STOCKS IRREGULAR IN CURB MARKET

Session Featured by Moderate Activity, Irregularity and Some Advance.

The session in curb securities yesterday was one of irregularity and moderate activity. At the opening there was a good outside volume of orders for both sides of the market, causing irregular fluctuations. Heaviness was found in most issues during the early trading, but a better demand developed for some oils and specialties in the subsequent dealings and several large advances were recorded at the close.

Most activity and interest was directed to the oils, among which some substantial gains were made. Sinclair Gulf featured the independent shares, with an advance of more than four points from last week's closing to a new high record. Lower priced oils were again active, with a renewed demand for Omar Oil and Gas. Arrangements, it was said, have been completed for drilling thirty wells in Allen county for the company.

Standard Oil of New York was in constant demand in the early trading, rising more than ten points, with a subsequent small reaction. Allen Oil and Gas was subjected to heavy profit taking early, but rallied sharply in the afternoon and showed a gain at the close. Interest for a time was directed to Queen Oil among the lower priced stocks on the despatch stating that while cleaning out No. 1 well oil shot out and that well No. 2 was expected in shortly.

A sharp advance in the General Asphalt shares, after early weakness, featured the industrials. An advance of more than three points was shown at the close. The motors were quiet and firm. Famous Players-Lasky was strong, while Lackawanna County Coal was subjected to heavy profit taking, resulting in a loss of about four points.

Mining shares were irregular, with Cerbat Silver new stock changing hands at the previous high level. There was a large turnover in Florence Silver and Golden Gate Exploration. Bonds were quiet and featureless.

Total sales and range of prices follow:
