MARKET ON CURB IS ACTIVE AND STRONG

Many New Highs Are Created in Heavy Buying—Motors and Tires Gain.

The market for outside securities enjoyed yesterday considerable activity and strength. Many new highs were established on heavy buying and a few new stocks, which scored large advances, were introduced to the market. One of the features of the market was initial trading in Carib Syndicate new stock. From an opening of 28, it jumped quickly above 35 and was followed by about 500 points advance in the old stock, which is traded in largely over the wire.

Considerable interest was shown in the first day's trading in Fisher Body of Ohio. That stock also enjoyed activity and a large advance, doubling in price before the close. It sold quickly to 120 from an opening, jumping 15 points between sales and finally settled at 95.

Shell Trading and Transport was prominent, rising to a new high with an advance of about 4 points. Home Oil and Refining, which suffered a severe reaction last week, recovered all of its loss, due to announcement of large production and shipment from its Fort Worth refinery and to the fact that the pipe line running over the Burkburnett field is about completed. Simms Petroleum moved more than a point higher and a steady tone was shown in Allied Oil.

In the industrials shipbuilding stocks were a feature. Most prominent was Cramp Shipbuilding, which advanced more than 40 points to a new high. New York Shipbuilding gained about 5. Hendee Manufacturing stood out in the afternoon conspicuously with an advance of more than 10 points to a new high. Several motors, tires and rubbers enjoyed small improvements.

Consolidated Virginia, in the mining group, advanced to a new high.

Total sales and range of prices follow:

COTTON OPTIONS GO TO HIGHER FIGURES

Active Months Touch New High Levels for Movement at Peak of Advance.

The cotton market was yesterday strong again, the peak of the advance carrying active options to new highs for the movement and dangerously near the season's best, approximately $5 a bale above the previous finals. Bullish feeling was dominant apparently at all stages, and factors that had been ruling influences exerted power yesterday. The weather was still unfavorable, rains being general over the belt and heavy at many points. The weekly report bore out all of the trade's expectations regarding deterioration in the Southwest, and there were not a few private wires calling the crop situation a calamity. Precipitation was 1.03 at Abilene, 1.28 at Pensacola, 1.34 at Little Rock, and more than 1½ inches at Dallas and considerable at other points. Everywhere were indications of cloudiness, with chances for further wet weather. In commenting on conditions the weekly Government report says:

"Continued rainy weather and insufficient sunshine were unfavorable for development of late cotton west of the Mississippi River, and the crop deteriorated during the week in nearly all parts of that area. In addition picking was entirely suspended or progress was greatly retarded, as considerable damage has been done to open cotton by discoloration, with complaints of bolls decaying and seed sprouting in bolls in some sections."

Liverpool cables, which were again higher than due, were also a factor, that market continuing firm all through the trading and closing sharply higher. Spots there were once more in good demand and sales of 10,000 bales were reported. Not only was the strong securities market here a power toward bringing sentiment over to the bull side, but early improvement in sterling exchange added further to the feeling. Fear that the special crop report, to be issued on October 31, according to private despatches, will be bullish, was at all times a check on offerings, and the stream of private advices relating to the strong spot basis in the South had more than ordinary effect. There is a veritable scramble to obtain good grades of cotton in the South.

A firm tone prevailed at the opening here, first sales being 20 to 55 points higher. There was steady demand on the part of trade interests, Liverpool buying near and selling far months. The South supplied most of the contracts and offerings were readily snapped up. For the start prices took an upward course, stayed only at times owing to some scattered selling by professionals for profits, which to say the least, was remarkably small, considering recent advances. The best buying of the day was in the late afternoon, when certain Western interests became interested.

That support and steady demand sent out by local commission houses all through the session easily took care of what pressure there was and advanced December contracts 97 points, or approximately a cent a pound, other deliveries rising in proportion. It was only natural that the final few minutes of trading should bring out some profit taking, and as this was the case slight reactions occurred late in the day and carried the list sharply off from the best of the session, but the undertone remained at the strongest point. Final bids were 63 to 110 points higher, the finish being barely steady on New Orleans easing.

Range of prices:

	Open.	High.	Low.	Close.	Day.
October	36.40	36.95	35.30	35.90	34.80
November				35.85	34.96
December	35.46	36.12	35.46	35.85-90	35.15
January	35.23	35.88	35.26	35.55-60	34.91
February				36.40	34.76
March	35.08	36.58	34.96	35.27-40	34.68
April				35.20	34.57
May	34.82	35.35	34.80	35.15-19	34.50
June				34.90	34.20
July	34.32	34.80	34.25	34.70-75	33.98
August	33.66	33.98	33.66	33.90	33.76
September	33.75	33.80	33.75	33.96-33.00	33.15

New Orleans Cotton Market.

NEW ORLEANS, Oct. 23.—The upward movement in cotton continued to-day, prices rising to new high records on buying inspired by the same causes that have been constantly working recently in favor of higher prices of late, very bad weather conditions in the belt and a very strong spot demand. Highest levels were reached in the afternoon, when the trading months were 95 to 140 points above the last prices of yesterday. The close was at net gains of 77 to 136 points. At the highest of the day October sold at 37.52c., the highest quotation on record for contracts. Close: October, 37.48c.; December, 36.45c.; January, 35.85c.; March, 35.40c.; May, 35.04c. Spot cotton steady; quotations revised. Middling, 36.85c.
