COAL MINERS SEEK 60 PER CENT. RAISE

Operators Meet Union Men Here to Discuss Demand.

Whether there is to be a general strike in the anthracite coal fields of Pennsylvania, affecting directly 175,000 workmen and menacing the domestic fuel supply of the entire North Atlantic seaboard, probably will be determined in a series of conferences which began here yesterday in the Pennsylvania Hotel. It is hoped to reach an amicable agreement on the new wage scale formulated by the men last August, to become effective March 31 on the expiration of the present contracts.

After a joint conference lasting two hours, during which nothing but good feeling was displayed either by the operators or the miners, it was agreed that all the matters in controversy be referred for consideration to a sub-committee composed of four operators and four representatives of the miners' and mine workers' interests, the sub-committee to report to the full conference body at such time as it may be prepared to do so.

The mine operators named as their committeemen W. L. Connell, an independent operator and former Mayor of Scranton; W. J. Richards of Pottsville, president of the Philadelphia and Reading Coal and Iron Company; S. D. Warriner of Philadelphia, president of the Lehigh Coal and Navigation Company, and Charles F. Huber of Wilkesbarre, president of the Lehigh and Wilkesbarre Coal Company.

The miners chose as their representatives upon the sub-conference committee John L. Lewis of Indianapolis, international president of the United Mine Workers of America; Thomas J. Kennedy of Hazelton, president of District No. 7, United Mine Workers; C. J. Golden of Shamokin, president of District No. 9, and John T. Dempsey of Scranton, president of District No. 1.

Alvin A. Markle of Hazelton of the G. B. Markle Company, leading independent operators, was selected chairman of the committee of eight, without vote. The committee is to hold its first meeting at 11 o'clock to-morrow morning, in the Union League Club.

Mr. Lewis presented the demands of the men, which include for the coming two-year period, recognition of a uniform scale with a 60 per cent. increase for all contract workers and a flat increase of $2 a day for all day workers; also a six hour day, a five day week and "closed shop" contracts, which mean full recognition of the United Mine Workers as a party to the agreement.

The corrected reading of the barometer reduced to sea level at New York on Tuesday, March 9, 1920, at 8 AM, as reported by the United States Weather Bureau, was thirty and thirty-six hundredths (30.36) inches. This closely approximates seven hundred and seventy-one and one-tenth (771.1) millimetres. Copiaies of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.

Wind at Sandy Hook, 8 PM, SE, 12 miles; clear; light sea. At City Island at sunset, W, moderate breeze; partly cloudy; no sea on account of ice.
