of the assurances that arrangements for the establishment of additional credits here were making progress. The disclosures made at the annual meeting of the United States Steel Corporation furnished some concrete evidence of the processes which have affected the foreign exchanges and contributed to our enormous export trade. It was revealed that in the absorption by our markets of American securities returned from abroad there was included in the past year more than half of the United States Steel common shares, which Europe had owned, the total foreign holdings a year ago being more than 25 per cent. of the common stock capitalization.

CUSTOMS NOTES.

NEW CUSTOMS ISSUES—The protest bureau at the local Custom House issued yesterday a list of the protests forwarded by the collector to the Board of United States General Appraisers during the week ended April 15. According to this schedule importers are preparing test cases covering the correct classification under the tariff act of 1913 of the following classes of merchandise: Thermometers of wood, glass and metal, metal chief value; baskets of wood, colored, fitted with sewing articles wearing apparel, composed of artificial silk; artificial flowers in chief value of gelatin spangles; imitation pearl beads, graduated on strings; rosaries of cocoa beads and metal, silver plated; crepe bands, consisting of strips of mourning crepe, and violin and cello strings of catgut.

COMMISSIONER SPACH RESIGNS—Importers of embroideries will be interested to learn that Charles Spach, special United States Commissioner, stationed at St. Gall, Switzerland, to supervise the shipment of embroideries to this country has forwarded his resignation, effective July 1, to the Treasury Department at Washington. Mr. Spach, who is in this country on a leave of absence to report to the customs officials on conditions in St. Gall, will affiliate himself after July 1 with the embroidery importing firm of Reichenbach & Co., this city. The special commissioner will return to the Swiss embroidery centre in the meantime for the purpose of putting into effect certain changes in the method of assessing duty on this class of goods shipped to the United States.

DRAWBACK ALLOWANCES—The Treasury Department has just granted drawback allowances on the exportation of gas mantles, manufactured by the General Gas Mantle Company of this city and Philadelphia, with the use of imported Chilian nitrate or thorium nitrate produced from imported monazite sand, on the exportation of medicinal preparations manufactured by the Lydia E. Pinkham Medicine Company of Lynn, Mass., with the use of domestic tax paid alcohol, on condensed milk manufactured by M. Darlington's Sons of Doe Run, Pa., with the use of refined sugar produced in whole or in part from imported raw sugar, on paint oil manufactured by the Petroleum Products Company with the use of linseed oil produced from imported seed, on Sozodont manufactured by Hall & Ruckel of this city, with the use of domestic tax paid alcohol, and on containers of Sozodont manufactured by the said company with the use of imported sprinkler tops and corks, dyes and other coal tar preparations manufactured by the Geigy Mer Company of this city, with the use of imported coal tar products, and on the exportation of celluloid and metal mounted signs manufactured by the General Advertising Company of Reading, Pa., with the use of imported printed display signs.

DUTY ON SHEEP SHEARS—Assistant Attorney General Hanson, in charge of customs litigation, has been requested by the Treasury Department to file an application with the United States Court of Customs Appeals for a review of the recent decision by the Board of United States General Appraisers, fixing the duty on sheepshears. These shears, used in removing the wool from sheep, were held by the General Appraisers to be free of duty as agricultural implements under paragraph 391 of the tariff act of 1913. The Government will argue in support of the Collector's assessment of duty at the rate of 30 per cent. ad valorem under the provision of paragraph 128 of the tariff act for "scissors and shears and blades for the same, finished or unfinished."

Total sales to-day, 500,100 shares. Same day 1915, 1,410,760. January 1 to date, 49,607,900. Same period 1915, 30,222,515.
Where a "c" follows a quotation it indicates a bid or offer for 10 shares.

COTTONSEED OIL.

The market ruled slightly higher, without developing much activity. There is very little selling pressure either in the speculative department or spot market. A fair consuming demand is reported from the compound lard trade, although the lard market at present is quieter. Some interest was shown in the Government report, which gave the losses from disease at only 6.6 per cent. against 10 per cent. a year ago and 12 per cent. two years ago. It also said that the number of brood sows in the country was 1.6 per cent. greater than a year ago, following an increase of 5.2 per cent. in the preceding year.
