CURB MARKET IS ACTIVE IN SPOTS

Cross Movements Are Feature of Session—Trading Is Generally Moderate.

The local curb market was more active in spots yesterday but contained many cross movements. Prices in some departments were forced down by short selling, but in other quarters good demand appeared and brought about substantial gains.

During the morning General Asphalt showed a decided downward tendency and dropped about 2 points. Midwest Refining, however, was in great demand and advanced 8 points. In other parts of the list trading was moderate and generally narrow. Transactions in Simms Petroleum showed a large decline and Ryan Consolidated maintained a steady tone and there was a fair amount of dealing in that issue.

Rights to subscribe to the new common and preferred of the E. W. Bliss Company were introduced to the outside market. That company's new common stock also was traded in. Aetna Explosives was dull but firm.

The total of sales of New York curb securities and the range of their prices yesterday follow:

London Money Market.

LONDON, July 23.—Bar silver, 54⅝d. an ounce; bar gold, 108s. 3d.; money, 5½ per cent. Discount rates: short bills, 6 to 6⅛ per cent.; three months bills, 6⅝ to 6 11-16 per cent.; gold premiums at Lisbon, 140.

COTTON MARKET.

The cotton market was unsettled during much of yesterday's session and under further pressure from the South and Wall Street bears, which forced the list 30 to 60 points lower at one time in the afternoon. Trading in the spot month, July, ceased at midday, when that option was quoted at 43.75 cents a pound, or equal to its high record, made on Thursday. Bears were favored by several factors, chief among which was the unsatisfactory state of trade conditions in this country and cotton goods centres in China. Another adverse feature was the seriousness of the Polish situation and the weakness in foreign exchange. The late decline in the stock market here was believed to be a reflection of those conditions. The weather on the whole was improved and the official forecast for the Western belt called for fair weather to-day. The map was somewhat better, but continued to indicate considerable precipitation in the Eastern districts.

First prices here were irregular and 25 points higher to 5 lower on the trading options. Business was of a mixed character in the first hour and during much of the forenoon. After slipping off 20 to 45 points to an early low, it rallied as shorts took profits and Wall Street bought a little. Liverpool brokers traded both ways and the English market for futures was somewhat better than due at the opening and at 12:30. Continued improvement in the character of the spot trading in the British centre also was reported. Japanese and commission house interests sold some cotton at times.

The afternoon market was less active, the list ruling fairly steady during most of the third hour. Liverpool brokers took a good deal of cotton in the second and third hours, chiefly in the near months. In the fourth hour the market again reflected pressure exerted against it by speculative bears and outside elements, selling off to new low levels for the day. Many operators, it was evident, were doing nothing pending the appearance of the next report on the condition of the growing crop. The National Ginners Association in a report placed the end July condition of the crop at 76.5 per cent. of normal, but the late break in prices on Thursday had discounted the bearish nature of the report. After selling for more than ½ cent a pound less than Thursday's closing the market rallied and ruled easy in tone in the fifth hour.
