THE BALTIC.

KIEL, January, 8, 1856.

e still have open water, and there is no interruption the activity which for the last ten days has so unfa ally prevailed between the lower ports of the Baltic those of Russia, which, notwithstanding the winter, still accessible to trading vessels under canvass, al gh it is not long since the weather in those regions become too severe for the war steamers of England, it is hoped that those English merchant vessels which r owners and charterers have still ventured to des h to Memel, Konigsburg, and other Prussian ports of Russian produce, may not fall a prey to some e cruisers of the Czar, while the protection they had ght to expect from the British navy has been so pre urely withdrawn.

SWEDEN.

e Cabinet at Stockholm has at least as good oppor ties of learning the real intentions of Russia as Cobden, and this Cabinet has just declared the most unequivocal manner, that it knows ia intends to overrun and occupy a part of its itory. It has declared this, not in words ely, but in action. It has been induced by its weigle to take a step which cannot but be resented its powerful neighbor. The Swedish government ld never have incurred such a risk had it not been inced that there was still greater danger to be in ed by abstaining from the step it has taken.

HERAT.

e *Post* says that advices have been received direct Persia, which in no way confirm the statement t came through India) of the capture of Herat by Persians. All that has happened at Herat has been nflict between two Afghan factions.

Markets.

ONDON MONEY MARKET, Friday evening Jan 11.—The sh funds opened this morning with a steady ap ance, and continued to be fairly supported on the ication of the second edition of the *Times* with the thly returns of the Bank of France, showing renewed decrease in the bullion, which a took place of a half per cent from which was no recovery. Consols for money, which left yesterday at 86⅝ to ¾, were first quoted 86⅝ ⅞, whence, in the middle of the day, they dropped 86⅝. At the official close the prices were 86⅝ to for money, and 86⅝ to ¾ for the account. ing regular hours, in consequence of lower quo ns from Paris, transactions took place for account at 86⅝ to ¾. With regard to the peace ilations nothing fresh transpired, but there ed less disposition to attach importance to . Although the principal operators during day sold largely, there was a good demand for k on the part of the public, and consequently a nution in the pressure for money. In the sto k market it was in active request at full rates. stock closed 100 to 207; Reduced, 85 to ¼; New e per Cents, 86⅝ to ¾; India stock, 217 to 2 0, g Annuities, 3⅝; Annuities, (1885,) 19¾; Exche r bonds, 97; and India bonds and Exchequer bills, 0 3s. discount.

reign securities were generally heavy, and prices a decline from those quoted at the commencement business.

the foreign exchanges this afternoon the rates of post were fully maintained, but no important ansac was perceptible.

e final quotations of the French three per cents on Paris Bourse this evening were 82f. 20c. for money, 62f. 50c. for the account, showing a fall of a half per , and a predominance of money sales.

e Bank of France returns for the past month, lished to-day, excited much disappointment, withstanding the extraordinary extent of the ltances from this side, the bullion, when in the ious return had at length shown a slight re ry, has now experienced a renewed falling off of 2,000, the total stock having been reduced to 80 000. It is satisfactory, however, to be aware the £500,000 of Mexican silver exhibited a day we back is not included in this account. With regard he other figures, it appears that, while the bullion been undergoing reduction, he circulation has in ed to the extent of £5 5 000—a fact which, although uated to win the approval of the opponents of the Bank Charter act will add considerably to the liquidit which the return will be generally viewed. The ad ces on government stocks have likewise been aug ted to the extent of £225,000, but there has been a ease of £400,000 in those on shares. The discounts, ch in the previous account had been reduced £1,520, exhibit an increase of £1 160,000. In the deposits e has been an improvement of £590,000, but the unt to the credit of the government has fallen off ,000.

e letters from the Continent to-day state that the ap ance of the exchanges is favorable at almost all ts. At Hamburg money has become abundant, and rate of discount has fallen to 4½ per cent.
