FINANCIAL AND COMMERCIAL.

MONEY MARKET.

THURSDAY, March 27—6 P. M.

There was not much activity at the board this morning. The buoyancy of yesterday has partially subsided. Cleveland and Toledo sold to the extent of three thousand shares at the first board, and closed a little heavy. Erie was freely offered, and fell off a fraction from the opening. The tendency of this stock is downward. It is rumored that the forthcoming report recommends heavy expenditures on account of construction. Michigan Southern was not sustained to-day at yesterday's closing prices. The sales were small, and on time. Cleveland and Pittsburg was more active this morning, at better prices. This stock appears to us unwarrantably depressed. We believe the road is well managed, and doing a good business. Wisconsin Lake Shore Railroad sold at 72¾ per cent cash, and 73, buyer sixty days. It is stated that in July a semi-annual dividend of five per cent will be paid, and that the road is earning considerably more than that rate for the year. Galena and Chicago sold at 114¾ per cent to the extent of twenty shares. One half of the orders in the street for this stock could not be filled without putting it to 120 per cent. Buyers are in the market in anticipation of the regular annual report. The fiscal year closes on the 1st of May, and soon after that date we shall get the usual yearly statement. Within the next ninety days we shall see a great improvement in the market value of Western railroad stocks. They will have within that time a rush of business such as has never been known, and their monthly earnings will, beyond all doubt, be largely in excess of those for the same period last year. Every year adds largely to the population and produce of every section of country penetrated by rail roads; and at the West, on those vast prairies of Illinois and Wisconsin particularly, where towns and cities spring up like magic, the annual increase in railroad travel and traffic must be enormous. Some of the roads, which even now are earning and paying large dividends, pass over prairies where a house or habitation cannot be seen for miles and miles, and where the soil never has been touched by human hand for cultivation. What must these roads be, as investments for capital, when these vast prairies are covered by an active and thriving people, and every foot of the soil is covered with immense crops of grain?

After the adjournment of the board the following sales of stocks and bonds were made at auction by A. H. Nicolay:—

The Assistant Treasurer reports to-day as follows:—

Paid on Treasury account	$21,801 46
Received on Treasury account	295,248 82
Balance due Treasury account	6,633,068 91
Paid for Assay office	13,253 93
Paid on disburing checks	27,788 42

The receipts include $50,000 for transfer drafts on Boston.

At the second board the market was not so strong and there was but a moderate amount of business transacted. Galena and Chicago fell off ¾ per cent, with the sale of 100 shares, 50 for cash and 50 buyer thirty days. Cleveland and Toledo Railroad was firm, at prices current at the first board. A sale of 500 shares was made at 79½, seller three days. Cleveland and Pittsburg was firm at morning's prices. Wisconsin Lake Shore closed firm at 72¾ per cent, at which a small sale was made. Florence and Keyport Joint is firm at ¾ per cent. This is a very extraordinary stock. We believe the company has just issued a report, but it has had no particular effect on the stock. The old stereotyped quotation of ¾ per cent is still current. Milwaukie and Mississippi Railroad stock was steady to-day, at 86½ a 87 per cent. The finances of this company have recently, by the negotiations of its agents, been placed in a very favorable condition. An early completion of the entire line is guaranteed. With the resumption of lake navigation and a general opening of the season, the business of the Milwaukie and Mississippi Railroad must increase rapidly. The stock must appreciate in market value a large per cent, from the fact that the means to complete the line to the Mississippi river have been secured upon most favorable terms. The stockholders in all railroad companies forming a connection between Lake Michigan and the Mississippi river, have a guarantee that the roads in which they are interested have a terminus upon the waters named. They cannot go beyond those boundaries. They are natural limits, and must be so considered. Railroads beyond the Mississippi are in every way distinct corporations, and are not in any way connected with those this side. Illinois and Wissonsin railroad companies have adopted the policy of limiting their lines and their operations to the territory dividing the Mississippi river and Lake Michigan, and of concentrating their resources upon their immediate sections, without buying connections beyond. A strict adherence to this rule adds vastly to the value of the roads this side, and places them beyond all contingency.

The steamship Emeu, at Boston from Liverpool, brings four days' later intelligence from all parts of Europe. The news is of a favorable character. Consols had advanced ¼ per cent. Breadstuffs were in better demand at better prices. Cotton was without change. The market was not active. From the manufacturing districts the accounts are of a more encouraging character. The London money market had not changed for the better. An active demand existed at full rates. The political news is important. The Peace Conference continued in daily session. This fact is a favorable feature. Nothing had transpired of the proceedings. This is another favorable feature. Up to our latest dates the congress had been in session more than two weeks. The public mind both in England and France was daily becoming more confident that peace would result from the conference. It is now the general opinion that peace was determined upon before the congress met, and that the details and arrangements have now only to be fixed and agreed to. We agree with this view, and therefore have no doubt as to the conclusions of negotiations.

The returns of the banks of New Orleans, for the week ending March 15, show an increase of $124,238 in specie, of $262,559 in deposits, of $76,170 in circulation, compared with the previous week.
