UNFILLED STEEL ORDERS SHOW GAIN

United States Corporation Had 9,502,081 Tons on Books on Feb. 29.

Unfilled orders on the books of the United States Steel Corporation on February 29, 1920, as shown in the monthly report of the corporation given out yesterday, amounted to 9,502,081 tons, an increase of 216,640 tons compared with the 9,285,441 tons reported at the close of January. On December 31 unfilled orders totalled 8,265,366 tons, and, therefore, figures issued yesterday show a gain of 1,236,715 tons, compared with the business on hand at the end of last year. On February 28 of last year the unfilled business amounted to 6,010,787 tons, or 3,491,294 tons less than that of the month covered by yesterday's report, which represents the largest amount of uncompleted business on the corporation's books since September, 1917, when that class of orders amounted to 9,883,477. It contrasts with 4,282,310, the low point reached in May of last year, and is less than 3,000,000 tons below the record high figure of 12,183,083 tons established in April, 1917.

The February steel ingot production of thirty companies, representing 84.03 per cent. of the total production in 1918, amounted to 2,865,124 tons, against 2,996,662 tons in January and 2,704,683 tons in February of last year, according to the monthly report of the American Iron and Steel Institute. The February output was at the annual rate of approximately 41,000,000 tons for the entire industry. Of the total of 2,865,124 tons produced during the month, 2,152,106 were open hearth, 700,151 Bessemer and 12,867 all other grades of steel. Regarding the steel situation this week the *Iron Trade Review* has the following to say in its weekly review:

"A more conservative attitude exhibited by certain classes of buyers as to obligating themselves at current prices continues to be offset by the barriers placed around iron and steel production by various factors. Most effective of these relate to cars and fuel. The general situation in this respect has grown both better and worse in spots. The Mahoning Valley, where some plants are running under 50 per cent. still shows the most aggravated condition, and Chicago's position is less favorable this week. It is authoritatively estimated that strikes and shortages of fuel and steel have cost an output of 500,000 tons of sheets. This represents seventy-three days working capacity, or 20 per cent. of the normal annual output."

The *Iron Age* says: "With production at the highest rate in more than a year and the prospect of further increase as spring comes on, the steel trade expects gradually to work out of the serious hamperings of recent weeks. There has been no rush thus far on the part of the railroads to buy equipment, and the week has rather added to the evidence that the strained conditions in the industry are yielding.

"Some of the steel that will be applied to railroad needs was apparently reserved in anticipation of the return of the roads, and the mills that have been able to get the highest prices for their output will probably not figure largely in the equipment tonnage.

"A development of interest in the wire trade is the taking of orders by a large producer, with the stipulation that the price will be that prevailing at the time of delivery, indicating the abandonment of the low prices of March 21 on wire products.

"In the automobile trade efforts to secure steel for the second half of the year have led likewise to agreements to pay prices ruling when deliveries are made, a considerable tonnage of sheets apparently being provided for this way."

Wheat Acreage Gains in France.

WASHINGTON, March 10. — Winter wheat acreage for 1920 shows aon increase in France and British India and a decrease in Spain and Rumania in comparison with 1919, the International Institute of Agriculture at Rome reported to-day to the Department of Agriculture. Acreage this year and percentage of last year's area were given by the institute as follows: Spain, 9,511,000 acres, 91.6 per cent.; France, 11,369,000 acres, 103.5 per cent.; Rumania, 1,321,000 acres, 44.5 per cent.; British India, 27,429,000 acres, 115.2 per cent.
