COTTON MARKET.

From a bull standpoint the cotton market was disappointing yesterday, its actions clearly reflecting a disposition by most traders to regard the recent unfavorable crop news as exaggerated, particularly in the eastern part of the belt. After opening steady, with prices 1 point lower to 2 points higher, the market worked up 3 to 4 points above the previous night on further buying by spot houses, chiefly October, but met free selling on all hard spots, and in the early afternoon became distinctly unsettled, with a decline of from 9 to 12 points under Tuesday's close.

Although the weekly weather report admitted fewer favorable conditions in the Central and Eastern States, it was far from being as sensational as bulls had been expecting, while its reference to the Texas and Oklahoma crops was as favorable as to fully offset any shortcomings in other sections. It referred also to less activity of the boll weevil in Texas.

Among many conservative people here it was the opinion that at least three-quarters of the belt is experiencing favorable conditions, and that of the remainder such territory is in small producing sections. Wall Street added its short lines yesterday and was backed up by room traders, who sold considerable cotton in the afternoon.

The absence of buying orders from sections of the South where the country has been flooded was still a puzzle to bull traders, but they were somewhat appeased over the fact that at least the South was not selling heavily.

The Liverpool market showed little feature, being rather heavy at one time under poor trade demand and an absence of speculation, but it closed 2 points net advance of 3 to 4 points, with a steady undertone. Part of the early spot house buying was understood to be for Liverpool contract account, in view of the April market and some of it against sales of New York March at about 40 points differences. The heaviest selling occurred near the close when some of the Wall Street interests, which forced prices up to 16 points under Tuesday's final, the close being bottom for the day. The reports of a cloudburst at Atlanta appeared to have no effect on sentiment.

Texas advices were conflicting, some reporting high temperatures and an under sized plant, while others said that prospects were simply too good to be true. Exports for the day aggregated 10,857 bales, making 5,800,851 for the season, against 8,250,106 last year. Southern spot markets aside from declines of 5 points at Galveston and 10 points at Houston, were unchanged.

GRAIN MARKET.

WHEAT—The market was only moderately active and the undertone was nervous owing to conflicting reports on the rust situation. Values fluctuated widely, closing with net losses of 1¼c. to 1¾c. Reports of cooler weather in Canada and prospects of lower temperatures in the American spring wheat belt were largely responsible for some of the selling pressure. The weekly Price Current report and the weekly "Weather and Crop Bulletin" both spoke favorably of the progress of the spring wheat in Canada.

Offers of new winter wheat were again somewhat more liberal and the demand was only moderate. Exporters were credited with taking about 100,000 bushels but with a moderate quantity of this was American winter wheat, the greater part was Manitoba. The news from abroad was of rather more bullish nature regarding future requirements. Bromhall estimated that the weekly requirements would probably be about 11½ million bushels during the duration of the war and that America should have to furnish about 6 million, while in the case of peace the requirements would probably be 16 million bushels weekly, of which Russia would be able to furnish a considerable quantity.

In the local cash market No. 1 durum was quoted at $1.21½, No. 2 hard, $1.22½, No. 1 northern Duluth, $1.31½, No. 1 northern Manitoba, $1.30, all f. o. b. New York.

CORN—The market was easier under active selling, especially of the new crop positions owing to reports of scattered showers and cooler weather over the West and predictions of a further fall in temperatures. The July position showed resistance to pressure and closed ½c. higher, but the other months were 1c. to ½c. net lower. The Southwestern markets were all lower and while receipt sales were estimated at about 95,000 bushels, the demand was not aggressive. The weekly "Weather and Crop Bulletin" indicated favorable progress over the greater portion of the belt. In the local cash market No. 2 yellow was quoted at 91 cents c. i. f. New York.

OATS—The cooler weather had a bearish influence and prices closed very easy, with net losses of ½c. to ¾c. Harvesting operations are now progressing and there was some disposition to anticipate hedging pressure. The local cash market was easier, standard quoted at 47½@47¾c. No. 3 white, 44¾@45¾c. No. 4 white, 45½@46½c.; fancy clipped white, 47½@48½c.; ordinary clipped white, 45½@47½c. all elevator.

RYE—Market quiet; No. 2 Western, $1.07 c. i. f. New York.

BARLEY—Market quiet; feeding, 75c. and malting, 80c. c. i. f. New York.

HAY—Market barely steady; prime, $1.35. No. 1, $1.30@1.32½. No. 2, $1.10@1.20. No. 3, 90@97½c. shipping, 75@95c.

COTTONSEED OIL—Market again weak and lower under a continuation of Tuesday's liquidating movement. At one time values showed losses of 18 to 20 points from the previous close. There were tenders of 1,000 barrels on July contracts and the spot situation was apparently weak, with little or no demand. On the decline there was quite active covering and the market late developed a steadier tone, at least for the late positions. Final quotations were 20 points net lower for July and 11 lower to 1 higher for the other months. It was the general impression that the weakness of the last few days was due to an overbought market and liquidation due to poor consumptive demand, as well as weakness in competing fats and in glycerine.

SUGAR FUTURES—After opening 3 points lower to 3 points higher, with sales on the call of 1,750 tons, the market became more active, and on covering and bull support prices showed early net gains. The late strength resulted from refiners showing a willingness to enter the market for raw sugar at last paid prices, but with holders not pressing sugar for sale. Futures closed firm at a net advance of 4 to 11 points, with sales of 16,300 tons.

SUGAR—Raw—Sales of afloat Cubas advanced the price 2 2-32c. for Cuban centrifugals. Refiners appeared to be willing to make purchases at around this level. Local interests took 21,000 bags Cubas afloat at 5¼c. cost and freight and showed a further buying interest at that level, but refiners were asking fractionally higher prices and did not appear to be pressing sugar for sale. Centrifugals, 6.27c. molasses, 5.50c. and cost and freight 5¼c.

COFFEE MARKET.

Continued strength in Brazil again had a stimulating influence on values in the local coffee market, and while the volume of business was not large there was little pressure to sell and final quotations were 3 to 6 points higher. Cost and freight offers from Santos were firmer and in some cases higher, with 3s quoted at 11.95c. and 4s at 10.65 to 11c.; while Rio 7s were here at 9.75c. at London credits. Some moderate sales were said to have been made late Tuesday on the basis of 10.65c. for Santos 4s, but Brazilian shippers were not disposed to accept lower offers. It was generally felt that there is probably a better demand for coffee in Brazil than appears on the surface and that apparently Brazilian merchants are selling their coffee at higher prices than were thought possible, although shipments continue light.

The local spot market was quiet, but prices remained steady, with Rio 7s quoted at 9¾c. and Santos 4s at 10½c.
