Timely Notice.—After the 1st January I will not take consumptive patients upon any terms, who have been allowed to pine away until the very last moment of life. I have had one whole year's perpetual anxiety and harrass from such patients, who never could have gone so low if they had taken a bottle of Antidote at first. Now, understand me well, I have never lost a patient in consumption; even in all those very worst cases they recovered; but it is tedious and unsatisfactory, and I will not keep on doing it to satisfy the caprice or incredulity of unbelieving persons, now that hundreds of evidences are so easy to be obtained. TALBOT WATTS, M. D., 424 Greenwich street. Depot for the Nervous Antidote, 162 Nassau street.

MONEY MARKET.

MONDAY, Dec. 22—6 P. M.

There was a moderate panic to-day among stock speculators. Holders are anxiously looking for the Baltic, for more favorable news, with the hope that a reaction in prices may be realized. The Baltic is now nearly due, with four days' later news. She will, without doubt, bring something important, and business of all kinds will be partially suspended until something more definite relative to the result of the *coup d' etat* is known. At the first board to-day, there was a grand rush to get rid of stocks first. There were any number of sellers and very few buyers, except among the shorts for delivery. Erie Railroad declined 2 per cent; Reading 1¾; Harlem, 1¼; Long Island, ⅝; Canton Company 2¾; Norwich and Worcester, 1¼; Morris Canal, ¼. There were large sales of all the fancies, and at the close prices were weak and tending downward. There is great distrust in the public mind, and we should not be surprised if, even in the absence of more unfavorable news by the Baltic, the market steadily settled down, and prices touch lower points than have been realized for many weeks. All confidence in the future is gone No one feels disposed to touch anything for purposes of speculation. Every one appears determined to keep clear of all responsibilities and obligations, until political affairs wear a brighter aspect. It is best to be prepared for emergencies. The affairs of Europe are in a very unsettled condition, and we know not when a steamer may bring news that would put prices for stocks, for cotton, for real estate, land lots—in fact, for every species of property—down ten to twenty per cent. In times like these, the safe way is, of course, the best, and that is perfect quiet—inactivity.

At the second board the transactions were limited, without any improvement in prices. The bears have, no doubt, availed themselves of the temporary panic to take in their shorts and secure the profits accrued. Should the banks become alarmed at the complexion of politics in Europe, and call in their stock loans, there would be such a depreciation in the leading fancies as has not been known for years.

The receipts at the office of the Assistant Treasurer of this port, to-day, amounted to $21,030; payments, $75,914 14—balance, $2,600,495 09.

We referred, a few days ago, to the fact that Grinnell, Minturn & Co., of this city, and a highly respectable firm of Boston, had made arrangements to supply any demand for small amounts of sterling exchange, which may arise, from five shillings upwards. This arrangement will be of great advantage to a great number of our adopted citizens, as well as strangers who sojourn among us, desirous of making a safe remittance to their friends in Europe. We hope the parties embarked in this enterprise may be as successful in making foreign exchanges work with as great facility as the highly responsible banking house of Clarks, Dodge & Co. have been, within a few years, in making our inland exchanges work from Boston to St. Louis, and affording a secure and cheap medium of exchange throughout the entire country.

The Boston Tube Company will carry on the business hitherto conducted by Walworth & Nason, in the name of the company. This fact improves the value of Edgeworth again, as it had been feared that the works might be abandoned on account of the failure of the agents, W. & N.

The earnings of the Boston and Maine Railroad for the fiscal year, ending November 29, 1851, were as follows:

BOSTON AND MAINE RAILROAD.	Earnings.	Expenses.
From November 30, 1850 to May 31, 1851	$295,650 24	$147,275 02
From May 31, 1850, to November 29, 1851	337,418 91	157,783 38
Total	$633,065 15	$305,058 40

The dividend paid has been 7 per cent. and there is a surplus remaining, the proceeds of several years' gathering, of $85,032 67.

The demand for land warrants has lately been limited, and prices have not been so firmly sustained. The probability of a bill passing both Houses of Congress, making the warrants issued and to be issued under the act of September, 1850, assignable, the same as those issued under previous acts, is the cause. In the event of this, there will be greater uniformity in prices, without, perhaps, any depreciation of consequence in the value of the old issues.

The report of the Treasurer of the State of Alabama, recently made to the Legislature of that State, gives the annexed general statement of the condition of the Treasury:—

FINANCES OF ALABAMA—RECEIPTS AND DISBURSEMENTS.

Receipts for the fiscal year ending Nov. 1st, 1850, were	$597 424 93
Balance in Treasury at date of last report	538,016 58
	$1,135,441 51
The disbursements during the same period, were	471,673 65
Leaving a balance Nov. 1st, 1850, of	$663,767 86
Receipts during fiscal year ending Nov. 1st, 1851	658,976 15
	$1,322,744 01
Disbursements during same period	513,559 04
Balance in Treasury Nov. 1st, 1851	$809,184 97

In addition to the above receipts, Treasury Drafts have been received from the United States, on account of expenses incurred by the State in the war with Mexico, the proceeds of which are now in hand, amounting to $1,402 49.

The commissioner and trustee for settling the affairs of the State Bank of Alabama has recently made a report to the Legislature, and a summary of the result of his whole management. The State Bank and branches of Alabama are the exclusive property of the State, founded on capital raised by the sale of her bonds, and managed by officers and directors elected by the Legislature. For years the State expenses were all paid out of the means of the bank, under the delusive idea that there were profits. When the system was abolished, and the banks ordered to be wound up, these assets were all the State had to show for a large amount of bonded debt, and for the means of paying the interest thereon. A State tax was laid to aid in these liquidations, and after five years this report of Mr. Lyon shows how much has been done to reduce the debt by a rigid application of the bank funds. When the banks were put into Mr. Lyon's hands the amount of the debt which the State owed for their capital was $9,170,155 55, bearing an annual interest of $469,657 80. The amount now outstanding is $4,407,606 77, and he has on hand United States six per cents which reduce the sum to $3,913,616 77, at an annual interest of $236,353 35. In the investment and application of the funds necessary to meet the interest from time to time, and in the purchase and sale of stocks and United States certificates for funds on hand, Mr. Lyon reports that he has made a cash profit for the State of $384 344 58.

The assets of the banks available for the payment of foreign debt are getting low. His estimate is, that $685,000 more may be realized. But there are outstanding yet $418 412 of the notes of the banks, some of which are lost. Three or four hundred thousand dollars more are all that can be reasonably calculated upon to be derived from this source.

The last annual report of the Syracuse and Utica Railroad Company, gives the annexed statement of operations during the year ending the 30th September, and the condition of things on that day:—

SYRACUSE AND UTICA RAILROAD.

Payments for interest	2,331 33	2,594 53
" in dividends	240,240 00	279,435 00

It will be seen by this, that with an increase in the net earnings of only $16,199 there has been an increase in dividends of $39,195. During the year there was an increase in the cost of road and equipment of $170,488.

At a meeting of the directors of the Fall River Railroad Company, on the 11th inst, the balance of net over liabilities was ascertained to have been, on the 30th of November, $96,007 63, of which sum $56,229 42 was considered available, and applicable to dividends. The balance, $38,778 21, was invested in wood, iron, and other materials of daily use. A semi-annual dividend of $4 50 per share was declared payable on the fifth day of January next. Capital, $1,056,000. Net earnings for the year, $99,794 86.

We learn that the Delaware and Raritan Canal is to be greatly enlarged and improved. It is the intention of the managers to take one foot in depth from the bottom of the canal, and place it on the top of the banks, thereby increasing the present depth to about nine feet, or eight and a half of water, when full. But a greater work than this is in contemplation, and we hope, before long, it may be accomplished. It is to lengthen the present locks to about 250 feet, so as to admit vessels loaded with 500 tons to pass through them. With this improvement, and the walling of the banks with stone and wood, now nearly done, a considerable rate of speed may be attained, and a most comfortable steamboat route, without interruption, be secured between Philadelphia and New York, in about twelve hours.
