CROP ESTIMATES UP; WHEAT PRICES DOWN

Yield Is Put at 685,000,000 Bushels, 30,000,000 Above Government Figures.

CHICAGO, June 15.—Estimates that the total domestic production of wheat for 1917 would be nearly 30,000,000 bushels in excess of the Government June figures did much to-day to bring about declines in the wheat market. Quotations closed steady two to four cents net lower, with July at $2.23, and September at $1.98. Corn gained ¾c. to 2¼c., and oats ½c. to 1¾c. Provisions were unchanged to 5c. lower.

Opinions that the wheat crop would be considerably larger than the Government report became much more pronounced after the issuance of a definite statement by a leading authority that the outlook was for 685,000,000 bushels, against 656,000,000 bushels suggested by the Government. Advices from other usually trustworthy sources were that the winter crop especially had progressed of late under highly favorable conditions and that the quality was good.

Cold weather had a bullish effect on corn. A subsequent rise in temperature acted only in part as an offset. Gossip was that the condition of the crop was equal to a ten year average and that the July Government report would show a prospect of the largest yield on record.

Signs of export demand helped to lift oats. On the other hand, crop reports were excellent and a big increase of acreage was officially announced in Canada. Strength of hogs and corn upheld provisions.

WHEAT—Cash markets in winter wheat country eased, but prices firmly held in Northwest, with light offers. Mills said to be having difficulty in getting grain to grind, as stocks of domestic wheat appear to be practically exhausted in that section, and while there is plenty of wheat in Canada it is apparently owned by exporters, who refuse to sell. A report that Bonar Law had said in the House of Commons in London that it was found impracticable to confer with the Allies to arrange for international prohibition of future trading was construed here as pointing to a possibility of less stringent trading regulations, which would permit of a broader market for the new crop.

CORN—Receipts at primary points so far this week have exceeded last year by over 2,500,000 bushels. Local cash market: No. 2 yellow quoted at $1.83¼ c. i. f. New York.

OATS—Exporters said to have taken 300,000 bushels. Local cash market firm; standard quoted at 74½@75c.; No. 3 white, 73½c.; No. 3 white, 74@74½c.; No. 4 white, 73½@74c.; fancy clipped white, 76@77c.; ordinary clipped white, 74@75½c., all elevator.

RYE—Steady. No. 2 Western, $2.23 c. i. f. New York.

BARLEY—Quiet. Feeding, $1.42, and malting, $1.39@1.70 f. o. b. New York.

Wheat, including flour, exports for the week, according to *Bradstreet's*, 8,590,333, against 8,447,392 previous week and 11,086,508 last year; since July 1, 338,677,846, against 432,561,111. Corn exports, 691,618, against 605,952 last week and 741,770 last year; since July 1, 22,317,480 against 27,[illegible] 981,213 last season.

Business Brevities.

Marshall Field & Co.'s Report.

CHICAGO, June 15.—Marshall Field & Co. in their weekly review of the dry goods trade say: "Wholesale distribution of dry goods for the current week has been in larger volume than for the corresponding period of 1916. Road sales for immediate shipment are slightly behind those of a year ago, but are considerably in excess for future delivery. Customers have been in the market in fewer numbers. Collections are normal. Prices are firm."

West Rules Wool Market.

BOSTON, June 15.—The *Commercial Bulletin* will say to-morrow: "Business in the Boston wool market has been less active during the past week. The market, however, is very strong and appears to be dictated more by the West than the East. Operations in the West are going forward steadily at slightly higher prices. Manufacturers are generally well employed and are devoting more and more time to Government contracts."

Demand for Silk Braid.

Manufacturers are receiving many inquiries for silk braids of all widths, but preferably either medium or narrow. The demand for simple trimmings is steadily increasing and braid novelties loom up as about the only substitute for fur and leather that will give the desired effect. A large yardage is expected to be used by cloak, suit and dress makers for the coming season. In colors the principal call is for black and dark greens and blues. Black is by far the most wanted.

Summer Suit Production Easier.

The difficulties that have confronted manufacturers of men's hot weather garments during the last few months owing to a shortage of needed fabrics have shown a tendency to diminish. The situation presents a somewhat brighter aspect. Unfavorable weather has had the effect of curtailing requests for quick deliveries, but enough goods have been shipped to enable retailers to make a fair showing.

Cotton Goods Market Unsettled.

In its review of the week in textiles and allied lines the *Dry Goods Economist* to-day will say: "The sensational advance of raw cotton to a point considerably above 25 cents a pound has created unprecedented conditions among mills and their selling agents. Local commission houses have been instructed by the plants they represent to withdraw all goods from sale. No prices are as yet being made on goods for forward shipment and only on stock goods do requests for quotations bring any definite figures. The new price trend is shown, however, in the advance of printcloth convertibles in Fall River to the extent of from 5 to 10 per cent. in addition to the 13 per cent. advance which has occurred since June 1. On Wednesday of this week spot cotton of the middling upland grade sold in New York for 25.55 cents. The grades used in the manufacture of fine fabrics are, of course, still higher. The advance is also reflected in the prices of Egyptian cotton, which is now used so largely in the manufacture of spool cotton as well as for the fabric used in automobile tires."

Wool Fabric Prices Climbing.

Raw wool prices are still soaring. A large Western worsted manufacturing concern has advised its customers to anticipate their wants, as prices are absolutely certain to reach unheard of levels before the end of the month. The news of the British Government having released 16,000,000 pounds of Australian wool for this country aroused great interest, but it is asserted in the local market that much of this wool is of grade 3, the so-called carpet wool, and is therefore suitable chiefly for low-grade woollen fabrics and blankets and not for dress goods. Many leading wool and worsted dress goods mills have discontinued acceptance of orders, selling only from stock. And so far as can be learned only two manufacturers have decided on the prices they will ask when the wholesale buyers arrive about the middle of next month. This attitude was graphically described by a commission house man, who said, "The minute a man buys anything and the order is sent in, the mill phones the New York office to stop selling." Buyers, as a rule, would gladly place orders for next spring at to-day's prices if permitted.

The Millinery Situation.

"From a well established source it is learned that the demand for Milan hats will last all through the next six weeks if the supply holds out," says the *Daily Style Letter Service*. "The present indifference for velvets on the public's part is an assurance, developing generally, that the wearing of velvet and all other merchandise is gradually returning to their proper seasons. Except for the last few velvet tams and velvet crowns on straw hats this material remains almost invisible. The possibilities for pasted feather hats for late summer wear are encouraging and many manufacturers are also making pasted hats combined with velvet that can be worn into the fall."

Gray Cloths Still Dull.

Aside from some inquiries for sheetings and drills for Government requirements there was little or no activity in the New York market for goods in the gray yesterday. Both buyers and sellers appeared to be marking time. Staple construction printcloths were firmly held at the following levels:

Width.	Cons.	Weight.	Cents.
