The corrected reading of the barometer (reduced to sea level) at New York on Thursday, April 22, 1920, at 8 AM, as reported by the United States Weather Bureau, was twenty-nine and seventy-five hundredths (29.75) inches. This closely approximates seven hundred and fifty-five and six-tenths (755.6) millimetres. Captains of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.

Wind at Sandy Hook, 8 PM, E, 15 miles; cloudy; hazy off shore; light sea. At City Island at sunset, S, moderate breeze; clear; moderate sea.
