"Bonds Favored by Banks in 1915"

Their Safety, Yield and Market Stability

The contents of this new booklet which we have just issued include:

1—A chart showing the price movement of representative Railroad and Public Utility Bonds during 1915.

2—The stability of earnings of bonds favored by banks.

3—Their higher average yield.

4—The growing appreciation of Public Utility Bonds by banks.

5—A chart showing the relative increase in the percentage of Municipal, Railroad and Public Utility Bonds held by banks in 1915.

Send for this booklet. AD-18.

Custom House Receipts.

The total receipts for duties at the Custom House yesterday were $526,588.36, of which $188,221.34 was for merchandise withdrawn from bonded warehouses and $338,367.02 for recent importations.

FINANCIAL NEWS AND COMMENT

Stock Market Has an Interval of Rest, With Moderate Reaction.

COPPER SHARES FIRM

Somewhat to the avowed discontent of the trading element which relies on sustained activity in any given direction in order to shape its notions of market tendencies stocks yesterday inclined from the outset toward a moderate lethargy in which some superficial heaviness developed. There was no change in the attitude of the financial district toward the political situation as it has been outlining itself, but this was no reason why stocks should have been expected to persist without interruption in the advancing movement which they have been carrying on lately. As a matter of fact the Stock Exchange session suggested the naturalness of the present market, for the recent course of prices and the character of the dealings conduced to some interval of rest and setback.

Advices from the European war were construed optimistically in the light of the further progress made by British consols in the improvement which began over a week ago. Matters of domestic politics, although the nature of the Presidential campaign has been pretty well settled, still contained enough fringes of uncertainty to explain the cautious action of the share list while awaiting the definite disclosures of important relationships to the canvass which remains to be made. Another contribution to Wall Street conservatism was made by the apparent stage of deadlock reached in the railroad labor controversy, although in this as in other respects the financial community is disposed to resolve doubtful conditions in favor of a hopeful event. An undercurrent of disquieting rumors about Mexican affairs seemed to be more of a factor than anything else in the sluggish processes of the day's stock market.

Reactionary tendencies displayed themselves more in the contraction of business up to the late afternoon than in any material fall of prices. Issues affected directly by a Mexican interest exhibited some weakness in comparison with other descriptions, but there was no active selling of a general sort until the last hour, when traders expressed antagonistic views of the market by operations for the decline. Before the close, however, an intimation of the inherently sound position of the list was conveyed through the arrest of decline in most directions by a display of rising strength in which the copper shares figured conspicuously. The copper group has been a drag on the market for a long time and its show of independent firmness attracted prompt attention. During the afternoon rumors circulated that very heavy purchases of copper for foreign account would be disclosed in the near future. For weeks past there has been a foreign manipulation of the metal, which has provoked suspicion here of efforts to provide a more favorable basis for foreign purchases.

A circumstance of important bearing upon the money market and the prospects for securities was the receipt of another $4,000,000 shipment of gold from Canada, bringing the total for the new movement to an amount in excess of $48,000,000. The most striking event of the financial day and one not only of current moment but of far reaching significance and consequence was the announcement of the arrangement entered into for a $50,000,000 loan to the Russian Government with an offsetting credit of similar size provided in Petrograd for the uses of American finance. The contrivance is most skilful and will facilitate immediate exchanges between the two countries. What is of more enduring importance is the beginning thus affected in the establishment of an American financial connection with the country which, by the concensus of all expert observers, has the most promising economic future in Europe.
