whole distance, 90 miles, is now on hand—50 miles are laid and in operation—and the company is actively engaged in laying down the remainder, so as to complete the line to Weldon, 30 miles, in July of the present year, and to South Gaston, 90 miles, by the close of the year. Parties whose bids are accepted will be required to pay twenty per cent upon the amount awarded to them, immediately upon being notified of the acceptance of their bids, and the remainder in equal amounts on the first days of July, August, September, and October next; but any party will be at liberty to pay in full at once. Interest will commence from the day of payment.

Books of subscription to the capital stock of the Mohawk Valley Railroad will be opened at the Chemical Bank, and at No. 60 Merchants' Exchange, on Monday, the 19th inst. The estimated cost of this road, with a double track, is $2,679,365 62, distance 78¾ miles. The capital of the company is two millions of dollars, in shares of $100 each. To give some idea of the resources of the section of country through which this road will pass, it is only necessary to say that the Utica and Schenectady Railroad was put in operation in August, 1836; from this time to the close of 1840—four years and five months—the receipts of the road, from passengers and United States mail, amounted to the sum of $1,567,062. From 1841 to 1845, both inclusive, five years, the receipts from passengers and mail, and $51,171 received for carrying freight, amounted to $1,773,578; from 1846 to 1850, five years, from passengers and mail, $2,583,626; from freight, $931,780—Total, $6,856,046. Expenditures for the same period, $2,637,842. Excess of earnings over current expenses in about 14 years, $4,218,204. This road, 78 miles in length, was constructed and put in operation for a million and a half of dollars. The Mohawk Valley Railroad will be constructed on the south side of the Mohawk river, and draw a large portion of its business from the section of country through which it passes. It will cost but about one half the Utica and Schenectady road, which runs on the north side of the river, and can therefore successfully compete for the through travel.

The present cost of the Boston, Concord and Montreal Railroad, according to a recent report, is $1,640,777. Receipts in 1850, from that portion of the road which cost $1,200,000, and from local sources, $144,836. Expenses, $96,209. Net income, $48,626, or 4 per cent on the cost of the road run. The liabilities of the company are as follows:—The total amount of mortgage bonds issued, running two years, is $296,509; notes payable will be funded as soon as convenient. The continuation of the road to Wells River, and equipment, will cost $500,000. With this expenditure, the company will have a track of ninety-three miles long, costing $2,150,000. Thus far the Concord has been built within the estimates, and as fast as opened, has done an excellent business.

The anthracite coal tonnage for the week ending on Saturday last, on the Lehigh Navigation, was 29,331 tons, making an aggregate for the season of 141,581 tons. The Reading Railroad has brought down, for the week ending on Thursday, 28,994 tons, and for the year 630,465 tons. The Schuylkill Navigation has brought down 18,052 tons for the week ending on Thursday, and for the season, 106,070 tons.

ADVERTISEMENTS RENEWED EVERY DAY.
