FINANCIAL NEWS AND COMMENT

Speculative Demands Dominate Wide and Advancing but Orderly Market.

SALES 2,000,000 SHARES

Heavy Gains in Industrials, With Gulf States Steel Up Over 30 Points.

Whether or not the recent advances in the prices of many industrial stocks have been due to manipulation by speculative pools and syndicates and whether or not the investment demand for the industrial stocks has followed the market up, there was no question whatever yesterday that the speculative demands for stocks were sufficient for the time being to overpower all other influences and to relegate to the background all other considerations.

Sales on the Stock Exchange exceeded 2,000,000 shares, this turnover being the largest for the week, and comparing closely with the two big days of last week. The advances, though tumultuous, covered a wider range of stocks than on the two big days of last week, and on the whole the market was more orderly than on most days of late. There were, of course, wide fluctuations, but from the beginning to the end of the session there was in evidence a steady buying power that would not be gainsaid.

The railroad shares took a modest part in the upward movement. Attention was directed particularly to Chesapeake and Ohio, which scored a net gain of one and a half points in anticipation of that resumption of dividend payments which was made after the close of the market.

It was rumored that American securities in amount running into many millions had been brought over by the Deutschland and were ready for sale on the New York market. The rumor naturally selected as stocks most likely to have come Baltimore and Ohio and Canadian Pacific, which are the only stocks on the New York board which are also listed on the Berlin Boerse. But these shares advanced on the day, and it was learned authoritatively that the amount of securities on the German submarine was negligible marketwise and that these few had undoubtedly been sold long in advance of the sailing of the boat.

The speculative imagination was stimulated by Gulf States Steel, a comparatively new industrial, which at one time showed a gain on the day of 34 points for the common and 33 points for the second preferred. There was a net gain of 7⅝ points in Lackawanna Steel. New York Air Brake at one time showed a gain of 10⅞ points. Nova Scotia Steel, a novelty, was up 7¼ points at its high price of the day.

Gross gains of two to five points in the industrials were too numerous for comment. With such impulsive upward movements as these whatever words of caution were uttered by brokers fell on deaf ears. There was no staying the craze for industrial shares.

The money market continued easy. The flurry accompanying the sweetening of loans in the early part of the week had subsided entirely. The big banks loaning on Stock Exchange collateral were entirely content with the contents of the loans envelopes. Brokers knew that their accommodations at the banks were secure. Traders felt that there was no likelihood of further calls for margins in the near future.

Reports of earnings were good. Three increases in dividends pointed to a realization of previously confident expectations. Rumors of further large earnings and increases in dividends were rife in every quarter of Wall Street, and were believed by the great majority of speculators.
