Grand total each assets in Treasury $3,039,564,263

FINANCIAL NEWS AND COMMENT

Dealings Quiet Compared With Sessions of Recent Weeks.

MARINE SHARES SPURT

Stocks Highly Irregular With Few Bright Spots Indicated at Closing.

Restraint continued to characterize the market on the Stock Exchange yesterday upon the resumption of business after the holiday. Dealings were on a comparatively quiet scale as contrasted with the average sessions of the past two or three weeks, and trading, which was highly professional, remained largely under the influence of the varying fortunes of the great battle now raging on the western front. The share list as a whole was highly irregular, and while the trend in all departments was not downward, there were relatively few bright spots in the list at the closing, that is to say, only a small number of individual shares made any progress during the session. Toward the end of the trading there was an inclination toward firmness which might have reflected to some extent the removal of some of the tension in the war situation, but there was nothing which seemed to bear this out so far as the news was concerned, and it is probable that the strength was more in sympathy with the movement under way in the marine shares, which made an unusually sharp spurt, just before the closing, than it was a reflection of any consideration connected with developments in the war zone.

Despite the tension over the military situation, and cumulative effect of other considerations which made for irregularity, the market emerged from the severe test which faced it at the opening with no little credit, but at the same time it was obvious from the contraction of the transactions that the process of elimination is being continued by which it is hoped to bring the market into a trading position in preparation for what the financial district is beginning to sense as the decisive battle of the war. As Wall Street is beginning to see it, the present battle simply amounts to the opening phase of a greater and perhaps even more costly battle by which Germany hopes to gain a decision for all time. There is no lack of confidence as to the ultimate outcome of the struggle, but it is realized that it would be just as well to hold speculation to very small proportions so long as there is anything on the horizon that might have an unsettling effect on the securities market. As for other considerations, they are being cast aside temporarily, even to the discussion of the new revenue bills. With the whole financial district engaged in the task of watching the outcome of the battle it is little wonder that news considerations which ordinarily exercise some influence on the price of course have been pushed into the background.

Except for the very creditable action of the market in face of the disquieting news the outstanding feature of the session was the sharp spurt in the marine shares at the closing, following reports apparently with some foundation that the deal for the transfer of the company's ships under the British flag had been consummated to the advantage of the stockholders. The preferred finished with a net gain of nearly 10 points at a figure which represented something better than 111 points from the low of the day, while the common closed up almost 5 points net for the session. The ease with which the marine shares moved forward had a stimulating effect on the rest of the market, but it was only such stocks as the specialties which made any great improvement. The standard issues of the type of steel were heavy for the best part of the day, and so were most of the rails. There was another encouraging display of resistance in the foreign Government bonds, which bespoke confidence in the military situation. On the other hand, the new Liberty 4¼s were distinctly weak, breaking to another new low record well below 97.

There was nothing in the money situation which could be construed as having much effect on the stock market. Call loans continued to be made on the Stock Exchange from 5 to 5½ per cent., with a very small amount of time funds available. The rate in the latter continued nominal. The foreign exchange market was dull and easier with the exception of Italian lire, which made a slight advance from the low point touched in the earlier part of the week.
