Theatrical and Musical.

BOWERY THEATRE.—The grand spectacle drama of "Paul Clifford" continues to attract densely crowded assemblages. It is certainly destined to have a long and successful run, as the most unbounded approbation is bestowed upon it at each representation. Messrs. Goodall and Stevens, as Paul Clifford and Long Ned, elicit marked applause. It will be repeated again to-night together with the excellent drama of the "Sledge Driver" and "Cattle Stealers."

BROADWAY THEATRE.—The sensation produced by Mr. Collins in his renowned character of "Paul Clifford," is on the increase nightly. The attendance last evening was not only very great, but was fashionable, and the applause which Collins received was well merited for he was in excellent voice. It is seldom, indeed, that we see a piece produced with more magnificence than "Paul Clifford," and we would, therefore, advise the public to embrace the present opportunity of seeing it, as this is positively Mr. Collins's last week. It will be repeated to-night with the comedy of "Naval Engagements."

BURTON'S THEATRE.—The grand operatic treat of "Cinderella" is advertised again by Burton for this evening, being positively the last night it can be represented. This being the case, a tremendous rush for tickets may be anticipated to-night at the box office; therefore those persons who desire comfortable seats, should secure them during the day. The new farce entitled the "Old Commodore" made a fine hit last evening, and will be the concluding feature to-night.

NATIONAL THEATRE.—The old and distinguished tragedian, Mr. Booth, was greeted again last evening by an overflowing house with the most enthusiastic plaudits. To-night he is to appear in his great character of Lear, in Shakspear's tragedy of "King Lear," supported by Messrs. N. B. Clarke, Arnold, Mrs. Nichols, and Miss Hathaway. The concluding piece will be the "Two Bonnycastles." We perceive that a new nautical drama is in rehearsal, in which Mr. G. W. Jones, a very distinguished actor, is to appear.

BARNUM'S MUSEUM.—The local piece of "The Bottle," at this popular establishment, has been attended with the happiest effects, and whoever has arranged it, deserves credit for the felicitous manner with which it has been effected. Clarke, as Richard Thornley, is a highly creditable performance; Coddles, in Hadaway's hands, is full of humor; Miss Mestayer makes a capital heroine, and Henkius as Dognose, is a most interesting performance. It will be repeated to-night. Two good pieces will be presented in the afternoon.

BOWERY AMPHITHEATRE.—The talented Nathan family have become exceedingly popular at this establishment. Little Philo Nathan has become the delight and admiration of every one. The programme provided for to-night is universally attractive, and will, no doubt, attract a very large attendance. A magnificent spectacle, entitled "St. George and the Dragon," is in preparation, and will be speedily produced.

CHRISTY'S MINSTRELS.—This inimitable band of Ethiopean delineators have now been performing in this city, for nearly six years, and have experienced the greatest career of success upon record. Rain or shine, their beautiful hall is sure to be crowded to overflowing, and their entertainments afford the greatest source of enjoyment, and this is altogether owing to the indefatigable management of E. P. Christy. The programme for to-night is elegant. Remember Porter's benefit takes place on Saturday.

FELLOW'S MINSTRELS.—The new band have made a very favorable impression upon the public. They are very talented, and with a little care and perseverance on the part of the management, who are always upon the alert to please their patrons, will become an exceedingly popular company. The programme for to-night, contains many fine features.

COMMERCIAL AFFAIRS.

New York Dry Goods Market.

Trade is improving at private sale, while at auction there is a good deal of animation. Numerous country dealers are in the city, and the transactions are very considerable. Last Thursday, Messrs. Coffin's opening sale of cassimeres was the attraction, while this week there are several, all operating to draw to the city a large company of buyers. Brown shirtings and sheetings are in moderate request and firm, and for the heavier goods, buoyant. Bleached goods are more active of all qualities, with a good stock at steady rates. Brown drills are advancing, with a good inquiry. Osnaburgs are in limited demand, but the stock not large, and prices are steady. Denims move moderately at uniform rates. Stripes and ticks are rather more in request but not actively so. Printing cloths are in light demand at steady prices and moderate supply. Prints are active and increasingly so; prices have not varied, and are readily obtained. Ginghams are moving; more inquired for. Lancasters 10½c., and Glasgows at 10½c. a 11c. Lawns are more active. The large sale of the Portsmouth lawns, printed by Dimmell & Co., to-day, was animated, and brought good prices. Mouselin delaines are not yet active. Bareges delaines show a better demand. Cloths are in good demand, especially of the low and medium qualities. Clothiers are still buying. All descriptions under $2, meet with good custom. Cassimeres are active. The large sale of plaid styles has relieved the market of a considerable stock of out of date patterns. Blacks, fancies of the "wave" style, and plain styles, are in demand. Tweeds are in moderate demand, at steady prices. Jeans are inactive. Lindseys, flannels, and blankets are all dull. There is more activity in foreign goods. Millinery goods are more wanted. Printed cottons, jaconets, and black silks are selling at steady prices. Plain and figured silks and satins are yet quiet. Silk vestings are in demand, at good prices. Ribbons are in better request. German and French cloths are active, at former prices. British cloths are dull. Low qualities of doeskins and cassimeres have been selling freely. In delaines, lawns, and other British dress goods there is a fair demand. Linens are also active. Buckrams are in request. Prices open low, and are in favor of ready buyers. The demand for January was unusually light, to be traced, evidently, to the keeping back of the produce of last harvest to a great extent. This will, however, be corrected in a later demand. Breadstuffs are rising. There is a scarcity in the Eastern markets, and produce must come forward to the benefit of trade. The temporary retardation of trade seems to have alarmed the *gold mines* of protection.
