The Adulteration of Alcoholic Liquors, and the fatal consequences resulting therefrom, are just now subjects of remark in a large number of our public journals. The temperance papers, medical periodicals, and a portion of the religious press have joined the discussion, and a startling array of facts in relation to the frauds of distillers abroad and dealers at home, has been presented to the public. At a late meeting of the Farmers' Club in this city, it was shown that no inconsiderable portion of what we call French brandy is manufactured from beet and molasses, and so skilfully flavored in imitation of the genuine article that even connoisseurs are sometimes deceived by it. It has also been proved that brandy, gin and wines are so closely counterfeited in taste, by combinations of certain drugs, that the ordinary dram drinker cannot detect the imposition. In fact, it is ascertained beyond all manner of doubt, that an amount of capital far exceeding that employed in the production of pure liquors, &c., is devoted to their adulteration, and to the manufacture and sale of villanous imitations. To say nothing of the effect of such base articles upon the community at large, what must be their effect when administered in medical practice? Instead of stimulating, they must quickly paralyze the nervous system, and fearfully aggravate the symptoms which the physician desires to remove. Under these circumstances, it becomes of the utmost importance to ascertain what is, medically speaking, the best form of alcohol, and of whom it can be obtained unmixed and undeteriorated. We have often seen it stated that Wolfe's Schiedam Aromatic Schnapps is such an article. Journals opposed to the use of liquors except as remedies in cases of disease, recommend it for medicinal purposes; and we learn that about three thousand of the first physicians and chemists in the country have endorsed it as the purest of alcoholic stimuli, and that they manifest their faith in it by prescribing it to their patients, in cases where the exhibition of a spirituous stimulant is deemed advisable. We know nothing of the Schnapps from personal experience, but it seems fair to conclude that an article, the use of which is sanctioned in appropriate cases, by such men as Drs. Cook, Parker, Worster, Cheeseman, Reese, Childs, and Anderson, of this city, Dr. Chilsoler, of Philadelphia, and other medical men of high professional celebrity, must be of the pure and sterling stamp. If so, no time should be lost in introducing it, in the absence of any other so well recommended, into all our public hospitals and dispensaries and placing it for sale in the hands of every town agent in the Maine law States. Be it understood, however, that our remarks have reference solely to the alleged merits of the Schnapps as a remedial and restorative agent.—[Home Journal, June 3.]

A Walk through Broadway, on one of the sunshiny and pleasant afternoons which this month always brings with it, is a treat to the student of human nature and hats. Yes, hats, reader, for there is as much philosophy in the particular kind of hat worn as in the expression of the face or body. Whenever you see a gentleman with a hat of the latest and most fashionable style, (evidently one of Knox's make,) set him down as a man of discernment and good taste. All gentlemen patronize KNOX, either at his elegant establishment in the Prescott House, No. 535 Broadway, or at his older stand, No. 128 Fulton st.

Physicians are cordially invited to witness its success in cases of consumption, bronchitis or asthma. The plan of inhalation adopted at the Lung Institute is entirely new and novel, and we are happy to say meets with the sanction and approbation of all medical men who have examined it. Patients, besides using the remedy constantly, whatever their duties may be have access to rooms filled with medicated air daily or otherwise as their case may require. Its success in bronchial complaints is truly astonishing, even after a few days' treatment. All patients are allowed the benefit of one week's trial without charge if they desire it. Patients received from 9 to 4 every day. Under the charge and direction of Dr. G. D. SANBORN.

I know not when to stop, after seeing the good effects of it upon my wife, a person apparently almost dead. She has been for years under the doctor's hands. Please send me another package of the hygeana. Enclosed is $3. Respectfully yours,

Who is the Man?—Why Dr. J. N. Hobenssack. Why is he the man? Because he made the greatest discovery ever made, and the remedy for the discovery. But not until he spent nine years of labor and toil, and $75,000 in advertising, could he make the people believe it. But now the cry is, from one end of the Union to the other, Dr. Hobensack has cured me. The annual amount of deaths among children induced the doctor to think there was a cause that the medical men could not understand, and being satisfied from observation and practice, that the diseases of the bowels were not understood by the profession, made that his particular study, and in nine cases out of ten of every post mortem examination, discovered that the stomach and bowels were literally alive with worms. But the medicine used to correct the bowels did not remove the cause; hence every one will see that if the worms had been driven from the system, nature would then restore the patient to health. I say to every person, both old and young, and to every mother who has weak and debilitated children, or persons who are suffering with derangement of the bowels, to take HOBENSACK'S Worm Syrup and Liver Pills, as it is never too late to try it as long as there is strength in the invalid to take it; and there being no excuse now to be without it, as it has become so popular with the people in the United States, that no respectable storekeeper considers his stock complete without it. C. V. Chekener & Co., No. 51 Barclay street General Agents for the Eastern States.
