The corrected reading of the barometer reduced to sea level at New York on Wednesday, Sept 15, 1920, at 8 AM, as reported by the United States Weather Bureau, was thirty and ten hundredths (30.10) inches. This closely approximates seven hundred and sixty-four and five-tenths (764.5) millimetres. Captains of all vessels now lying in or near the ports of New York and Brooklyn can advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.
