PUBLIC UTILITIES PRICES IRREGULAR

Pacific Gas and Electric Sells Off About a Point Under Pressure.

CITIES SERVICE IS STRONG

British Mobilization List Increased by Addition of 17 American Issues.

Trading in the public utility market yesterday was spasmodic, with prices generally irregular. At the opening a tendency to follow the lead of the big board was shown and the market was almost at a standstill due to apprehension of political developments in Washington. Increased activity resulted later in a few favorites, but no definite sentiment was indicated at the close, as some issues were up and others off.

Pacific Gas and Electric was fairly active and under pressure sold off about a point, closing at 64¾-65¼. The decline was due to professional operations. Republic Railway and Light common also lost a point, closing at 37¼-38½.

Cities Service and American Light and Traction were strong, with the latter closing a point higher at 363. Cities Service common advanced from 293 to 295, and closed with bids at the latter figure. The preferred stock was off fractionally in the earlier trading on a small volume of business, but later developed strength on a fair turnover.

WAR PROSPECTS PUT CURB MUNITIONS UP

Central Foundry Is Strong on Large Earnings—Rally in Motor Stocks.

Trading in the outside market was on a comparatively small scale yesterday and price movements mostly were narrow. The lower priced munition shares were features in the final dealings, on expectation of war and increased orders.

Aetna shares were prominent, the stock crossing 5 at a gain of more than 2 points, while the certificates of deposit rose above 4, an increase of a point. Maxim Munitions was firm, although it moved within a narrow range. Marlin Arms came into prominence with an advance of about six points on fairly heavy dealings.

Motor stocks rallied after early weakness before the close and sold above the opening quotations. Independent oil shares were dull, with the general trend upward. Central Foundry common stock was strong on big earnings, crossing 30, while the preferred recorded only a fractional gain.

Bonds were active and generally higher. Canadian Government 5s were traded in for the first time, but there were few dealings. Sales and quotations:
