sickly season the bulk of travel between San Francisco and New York will be by the way of Nicaragua. The Pacific line of steamers by this route has lately been increased by the arrival out of the steamships S. S. Lewis and Pioneer; and the arrangements contemplated for making this the cheapest and pleasantest, as well as the quickest route, will soon be complete. Dauphin Coal Company is steadily recovering from the recent depression. Pennsylvania Coal Company is also looking up again. Delaware and Hudson advanced to-day, with small sales. We notice small sales of Montgomery Mining Company nearly every day, at about the same price. There appears to be purchasers for all that is offered, indicating considerable confidence on the part of buyers. There were no sales of New Jersey Zinc at the first board to-day. At present the demand is not active, and little stock is on the market. The company are about experimenting in its Franklinite ore, and anticipate most favorable results. At the first board Delaware and Hudson advanced ¼ per cent. Florence and Keyport ¼. Dauphin Company ½. Pennsylvania Coal Company ½; Norwich and Worcester ¾. Harlem ¼. Reading Railroad ⅜. Erie Bonds (1871) declined ¼ per cent.

At the second board the market was pretty well sustained, considering Wall street is one of the hottest places in the city and incomparatively cool spots the thermometer ranged between 95 and 100 degrees. Delaware and Hudson advanced ¼ per cent. Canton Company ¾. Dauphin Company 1, Reading Railroad 1⅛, Erie Railroad ¼. Harlem ⅜.

The receipts at the office of the Assistant Treasurer of this port to-day, amounted to $155,126 46; payments, $13,163 89—balance, $4,590,458 99.

The Astor Fire Insurance Company have declared a semi-annual dividend of five per cent; the Columbus and Xenia Railroad Company, ten per cent; the Laconia Manufacturing Company, four per cent; Pepperell Manufacturing Company, four per cent.

There will be sold at auction to-morrow, (Friday,) the 23d instant, at the Merchants' Exchange, at noon, the following railroad bonds and shares:—

$50,000 bonds Mansfield and Sandusky City Railroad, Ohio.

$50,000 bonds Chester Valley Railroad, Pennsylvania.

$100,000 bonds Saratoga and Washington Railroad, New York.

$200,000 bonds Vermont Valley Railroad.

$100,000 shares Vermont Valley Railroad, capital stock.

These are all first class, first mortgage, seven per cent coupon bonds, and no doubt will, under existing favorable circumstances, bring good prices. The Mansfield and Sandusky City Railroad bonds, for fifty thousand dollars, have but a short time to run, being redeemable in 1860. The road is fifty-seven miles long, and is in active successful operation its entire length. These bonds are a part of an issue of $730,000. The capital stock of the company is $950,000. Upwards of sixteen hundred thousand dollars have been expended on the road, the whole of which has been mortgaged for the security of the bondholders.

The steamship United States, from Aspinwall, brings ten days' later news from California. She has not much gold dust on freight, or in the hands of passengers. The Golden Gate, at Panama from San Francisco, brought down nearly a million and a half of gold dust on freight. The El Dorado is now on her way to this port, from Aspinwall, with most of the gold. The accounts from California continue encouraging. There had been nearly five and a half millions of gold dust shipped from San Francisco during the month of June. This is equal to any previous month since the discovery of the gold mines. The production throughout the year is likely to be unusually large.

The annual report of the Michigan Central Railroad Company, just published, gives a very satisfactory account of the road and its future prospects. The directors have succeeded, in spite of many obstacles, in completing a connection with Chicago, a city destined to become the conveying point of passengers from the whole northwest and from a large portion of the west. The competition of the Michigan Southern Railroad is not, it is believed, likely to do much injury to the Central, while it is expected the completion of the great Western road through Canada, to be finished next year, and the increase of trade from the south and west via Chicago, will make it still more profitable.

The gross receipts for the year ending May 31, 1852, were $1,075,284 15; expenses, $470,930 97; interest, $274,279 62; net earnings, $329,983 76; surplus from last year, $76,312 83; amount applicable to dividend, $406,296 47, from which a dividend of 14 per cent has been paid, leaving to the credit of income account a balance of $2,158 19. As compared with 1851, the gross earnings exhibit a gain of $168,189 59; the expenses an increase of $70,091 11 and the net earnings a gain of $38,098 58.
