Prodigious Buoyancy of the Stock Market.

MONEY STEADY AT 7.

All Classes of Securities Advancing.

WALL STREET, MONDAY, Oct. 6—6 P. M.

Dealings in Erie to-day were pushed to an extraordinary extent and completely dwarfed the rest of the market. While no stocks were lower, but most of them higher, the general list was inclined to stop and take breath while the battle of the Titans was going on. Reference is, of course, had to Vanderbilt and Jay Gould. Unless the speculators of the street are to be picked up for greater fools than they look to be the unanimous opinion obtains that the rise in the stock is referable to the efforts of the aforesaid for the control of the road. Without disrespect to either party it appears to be a matter of "pull Dick, pull Devil," with a good deal of doubt as to the winner. In popular athletic parlance there exists a "tug of war" between the above named—Mr. Vanderbilt being at one end of the rope and Mr. Gould at the other—and nothing decisive will be known until the rope breaks and one champion or the other comes to grief. From the well known staying qualities of each contestant this result is not to be looked for immediately, but that the struggle will continue and the price of the stock advance so long as it lasts. In the Board room at the close quotations were made as high as 40⅞, and afterward, in a quiet way, they were advanced to 41¼ in the street. There were stories of there having been transfers of over 200,000 shares to Vanderbilt and his representatives, but from good authority we are inclined to doubt them. Mr. Vanderbilt has not been remarkable for giving much away under any circumstances, and he is not likely to give himself away, as would be the case were the above reports correct. Nevertheless the strength of Erie was the strength of the market. If there was any inclination in any stock to decline the sympathetic "boost" of Erie prevented it. Consequently the list was firm throughout, and the worst to be said of it is that wherever there was no gain there was at least no loss. Higher prices were made for Wabash, the Hannibal and St. Jo's and some of the Western roads, due, so far as it could be seen, to the expectation of Jay Gould's return to-morrow or next day, to a fair degree of steadiness in the coal carriers (in hopes of a combination, which, being deferred by Mr. Packer's recalcitrancy, is "making the heart sick" of the high priced buyers) and to an undoubted firmness for all other classes of securities which grow bright or dull under the reflected light of the rest of the market. Considerable attention was directed to-day to the revival of animation in the Mining Board. There was a fresh start in everything, with Gold Placer the "Blower Brown" of speculation. From a state of quiescence the dealings in Gold Placer suddenly rose to the phenomenal extent of something over 80,000 shares. The movement was directly traceable to members of high position upon the Stock Exchange, and on inquiry we learn that it is based upon a favorable turn in the affairs of the company. It appears that all matters in dispute as to the "title" of lands claimed have been satisfactorily settled, and that the mining work will go on without hindrance. There is no debt, and the "panning out" estimates promise a yield of from 25 cents to $1 50 per cubic yard. Furthermore, it is proposed to reduce the capital stock from $5,000,000 to $600,000, upon which sum it is expected that dividends can be paid without difficulty. There is a chance that Reading will be put upon the Board list again. It will be remembered that the refusal of the company to consent to registration in New York caused the stock to be stricken from the list some years ago. They are apparently thinking better of it now, and it is said will comply with the rule if readmitted to the list. There is still a complaint of the delay in Erie transfers, the consequence of which results in much growling upon the part of stockholders.

Sales at the board reached the astonishing number of 494,502 shares, Erie alone being dealt in to the extent of nearly 200,000 shares. Following is a synopsis of the day's business:—

In the money market the ruling rate for call loans upon stock collateral was 7 per cent throughout. Good paper was discounted at 5 to 6½ per cent, which was also the range for time loans. At the Sub-Treasury the day's business was:—

Receipts.....	$2,703,223 54
Payments.....	3,676,019 38
Balance coin.....	141,260,418 25

Receipts at Washington from internal revenue to-day were $677,093 81, and from customs $561,038 95.

The cable reports continued heavy shipments of gold to the United States. The French steamer Labrador left Havre on Saturday for New York with 15,000,000f. The steamship City of Berlin, which arrived here Saturday evening, brought $350,000 gold coin. Imports for the past week were $4,546,577.

The Assistant Treasurer at Chicago has informed the Treasurer that as soon as their transactions with the Sub-Treasury will permit the banks of that city intend to increase their gold reserve by $2,000,000.

Government bonds in this market were very active and prices advanced a fraction. They closed strong, at the following quotations:—

Prominent coal operators are despondent regarding the formation of a combination. It was stated this afternoon in despatches from Philadelphia that Mr. Packer had decided not to sign. What authority the parties had for the statement could not be ascertained.
