FINANCIAL NEWS AND COMMENT

Prospects Based on Increased Earnings Are Used to Boost Some Stocks.

TRADING IS IRREGULAR

U. S. Steel Reflects Diverse Opinions on To-day's Quarterly Statement.

High costs to the consumers of various products continue to find reflection in the stock market. Perhaps many stocks have fully discounted the big profits corporations are making on the substantial margin between the cost of production and the price the buyer pays, but few days, however, go by when some stock or group of stocks is not taken in hand and pushed to higher levels on the basis of increased earnings and the expectation of those earnings bringing declaration of bigger dividends or the establishment of non-dividend payers in the interest column. It was so in yesterday's active but irregular trading in the Stock Exchange.

International Paper shares, International Agricultural Corporation and the zinc issues were singled out as promising candidates for higher prices, and Virginia - Carolina Chemical also, although to a smaller extent. Paper common advanced more than 7 points and the preferred more than 3 points, while Agricultural Chemical moved up 6½ for the common and 6 for the preferred. Both companies are adding to their earnings and have something to sell for which there is a big demand, while the position of the stockholders has been materially strengthened. And the same thing may be said of the American Zinc Company, the stock of which gained more than 5 points.

The general market was one of quick changes and decidedly mixed movements, with a period of rather pronounced weakness following the report that a British ship with Americans on board had been sunk by a German submarine. There was much profit taking and cautious selling for short account. In the minds of many traders there appeared to be a sufficient number of uncertainties in the situation to warrant a position on the bear side, particularly in view of the steady advance of last week and the general belief that commission houses are well provided with overextended bull accounts.

Selling on the sinking of the British vessel promised to run into substantial volume, but it was soon checked by a further report that the ship had been fired upon after refusing to heed the warning to stop. The mere suggestion, however, that it might be another cause for trouble with Germany sent a chill down Wall Street's spine and accentuated the idea held in many quarters that the stock market is in an excellent position for a sharp drop in the event of real adverse developments, as, for instance, the reelection of President Wilson. But on that score the Street is not worried, if the amount of Hughes money offering in the financial district may be taken as a criterion.

Further remarkable statements from the copper trade were effective in attracting increased interest in the copper shares, but the weight of realizing in them prevented final price improvement. And it was the same with United States Steel, which closed more than a point under its early high. Regarding the meeting of the corporation's directors to-day, the Street suddenly discovered that the statement of net earnings might show for the last quarter but the paltry sum of $85,000,000, as against the record breaking total of $81,000,000 in the preceding three month period. Bear traders had the idea that anything less than $90,000,000 would be ample argument for knocking Steel common.

Wheat rose to a new high record above the Leiter corner price of 1888, and on the movement some heavy profits were taken for the account of traders who recently bought the cereal on the strength of big profits made in stocks. In some quarters wheat is still being bought on the assumption that all of the surplus from last year's crop has been taken for export and that there is no such thing as hidden supplies, but in other quarters it is not admitted that such is the case.

Money was easy throughout the day, and quite naturally so with last week's further substantial addition to surplus reserves of the Clearing House banks and the $15,000,000 gold that came in Saturday and $5,000,000 yesterday, with the promise of additional receipts from abroad, despite the idea put forth by bankers that the gold movement would be checked by the latest British loan. Sterling rates were unchanged, but both lire and rouble exchange was weak.

Customs Receipts $547,665.65.

The total receipts for duties at the Custom House yesterday were $547,665.65, of which $214,124.71 was for merchandise withdrawn from bonded warehouses and $333,540.94 for recent importations.
