DAILY LEADER.

FROM THE OIL COUNTRY.

The Egbert Farm—Two New Wells—History of the Farm—The Coquette Well—Bonnenhof Run—The Oil Creek Railroad—Its Miserable Management.

[Special Correspondence of the Cleveland Leader.]
ON THE OIL CREEK RAILROAD,
5 P. M., May 18, 1865.

In a late letter I spoke of the Egbert farm at Petroleum Centre as being the most profitable and the most productive at the present time of any upon the Creek. That opinion is confirmed by the opening within two days past of two veins of oil and gas, which promise to equal or excel any of the previous wells, except perhaps, the Coquette. Yesterday, a new well just below the Egberts' business office, was tubed, and commenced at once to blow out a tremendous vent of gas, such as has scarcely ever been known. So powerful was the rush of escaping gas that its roar could be heard nearly half a mile off, and the whole surrounding atmosphere was densely impregnated with the odor. There was yesterday hardly any oil with the gas, but to-day the quantity of the former is rapidly increasing. It is estimated that the yield will not be less than 300 barrels per day.

This well is 549 feet deep, and the working interest is owned by A. G. Egbert, the Hyde Farm Oil Company, and McKay, Hollister & Co. The land interest is owned as follows: One-sixth by M. C. Egbert, two sixths by Charles Hyde, two sixths by the Maple Shade Oil Company, one-twelfth by the Hyde Farm Oil Company, and one-twelfth by the Egbert Oil Company.

Another well was tubed yesterday, and to-day it has been blowing off—a stream of gas, almost precisely as the above well did yesterday; and of this one, too, a yield of 300 barrels per day is expected. This well was put down about 550 feet, in the wonderfully short time of twenty days. This is owned as follows: Seven-twelfths by A. G. Egbert, M. C. Egbert and Mr. Boyles, two-twelfths by Charles Hyde, two-twelfths by the Maple Shade Oil Company, one-twenty fourth by the Hyde Farm Oil Company, and one-twenty-fourth by the Egbert Oil Company.

Five years ago last Fall, Drs. M. C. and A. G. Egbert purchased thirty five acres upon the bank of Oil Creek, completing the purchase the day after Drake struck his first well at Titusville. They paid for this farm the sum of one thousand dollars, which was, no doubt, considered a large price at that time. The tract was in the wilderness, and oil developments below this point were entirely unthought of. Not long, after the Egberts sold an interest in the farm to Charles Hyde, and it has since been known as the Hyde & Egbert farm, and, as such, is famous wherever the oil business is known. This farm has produced more large wells, and less failures than any other farm on the Creek.

The Graff & Hassan well, the Maple Shade, the Jersey and the Coquette have, severally and successively, been the wonder and the envy of oil operators; and the tract which the Egberts bought five years ago for ten hundred dollars has produced and is producing oil enough to be valued at as many millions, while the wilderness of that day has now a village of two thousand or more inhabitants. Since I was here a month ago, a whole street of buildings, including two hotels, a machine shop, half a dozen stores and a dozen dwelling houses, have sprung into existence.

It has been reported that the Coquette well has stopped flowing. It is not so. I saw it this morning flowing a stream of pure oil as thick as my wrist.

Bennehoof Run, which flows into Oil Creek from the west, at this point, was formerly considered "dry diggings," but is developing handsomely. The Bennehoof Run Petroleum Company struck a flowing well of from one hundred to one hundred and fifty barrels about a month ago, and it is still yielding at about the same rate. This well is nearly a mile from the mouth. A new well of seventy-five barrels, belonging to private parties, has just been struck a few rods from the former. A large number of wells are going down in the immediate vicinity of these flowing wells, and much is expected of them. The territory lies very favorably, as far as can be judged from surface indications. A short distance above the producing wells Messrs. Harrington, Lawson, Cornwall and Ballard have three wells, two of which are just being tested. In one of them a vein of heavy, lubricating oil has been struck, which is said to be of a gravity equal to the Mecca oil. Should this prove to be a good vein it will be a "big thing" for the owners and for property-holders upon this Run. The superintendence of these wells is in the hands of Mr. Ballard.

I have no axe to grind in predicting a successful development of these lands, for I have not a foot of territory upon this Run. I simply state facts and logical conclusions.

The Oil Creek Railroad Company have the grading nearly completed for their track down to Petroleum Centre, five miles below their present terminus at Shaffer Farm. Whether they will do anything more than grade it during the next five years is more than I can tell. And speaking of this railroad brings me back to where I started from in dating this letter, and from which point, in fact, I have not stirred in the interim. That is to say, our car was stuck fast when I begun, and it has not changed its *status* since. And, just to demonstrate how shamefully carelessly and negligently a road can be run, let me tell you how this detention happened: A freight train in advance of our passenger train became separated, and about half the train was left behind by the engineer. The separation was caused by the pulling out of a draw-head from the car that was left at the head of the detached portion. Neither brakeman, engineer or conductor appear to have discovered the break for a long distance. Then, when it was discovered, the forward portion of the train was immediately started back after the rest, without any investigation as to the cause of the rupture. Meantime the draw-head which had pulled out of the other car was hanging down exactly as the pole of a carriage would do if it should drop from the neck-yoke while the carriage was in motion. And, just as that pole would catch in the first projection in the road and probably smash the carriage, so this draw-head, as soon as the train got under good headway in its backward course, struck against a cross-tie and instantly threw the car to which it was attached off into the ditch. Then, as there was not a hoisting jack either upon that train or upon ours, which soon came up pushing the cars which it had found standing on the track, the only thing to be done was to tinker at the thing with blocks of wood, rails, &c. And that they are doing still, and as a consequence of this inexcusable carelessness two hundred passengers will miss connection at Corry, either for Erie and Buffalo, for New York, for Philadelphia, or for Meadville and Cleveland. Do you wonder if we growl and curse the miserable management of this monopolizing road, which has made more money for its owners, in proportion to its length, than any other road in the United States?

As the Irishman said in his letter to his old country relatives, "If you never get this letter you may conclude that it was lost on the way," so if you never get this one, you may conclude that our train is still stuck. CHIPS.

100 DOLLARS PREMIUM!
SEMINAL WEAKNESS,
Or Spermatorrhœa, Gleet, &c., and
IMPOTENCY CURED,
AFTER ALL OTHER TREATMENT FAILS,
DR. A. GIBSON,
Formerly of New York City, will pay one hundred dollars for the proof that he ever fails to cure the above-named diseases. He will pay the same sum for the proof that any other Physician in the United States treats the same disease with equal success.
After many years of laborious study and experiment, Dr. Gibson is happy to inform the public he succeeds in the unfortunate, that he has perfected a system of treatment for
THE SPEEDY AND PERMANENT CURE
of the above, and also all contagious diseases of the Reproductive Organs, with all bad effects arising therefrom, including General Debility.
DEBILITY OR NERVOUS PROSTRATION.
He has succeeded in curing cases in this city, some of whom had expended hundreds of dollars with self-styled physicians, who profess to treat all private maladies with success, and without receiving the least partition of benefit.
Dr. Gibson does not boast that he is a member of some College in London or Paris, as many do, some others do for the purpose of ensnaring the innocent, and who hold out great expectations never to be realized. But what Dr. Gibson does say is this, that he is able to give entire satisfaction to those who repose confidence in his ability and integrity, and that in his perfected system of treatment, all traces of the which challenges any Physician of London or Paris, or any patent medicine, to equal for the radical cure of seminal weakness, and all diseases or derangements, both mental and physical, arising from sexual or secret abuse.
Dr. Gibson also claims for his new treatment the following advantages over all others yet discovered; and first, the agents used are in no respect disagreeable; he uses no roles of the dark ages, such as Mercury, nor any other deleterious drug; secondly, no restrictions in diet or business is required; thirdly, his treatment is positive and certain in all cases. He stands prepared to go into any public or private hospital in the United States and demonstrate the immense superiority of his new treatment over any other now known to the world, in point of promptness, permanency, mildness, safety and convenience to the patient.
Dr. Gibson is permanently located in Cleveland, and has during the past five years performed many cures of diseases which had for years resisted all other modes of treatment. References can be given to individuals of the first respectability in Cleveland, Boston, New York and other cities, in regard to skill and integrity in all professional transactions. Dyspepsia, Rheumatism, Scrofula, all Diseases of the Urinary Organs, and all Chronic Diseases treated with superior success.
Medicines sent to any part of the country on receipt of five dollars.
