FINANCIAL NEWS AND COMMENT

Liberty Loan's Big Success Is a Factor in Stock Market's Improvement.

SESSION FINISHES STRONG

Saxon Motor Unusually Weak —Reserve Bank's Strength Being Realized.

Active covering of short contracts and vigorous buying in many issues by substantial Wall Street interests were effective in carrying the greater number of prominent stocks to material net improvement in yesterday's brief session of the Stock Exchange. The final figures on the overwhelming success of the Liberty Loan naturally was a helpful factor for the advocates of higher prices, while evidence of a resumption by Russia of its war activities on a heavier scale than had been reported in many weeks likewise served to swing stock market sentiment in favor of the buying side. And the determination of the Treasury Department to handle the payments to the Government financing on the basis of returning so soon as possible the money involved to the channels of trade suggested the speedy elimination of the tension in the money market.

National banks have received notice from the Secretary of the Treasury informing them that they may use the Liberty bonds as security for Government deposits, but that to accelerate relief to the money market the receipts for the bonds are to be held in trust or in escrow by the banks. Government deposits now held by the Clearing House banks total $128,067,000, an increase of more than $62,000,000 since the early part of May. In the course of the next few weeks these deposits will be substantially increased.

Notwithstanding large readjustments in the week incident to government transactions with the banks the result of all changes in the weekly bank statement was not important, excess reserve decreasing $12,223,520 to $41,827,230, which was the low record for the year and only a trifle better than the lowest recorded since the inauguration of the new banking system. Doubtless improvement from now on will be recorded, but even if there are further losses in holdings it merely will represent increased strength for the Feedral Reserve Bank, which now may be called the mother institution of all the banks.

In the last week the Federal Reserve Bank increased its gold holdings from $344,620,291 to $517,357,742, and its reserve from $263,253,855 to $545,745,510. And its total resources increased from $499,966,142 to $792,254,045. That's a showing well worth studying.

Loans of the Clearing House banks decreased more than $54,800,000 and cash a little more than $40,000,000, with a contraction in net demand deposits of $157,863,000. The greater part of the cash loss was in gold. Of the $83,000,000 gold received from Canada in the week the bulk went to the Federal Reserve Bank.

Last hour prices in the Stock Exchange exhibited especial strength, with the steel and equipment shares leading. United States Steel common, for instance, closing more than 2 points up, while Baldwin Locomotive gained more than 6 points. Extreme weakness in Saxon Motor for reasons with a bearing upon that company alone attracted attention only because its low price represented a fall of 80 points from the record high for the issue when remarkably bullish statements were put out regarding the position of the property.

London and Paris Markets Closed.

NEW YORK, June 23.—The London Stock Exchange, Liverpool Cotton Exchange and Paris Bourse were closed today. Money here 4@4½ per cent; discount rates, short and three month bills, 4½ per cent; gold premium at Lisbon, 36.00.

CURB STRONG, WITH TRADING LIMITED

Price Fluctuations Are Few—Russian Governments Lead Bonds Upward.

Strength again characterized the curb market yesterday. Price fluctuations in most cases were limited to fractions, with trading on a small scale. Specialties were again favorites and featured the market, with decided strength in Air Reduction and the Central Foundry issues. Cities Service common was firm, selling to Friday's opening level.

War shares were firm, especially Submarine Boat, which advanced more than a point, although it subsequently reacted. Motor stocks were strong.

Mining stocks were dull, with the general trend higher. Little business was reported in independent oil shares, while Standard Oil issues were inactive.

A firm tone sent bond prices higher, especially Russian Governments.
