Dr. R. G. DURKIN, 363 Canal street, near Wooster

INCREASED PATRONAGE RENDERING MORE COMmodious apartments indispensable, Dr. LUTHER will remove this week to 42 Great Jones street, where his increased facilities will enable him to insert artificial teeth more economically than any other dental establishment.

TEETH.—DR. J. ALLEN'S PATENT IMPROVED ARtificial dentures combine three prominent advantages not heretofore attained:—
1st. The teeth are garnished with a continuous artificial gum, roof and rugs of the mouth, without seam or crevice, with all the delicate tints and shades peculiar to those of nature.
2d. The sunken portions of the face are restored to their original fulness, thus rejuvenating the waning cheek.
3d. A perfectly natural tone and truthful expression is given to the teeth, which make them appear as the work of nature. This system adds great importance to dental science, as it combines the skill of the artist with that of the dentist, whose talents are displayed not upon canvass, but upon the living features of the face.
It is not his ambition to adopt the cheapest but the best mode of practice. His two hundred dollar sets, as above, are gems worth possessing. Call and see them.
He has published a descriptive pamphlet, which may be obtained by addressing Dr. J. Allen, No. 30 Bond street, N. Y.
