FINANCIAL NEWS AND COMMENT

Stock Market Closes Its Biggest Year With Trend of Prices Upward.

PUBLIC IS ABSENT AGAIN

Exchange to Reopen After 3 Day Rest With Brightest of Prospects.

The biggest year in more ways than one in the Stock Exchange ended yesterday with prices moving in the direction of higher levels in the greater number of issues. The upward movement, however, was not an all day affair, as in the early part of the session there was rather pronounced weakness throughout the list, the change in the course of market values in the afternoon being based chiefly upon covering by the shorts, who were not disposed to go home over the triple holiday with contracts outstanding.

To a great extent it was a traders' speculation. The public was not much in evidence in the dealings, although on the morning decline buying was reported in various prominent issues by houses which boast of a strong outside following. And there was some good buying also for the account of investors, while sentiment in investment houses was unusually optimistic regarding the outlook for an extension of this kind of purchases in the new year, particularly in grade railroad securities, both stocks and bonds.

The steel shares, coppers and the oil issues were especially active and strong in the final trading. United States Steel, for instance, selling almost 3 points above its low of the day, while Mexican Petroleum moved up more than 4 points and Texas Company more than 13 points. Although there was no particular news affecting the issues named, or the market at large, bear traders apparently had in mind the possibility of favorable developments over the holiday, while at the same time the closing out of a substantial amount of long stock appeared to be based on the opposite argument that various uncertainties in the situation might develop into actual adverse factors before the opening of the exchange on Tuesday.

Wall Street talk in the day was of the future rather than of the past. Retrospects were popular, despite the fact that the year had been, as a whole, the most profitable in the history of the financial district, with the commission houses making more money than ever before recorded, and the powerful banking groups closing their books with fabulous results that a few years ago would have been considered impossible.

Of the future the Street would not commit itself to any theory that involved a year of backward movements. Gossip tended toward the idea that the great liquidation of recent weeks had left the stock market free again to take the upward course because of the expectation that the country's business would continue on the up grade and because of the growing belief in the financial community that even if peace should come in 1917 a great period of upbuilding in all nations would follow.

Money was easy throughout the day, while there was no important movement in foreign exchange, although rates on Paris were somewhat firmer. According to the known movement of money in the week the local Clearing House banks have gained about $9,000,000 in cash, the relatively small figures in the face of huge gold imports being due to the drain through the Federal Reserve Bank into the interior. The return to the banks of Christmas money and the financing incident to the preparations for the January disbursements both may be factors in to-day's weekly bank statement.
