The barrels must be entirely new, and be made of the best seasoned heart of white-oak staves and headings; the staves to be not less than five-eighths of an inch thick; the headings not less than three-fourths of an inch thick; they must be three-hoops hooped over; inside measure of each barrel to be, with the best white-oak or hickory hoops, and each barrel must have on it four iron hoops, viz: one at one end a half inch in width on each bilge, and one at one and an eighth inch in width on each chime, and each to be of one-sixteenth of an inch thick; each barrel must be of the internal capacity of thirty-two gallons, and the iron hoops must be well painted with red oxide.
