Notice to Mariners.

Office of Lighthouse Engineer, 5th and 9th District, New Orleans, Jan 15, 1863.

During the construction of the Lighthouse buildings at the Head of the Passes of the Mississippi river, a light will be exhibited nightly, from the 20th inst, at a point coinciding with the position of the old Lighthouse, which will also be that of the new tower. The light will be that of a ship's lantern, visible to descending vessels at a distance of about five miles, and will be replaced by a Fresnel lens of the sixth order, as soon as the tower, now in course of construction, shall be sufficiently advanced to receive it.
By authority of the Lighthouse Board.
M F BONZANO, Acting Lighthouse Engineer.

Bark Laboramus, at St John, NB, from Providence, reports having been ashore on the 14th inst, on Wood Island, having mistook Sunset Rock Light for Brier Island Light—a bright fixed light having been shown on the former instead of a revolving, as on the chart. She lost her keel and rudder, but appears to have got off without further damage, the captain calls the attention of the Commissioners of Lights to the subject.
