COTTONSEED OIL.—The market was inactive aside from a fair trade in the August position, and price changes were narrow, closing net unchanged to 2 points higher. There is a comparatively small interest in the market at present, but while stocks are considered light, underlying sentiment seems to lean to the bear side. Crude oil was easier, although offers were not large.

SUGAR FUTURES.—Trading in sugar futures was inactive, while it was a holiday in raw and refined sugar. First bids showed advances of 2 to 3 points and trading throughout the morning was more or less unsettled, due to quiet conditions prevailing in refined sugar at Friday's close. The exchange closed net unchanged to an advance of 2 points, with sales for the day 3,100 tons. A more active market is looked for this week, as it is expected that the demand for granulated will show considerable improvement, due to the rising temperatures.

CUSTOMS DECISIONS.

POWDERED TALC—The Board of United States General Appraisers holds in a decision rendered yesterday that powdered talc, perfumed, imported by Lamont, Corliss & Co., Park & Tilford and Rogers & Gallet was properly assessed for duty by the customs collector at the rate of 60 per cent ad valorem as a toilet preparation under the provisions of paragraph 48, tariff act of 1913. The protestants claimed classification under paragraph 470 with duty at only 15 per cent ad valorem.

BRITISH GUM—Innis, Speiden & Co. won before the General Appraisers in a controversy involving the dutiable classification of British gum. The appraiser classified this merchandise as dextrine, derived from potato starch, and duty was collected at one and one-quarter cents a pound under paragraph 36 of the tariff act of 1913. The importers claimed that duty should have been levied at three-quarters of one cent a pound under the last clause of the same paragraph. The only witness called for the importer, a woman in charge of the particular department of the firm which handles this and kindred kinds of merchandise, said that the merchandise at issue was not dextrine, but an article known as "leiogomme," similar to British gum except as to color and which is bought and sold as British gum. The board reached the conclusion that the Collector's classification was erroneous, thereby fixing duty at the lower rate.

DUTY ON CASES—The board finds that Paragraph 8 of Section III, act of 1913, provides for the assessment of duty on the containers of all ad valorem merchandise, but it does not contemplate the assessment of duty at the value of the contents per pound, yard or unit of any kind that the merchandise is found to be worth, but upon the actual value of the cartons, packages, &c. It is further held that the collector should ascertain the total value of the merchandise as stated by the appraiser, add to that value the gross weight of the cartons, cases, &c. and upon the amount thus ascertained, assess duty at the rate provided by law. This decision covers a protest filed by Suarez & Whitney against the assessment of duty on certain balsam of copaiba upon the unit value as found by the appraiser, and the gross weight as returned by the United States weigher. No evidence was made by the importer against the classification of the commodity or the basis of valuation by the appraiser, but it was claimed that the collector assessed duty upon the weight of the boxes, cartons, cans, &c. containing the commodity, at the value provided for balsam of copaiba in paragraph 9, act of 1913. The weigher found 12,720 pounds to be the gross weight of the 135 boxes which constituted the importation. Upon this gross weight duty was assessed at 10 per cent ad valorem under paragraph 9, upon the value as stated by the appraiser. Under paragraph 8 writes Judge Hay, "the coverings are made dutiable at the same rate as their contents, but their value is not necessarily the same.

"The value of the cartons, cases, crates, sacks, &c., may be more or it may be less than the value of the commodity they contain. The testimony and the weigher's return show that the United States weigher found the outside wooden boxes or cases to weigh 1,665 pounds, and an employee of the importer testified that the weight of all of the inside containers (for emptying out the balsam) was 800 pounds. To ascertain the net weight, therefore, of the balsam of copaiba, 1,665 pounds and 800 pounds, making a total of 2,474 pounds, should be deducted from the gross weight of the cases, which found to be the weigher. Thus it will be seen that there were 10,246 pounds of balsam imported. The collector should ascertain the total value of this balsam as stated by the appraiser and to that total value add the value of the cans and outside packages, and upon the amount thus obtained assess duty at 10 per cent ad valorem, under paragraph 9. The protest is therefore sustained and the collector directed to reliquidate the entry in accordance herewith."

JELLY—No advance is made on the foreign market value of certain jelly imported from Cross & Blackwell of London in a reappraisement ruling by General Appraiser Hay. This decision reads: "Pints, cognac, sherry, port and champagne, entered at 14/3 per dozen. Add casks and jars "Discount 2½ per cent No advance." This jelly was exported from London on February 29 and entered here on March 24, 1916.

MANUFACTURE OF FLAX—The foreign market value of certain brown paddings imported at New Haven, Conn., from Magee, Sayles & Co. of Belfast, Ireland, is advanced in another decision by Judge Hay. As to this merchandise the General Appraiser writes: "24 inch brown paddings 4/246 Argyle, 73 threads, entered at 6, advanced to 7d. per yard. Less 2½ per cent. Add bale."
