Stoves, &c.

Star of the North.
The best Gas Consuming Stove in the World!

THIS is the most wonderful STOVE that has ever been made, and the only one that can keep a CONTINUOUS COMBUSTION of GASES, thereby producing a more remarkable FLAME from ANTHRACITE COAL. By the peculiar construction of the apparatus, the oxygen of the atmospheric air is distributed equally over the whole surface of the fire-pot in such a manner that each jet of flame, burning from the central perforated plate and air-chamber, shall meet in the center of the throat, giving no chance for the Gases to escape, unless mingled with the oxygen, which produces a continuous flame, and thereby a large increase of heat. This combination makes it the most economical heating Stove in the World. Try it, and see if our statement is correct.

The FLAME produced from these GASES makes one of the most CHEERFUL FIRES that can be imagined, and all from ANTHRACITE COAL.

The fire can be kept up through the whole season, and with very little cost.

One year's trial has been made by the public, and the manufacturer stands ready to abide by all they have ever claimed for this Stove.

For sale by the subscribers, the only authorized Agents.
