FINANCIAL NEWS AND COMMENT

Stocks Strong and Active, With Indications of Higher Level of Prices.

STEEL GAINS TWO POINTS

Senate's Action on Cloture and Reserve Board's Attitude Cause Optimism.

An interpretation by careful market observers of yesterday's course of prices in the Stock Exchange suggested that substantial interests were decidedly in favor of higher levels. Indeed, it was stated in various important circles that an upward movement at this particular time was in the minds of bankers who either have under way or who expect soon to have under way financial operations the success of which would be dependent to a certain extent upon an active buying movement in the market both for stocks and bonds, especially the latter. Higher prices are justified by underlying conditions, and an expansion in speculative activity is warranted on the basis of the technical position of the market and the earning power of corporations.

The public, which showed little interest in the operations on Thursday, was more in evidence, especially in the steel and copper shares, most of which made noteworthy progress in the direction of better quotations. United States Steel, for instance, closing at a net advance of more than two points.

Commission houses reported a better demand, a reflection of which was presented in the total of business, which was more than 225,000 shares in excess of the dealings of the preceding day, with a large proportion of the increase being provided by United States Steel, Inspiration Copper, Crucible Steel, American Smelting and Anaconda. In the stocks named prices, although well above the low points touched in February, are still well under the top levels which were recorded early in December. And in these issues as well as many other stocks the earning power behind them has increased appreciably since the closing month of 1916.

No one knows, of course, to what extent the present advance will run, but it is worth recording that the Wall Street district appears to be more bullish at the moment than at any other time in recent weeks, and that decided efforts are being made by the various Wall Street houses to encourage investment buying of all the high grade securities, including the railway shares, which in most cases may be had at prices which do not fully measure the investment value of the issues. This difference between market value and investment value in the railroad group appeared to carry more weight yesterday, especially in Atchison, Canadian Pacific, Lehigh Valley, Reading and Union Pacific.

Speculative sentiment naturally was favorably influenced by the Senate's enactment of the cloture rule and by the Federal Reserve Board's announcement that it was not opposed to the investment of funds in foreign government loans negotiated in the local market. The Federal Reserve Board in a statement issued last fall took a rather pessimistic view of foreign loans as a desirable channel for the investment of American money, and its present attitude regarding such investments doubtless will become an important factor in attracting attention not only to the foreign government bonds which are quoted here, but to investment securities in general. The foreign governments were strong features in the bond market.

Reports received from various trade centres were extremely encouraging, while discussion regarding the outlook for this country entering the European war suggested no uneasiness in any circle over the international situation, while it in no way provided reason for the ideas held by only a few pessimistic individuals that the position of our industries would be weakened or the value of our securities depreciated in the event of actual hostilities.

Money market conditions remained unchanged. In the foreign exchange market little business was transacted and few variations in rates were recorded. According to the known movement of money in the week the local banks have lost upward of $13,000,000 in cash, due in great part to operations between the banks and the Federal reserve institution. There was a slight loss on the interior movement.

METAL MARKET.

Sales for third quarter copper have been made by several of leading interests at 32c., while smaller dealers have obtained 31½c. Quotations remain about unchanged, prices of 33c. for July, 32½c. for August and 32c. for September still being quoted by one large selling agency, while others are quoting ½c. under these figures, and still others 1c. under. Prevailing level for fourth quarter copper is understood to be from 30½ to 31½c. a pound. March copper ranges from 38 to 39c., according to time of delivery; April at about 35½c., May at 34¾c., and June at 34¼c. Tone of market is strong. Exports of copper from Atlantic ports for week ended March 8 totalled 7,567 tons; since March 1, 9,482 tons, against 5,333 a year ago.
