The corrected reading of the barometer (reduced to sea level) at New York on Friday, Feb 27, 1920, at 8 AM, as reported by the United States Weather Bureau, was thirty and eight hundredths (30.08) inches. This equals approximately one hundred and sixty-four millimetres. Captains of all vessels coming in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.
Wind at Sandy Hook, 8 PM, NW, 10 miles; clear; light sea. At City Island at sunset, NW, moderate breeze; clear. No sea on account of ice pack.
