of private companies, which must eventually and inevitably supersede this canal. The following is a table:—

These will ultimately form the great route to the West. The link with New York is now broken between here and Albany, and New York will be soon situated in relation to the Western trade pretty much as she would have been without the Erie canal. The Pennsylvania line of public works affords a route to the great West, it is true, but notwithstanding the great reduction in tolls the difficulties of transhipment are such that she cannot compete with the New York canal. The unbroken line of railroads to Boston must give that city a great advantage over New York. When the Northern line of railroads carry freight, as soon they must, all that they carry will go to Boston. Not a barrel will stop at Albany to be shipped in a boat for the New York market. Whereas if the Railroad continued to this city without delay or rehandling it would still come here.

General Record.

PACKET SHIP SIDDONS, for Liverpool, is detained until today. Her letter bags close at Gilpin's in the Exchange, at half past 11 this morning.

NEW BEDFORD MERCURY.—We call the attention of the editor of the above paper, to our report of whalemen in this day's paper. On comparing the same with their's, the quantity of oil on board of many ships reported, will be found to be very considerable. Our authority is the American Consul at Talcahuano, the correctness of whose reports no one can dispute.

BRIG TALLEYRAND, before reported ashore on the East Bank going into Mobile, has been got off without damage.

SHIP INEZ, Long, at Boston from Liverpool, reports, 16th instant, anchored NE of South Shoal and sent the mate and four of the crew in a boat for the purpose of sounding, in order to find deeper water (as reported by the mate on his arrival at Nantucket); 17th, 9 A. M., being moderate, got our anchor and stood east into deep water; 20th, South Shoals by W, thirty-eight miles, fell in with brig Tuskar, Lovell, from New Orleans for Boston, who kindly supplied us with two men; this morning, off the Highlands of Cape Cod, fell in with the pilot boat Belle, and received from her a pilot and three men. Capt. Long must gratefully tender his thanks to Capt. Levell, of the brig Tuskar, and to the crew of the pilot boat Belle, for their kindness in rendering him assistance. The Inez has not sustained any damage.

Notice to Mariners.

LITTLE ROUND SHOAL.—The Newburyport Herald states the schr Signal, arrived at that port from Providence, in passing over the Shoals on the 20th inst. picked up the buoy which was placed on Little Round Shoal. It had gone adrift in consequence of the ring in the lower shackle having worn off. This iron ring is very large, and must have been a long time in chafing through, so that it appears hardly probable it could have been properly looked to last fall by the person whose duty it is to look after the buoys in that vicinity.

TO THE PUBLIC—Whereas, an article appears in the daily papers, under the head of a Postscript, wilfully misconstruing a former advertisement of the subscriber, thereby giving the public an impression that the lamp, formerly known as Webb's Burner was absolutely his. Webb's entire invention.—Now, the subscriber would most especially inform the public that the lamp in question owes all its recent improvements to him alone. And the article alluded to says, Webb's latest improvement in lamps is operating by the new inverted cone movements—patent right secured—and can only be found at his store. Now, in order to show the error of the above assertion, the subscriber has only to let it be known that he has a large assortment of the above Philosophical Lamps, regulated by the inverted cone, together with still further improvements, and for which there is no extra charge made. He would invite the public to call and judge for themselves which is the humbug—only give him a call, and don't forget the old and permanent location, No. 111 Grand street, one door from Broadway. a26 3t*r JAMES HINDS, Manufacturer.

A. THOMSON'S BLACKING WAREHOUSE, No. 2 Courtlandt street.—A. THOMSON respectfully informs the merchants of the city and the public in general, that he still continues to manufacture his inimitable Paste Blacking, being the sole inventor and manufacturer. This blacking is known throughout the world, and particularly the United States, as Lee and Thomson's Paste Blacking. A. Thomson would further inform his friends that he has made extensive improvements in his old manufacturing establishment, which enables him to supply them with any quantity and at reduced prices. Beware of interlopers. Steam is a modern application, and is sometimes resorted to without much benefit. A. Thomson has never used steam in any shape to enter his manufactory—his workmen are not likely to make mistakes and consequently it can be depended upon as genuine. A. THOMSON, late Lee & Thomson, formerly 265 Broadway, now 2 Courtlandt street, near Broadway.
