PETROLEUM INCOME DECREASES GREATLY

Mexican Company's Earnings in 1917 $6,000,000 Less Than in Previous Year.

OIL SHIPS IN WAR WORK

Operating Expenses Increase $9,646,557 Over 1916—$4,986,020 for Dividends.

A loss of $6,000,000 in net earnings by reason of the diversion of its shipping, an increased charge of about $3,000,000 for depreciation and exhaustion of oil lands and a relatively strong financial position are disclosed by the annual report of the Mexican Petroleum Company of Delaware issued yesterday. Despite the reduction in earnings from water transportation and charges to income for depreciation, &c., equal to $8 a share on the common, the report showed a surplus after charges and war taxes of $4,986,020. This was equal to $10.23 a share on the common stock. In 1916 the surplus available for dividends was $7,153,059, which was equal to $15.78 a share.

Stockholders are informed in the report by President E. L. Doheny that the transfer of a portion of the fleet represented a real large sacrifice and Mr. Doheny describes this contribution to winning the war as follows:

"The volunteering of a large part of your fleet, the requisitioning of others of your tank steamships and the delays which occurred in the construction of the remainder, limited your company to supplying only the customers to whom they were bound on time contracts at former prevailing prices and of foregoing the sale of any oil at the better prices which the greatly increased demand stimulated. A calculation was carefully made of the loss of earnings to your company, by reason of the diversion of some steamships and the failure to get others. That amount, conservatively determined, is in excess of $6,000,000 for the last six months of last year.

Ships in Government Service.

"You may have the consolation of knowing that in so far as your investment in this company is concerned you have made the supreme investment sacrifice of risking the very existence of the ships, without which your business could not be carried on, and of sacrificing all of the earnings and profits which it was planned the ships should produce for your company during the remainder of last year, after they went into the Government transatlantic service, and for such period in this year as they will continue in such service. Inasmuch as the average price of the contracts which you are legally and morally bound to fulfill with the use of steamships that remain in your possession is very much below the price which now obtains for like products in similar markets your sacrifice is much more than what might be calculated by considering the percentage of your ships which has been employed exclusively in war service, moving none of your products."

Nevertheless gross earnings in 1917 were nearly double those of the preceding year, being $15,121,789 against $9,668,463. Operating expenses, however, increased $9,646,557 from $2,259,752 to $11,906,309, but these included an increase of more than $1,100,000 in depreciation and a new item of $1,839,211 representing reserve for exhaustion of oil lands and greatly increased ordinary taxes. After a provision of $621,000 for income and excess profits taxes, there remained a balance for dividends of $4,986,020. From this $960,000 was paid in preferred dividends and $1,180,263 in common dividends. From the earnings of the year $2,845,757 was added to profit and loss surplus, making the total surplus at the beginning of the current year $18,426,639.

The balance sheet, issued yesterday, indicated a strong financial position, with current assets of $11,442,760, compared to current liabilities of $2,886,560. The company counts in its assets $3,605,518 for taxes paid to the Mexican Government under protest, but on the other side of the sheet has a reserve account of $8,006,889 and a profit and loss surplus of $18,426,639.

Sales 17,587,138 Barrels.

In his remarks to stockholders President Doheny says in part:

"The total number of barrels disposed of during the year was 17,587,138. The price received therefor was $17,457,292, an average of 99¼ cents a barrel. In former years the average price received per barrel was much less than shown for this year, being 85 cents in 1916, 67 cents in 1915, 64 cents in 1914 and 58 cents in 1913. The greater price received this year was not due, however, to any increased price for the oil at the point of production in Mexico. It was due largely to an increase in the proportion which was refined and which was delivered at distant points, the selling price of which was increased by the cost of refining and transportation. Crude and fuel oil to the extent of 6,806,047 barrels were sold f. o. b. Tampico at an average of 53 1-3 cents a barrel, while 46,154,430 gallons of crude gasolene produced at the Topping plant at Tampico sold at approximately 11 cents a gallon and 9,682,174 barrels of crude oil were sold and delivered at various foreign ports at 91 cents a barrel.

"Against the dividends paid in 1917 of $2,140,263 it is noteworthy that the taxes paid by your companies to the Mexican Government for the same period amounted to $1,812,689, and those paid to the United States Government for the same period amounted to $723,874, a tax total of $2,534,762, or $400,000 in excess of dividend payments.

"In addition to the above disbursements there was invested in the United States and Mexico for the increase of facilities for handling your products $2,410,769, making a total of $7,085,795 expended for capital account, taxes and dividends, of which less than 30 per cent. was dividends, over 35 per cent. taxes and about 35 per cent. was reinvested in permanent improvements, either in the United States or Mexico, where such capital investment again becomes a sure source of revenue for the respective Governments and a probable source of revenue to the stockholders."

ROYAL DUTCH DIVIDEND.

American Shareholders to Receive Final Payment for 1917.

The Equitable Trust Company, as depository of certain ordinary stock of the Royal Dutch Company for the working of petroleum wells in the Netherlands and India, under an agreement dated December 22, 1916, yesterday notified holders of the American shares that it has received a final dividend for the year 1917 of 18 guilders for Dutch subshares. This is equivalent pro rata at the present rate of exchange to $3.09 on each American share.

This dividend will be distributed on August 24 by the trust company to registered holders of the American shares of record at the close of business August 16, provided that the necessary income tax certificates have been filed with it on or before that date. The ownership certificate form suggested by the Internal Revenue Department is 1001-A of May, 1918.

$15,000,000 OF NOTE ISSUES PURCHASED

Bank and Syndicate Take American Cotton Oil and Duquesne Light Paper.

New financing aggregating $15,000,000 was announced yesterday, the First National Bank purchasing $5,000,000 American Cotton Oil one year notes and a syndicate headed by Harris, Forbes & Co., the First National Bank and Ladenburg, Thalmann & Co. purchasing an issue of $10,000,000 Duquesne Light Company (Pittsburg) three year 6 per cent. secured notes. There will be a public offering of both issues, which have been approved by the capital issues committee.

The proceeds of the American Cotton Oil notes, which will be dated September 2, will be used to retire the $2,500,000 Series A 5 per cent. notes, which mature September 1, and to fill the company's working capital requirements to meet an expanding volume of business and higher inventories. In addition the company has $5,000,000 two year Series B notes which mature September 1, 1919.

The Duquesne Light notes, in addition to being a direct obligation of the Duquesne company, will be secured by the pledge of all of an outstanding issue of $15,000,000 5 per cent. mortgage bonds. These pledged bonds will be secured by a first mortgage on all of the property owned in fee by the Duquesne Light Company and by a first lien upon its leasehold interest, together with bonds and stocks of subsidiaries.

The Duquesne notes will be followed by $5,941,000 7 per cent. stock and $18,226,000 common stock upon which the company is paying 7 per cent.

The earnings of the Duquesne Light Company and subsidiaries for the year ended May 31 are reported as: Gross, $10,465,011.33; net earnings, $3,086,938.51; annual interest and rental charges, including interest on $10,000,000 three-year 6 per cent. secured notes, $922,441, and balance left, $2,164,497.

AIR MAIL TO CHICAGO.

Post Office Dep't Plans to Cut Time To and From West in Half.

WASHINGTON, Aug. 6.—Daily air mail service between New York and Chicago, cutting the present railroad time in half and bringing the Pacific coast twelve hours nearer the Atlantic, is planned by the Post Office Department.

In announcing to-day that this probably would be the next move of the air division, however, the department gave notice to persons desiring to finance air mail carrier corporations that no extensions of the service now maintained between New York, Philadelphia and Washington have been determined upon definitely.

CONSOLIDATED EXCHANGE.

Stocks closed weak in a fairly active market yesterday on the Consolidated Exchange. Fractional net declines were registered in the leading issues and final quotations indicated a reactionary tendency, with prices only slightly higher than the low levels of the session. Trading, though more active than usual, continued professional in character. The market as a whole was easy in tone throughout and without special feature. Stocks were in supply on and after the opening and sold down a point or more before the selling was checked. After a partial recovery the list held steady with but fractional changes until the final half hour, when prices again eased off. Interest centred chiefly in the industrials.

Pennsylvania Crude Oil Market.

OIL CITY, Pa., Aug. 6.—Credit balances, $4. Runs, 70,086 barrels; average, 45,070. Shipments, 83,139; average, 38,733.

FINANCIAL NOTES.

Pierce Arrow Motor Car Company reports operating profit for the three months ended June 30 last amounts to $1,523,421. Net profits total $914,029.

Western Power Company reports an increase of 5 per cent. in its operating revenue for May, which amounted to $29,538, compared with May 1 last year.

D. H. McDougal, formerly general manager of the Dominion Steel Company has been elected president and director of the Nova Scotia Steel and Coal Company in place of H. F. Cockard, resigned.

The gross earnings of the St. Louis Rocky Mountain and Pacific Company for June amounted to $949,047, compared with $341,142 in June, 1917. Net earnings amounted to $107,446, against $86,876 in same period last year and net revenue totaled $87,000, compared with $66,217.

Phelps Dodge Corporation produced in July 18,733,071 pounds of spelter.

Jewel Tea Company, Inc., reports sales for four weeks ended July 13 of $127,027, a decrease of $2,627. For twenty-eight weeks ended July 13 the sales amounted to approximately $8,182,048, a decrease of $71,525.

Bonbright & Co., Inc., are offering at 96 and interest to yield 8 per cent. a new issue of $1,250,000 United Light and Railways Co. 7 peg cent. bond secured gold notes, series B dated April 1, 1923.

For six months ended June 30 the Butte Copper and Zinc Company reports a total income of $561,237, of which $280,668 is available for the Anaconda Copper Company, leaving a balance of $260,668. Net earnings amounted to $259,337 after deductions of expenses and salaries.

Manhattan Electrical Supply Company, Inc., reports sales for the first six months of 1918 amounted to $2,637,000, compared with $2,487,087 for the same period of 1917.

Maury, Rogers & Auchincloss, members New York Stock Exchange, are distributing a circular in which they review rail conditions in connection with the recent developments in the military situation on the western front.

Solomon Bros. & Hutzler have been awarded $2,000,000 City of New Bedford notes due November, 1918, on a 4.24 per cent. discount basis and $3,000,000 City of New Bedford notes due January 20, 1919, on a 4.33 per cent. discount basis.

William J. Ferry, formerly loan clerk of the Mutual Alliance Trust Company and the Chatham and Phenix National Bank, has been appointed assistant secretary and assistant treasurer of the Hudson Trust Company of New York.

The sale of the season's first bale of cotton received here from Georgia by J. S. Bache & Co. has been postponed until next Thursday. The cotton was to have been sold yesterday.

Sinclair Oil and Refining Company reports net operating earnings for quarter ended June 30 amounted to $4,407,661, other income amounted to $1,461,204 and the balance totaled $2,487,649.

J. E. Miller, formerly with the *Evening Mail* financial bureau, has become associated with the firm of Hendrickson & Company, members New York Stock Exchange, as manager of the investment department.

The Dickinson Trust Company of Richmond, Ind., with resources of $2,172,000, has been admitted to the Federal Reserve system.

CORN PRICES BREAK ON WEATHER REPORT

Market Extremely Sensitive to Crop and News Developments.

DROP OF 4 CENTS BUSHEL

Conditions Less Favorable Than in July—Some Deterioration This Month.

Reports of cloudy conditions in parts of the West caused a break of about 4 cents a bushel in corn yesterday, showing strongly the extreme sensitiveness of the market to crop and news developments and the extremely limited volume of trade which would produce such wild fluctuations. Crop conditions in corn are recognized as less favorable than last month, and since August 1 there has undoubtedly been deterioration in some sections, but the hot, forcing weather has pushed the crop forward rapidly in other sections, and it is still a grave problem whether the losses will more than offset the gains in condition. High temperatures have prevailed over the entire country, and where the drought has continued for days and weeks the crop has probably been injured beyond recovery, but a great deal of this is discounted in the allowance made for the normal loss in condition until maturity.

A crop of 2,900,000,000 bushels of good corn would be far superior to last year's extremely poor product, when the amount of merchantable corn was the smallest in years, the total amount of merchantable corn amounting to only 1,905,000,000 bushels out of the aggregate crop of 3,159,000,000 bushels. Taking the average grading and quality of corn last year the food and feed value was one of the smallest in years. In 1903, when the crop of corn was only 2,244,000,000 bushels, the amount of merchantable corn was smaller than last year. The largest amount of merchantable corn was in 1912—2,654,000,000 bushels out of 3,124,000,000 bushels raised. While the poorer quality of the corn last year serves as a certain amount of feeding value there has never been at any time during the year any good corn on the market of much volume, and in order to meet the conditions of the quality of the crop and maintain a future market it was necessary to lower the contract deliveries on corn to Nos. 3 and 4 corn, and there has not been a great deal of that kind available.

Even with a smaller number of bushels of corn compared with last year, taking the crop at 2,900,000,000 bushels, but on the other hand the probabilities of much higher quality, the crops of oats, barley and hay and the feed situation is far ahead of last year. The July 1 indications were as follows:

	1918 (July).	1917 (Final).
Corn	3,160,000,000	3,159,000,000
Oats	1,487,000,000	1,587,000,000
Barley	230,000,000	209,000,000
Hay, tons	102,000,000	95,000,000

When the increase of 7,000,000 tons of hay is considered and the increase of 21,000,000 bushels of barley, the loss in corn, although considerable on the basis of recent estimates, leaves the country much better off than last year, when the quality of the crops of last year and the quality and prospects of the crops this year are considered.

CHICAGO, Aug. 6.—Belief that the bullish effects of the hot wave had been sufficiently discounted for the time being had a restraining influence on the corn market to-day. New advances in price took place, but were not held. The close was unsettled, 1⅝c. net lower to ¼c. gain, with September, $1.61⅞@1.62¼ and October $1.63⅛. Oats finished ¼c. off to ¼@⅜c. up, and provisions varied from 15c. decline to a rise of 2c.

Many large commission houses switched to-day to the selling side of the market and the principal demand came from shorts. Continued torrid weather and the absence of rain were somewhat offset by the possibility that storms from the northwest or the Gulf might penetrate the corn belt and afford partial relief from the danger of severe crop damage. Besides the trade showed considerable disposition to await the Government weather and crop reports due to-morrow and not to risk exaggerating the prospective curtailment of yield.

Oats were swayed almost entirely by the action of corn.

Trade in provisions was only of a scattering character.

WHEAT—Crop reports from the domestic Northwest continued favorable, but there were further complaints from the Canadian Northwest. The high temperatures over the West do not appear to have had any effect on the marketing of wheat and a continued large movement is looked for, as farmers realize there is little to be gained in holding back their grain.

CORN—It was a weather market in corn all day, with a steady advance up to mid-afternoon, reaching new high levels for the present movement, followed by an equally sharp break near the close, which left final prices ⅝ to 1⅜c. net lower on all positions except October, which finished ¼c. above the previous night. Most of the buying early was on continued hot, dry weather over the Southwest. Cash corn here was firm with fresh shelled No. 2 yellow quoted at $1.87@1.89 and No. 2 yellow $1.87⅝ cost and freight New York.

OATS—Cash oats here closed easy and a little lower, standard being quoted 82½ to 83c.; No. 2 white, 83c.; No. 3 white, 82 to 82½c.; No. 4 white, 81½ to 82c.; fancy clipped white, 82½ to 84½c., and ordinary clipped white, 81½@82½c.

RYE—Market steady; No. 2 Western, $1.71 cost and freight New York.

BARLEY—Market easy; feeding, $1.15@1.20, and malting, $1.25@1.30 cost and freight New York.

HAY—Market firm; No. 1, $1.60@1.65; No. 2, $1.50@1.55; No. 3, $1.30@1.40.

BUENOS AYRES SEEKS BIDDERS.

Offers Americans Chance to Construct Sulphuric Acid Plant.

For the first time in the history of our relations with South America a city of that continent has solicited bids on a construction project from manufacturing interests in the United States. The city of Buenos Ayres, Argentine Republic, it became known yesterday, is requesting bids for the erection of a sulphuric acid manufacturing plant.

Offers must be presented in the office of the secretary of the Council of Public Works of the nation in the city of Buenos Ayres before 3:30 P. M. on November 8. The conditions of construction may be obtained from the Consulate-General of the Argentine Republic at 17 Battery place, through whose efforts this business is being offered to interested parties in the United States.

LONDON MARKET.

LONDON, Aug. 6.—The members of the Stock Exchange commemorated the anniversary of the outbreak of the war by suspending business and attending a short service at a nearby church. When trading was resumed the market had a good undertone. There was quiet support to gilt edged securities and oil, mining, colonial and land shares at hardening prices, and the less active sections were firmer in sympathy. Money was more plentiful and discount rates were steady. Money, 3 per cent. Discount rates, short bills and three month bills, 3 17-32 per cent. Gold premiums at Lisbon, 130.00; consols for money, 56⅞; British 5 per cent. loan, 94½; British 4½ per cent. loan, 100.

PARIS MARKET.

PARIS, Aug. 6.—Trading was active on the bourse to-day. Three per cent. rentes, 61 francs 85 centimes for cash; exchange on London, 27 francs 9½ centimes; 5 per cent. loan, 77 francs 55 centimes.
