FARM WORK. THE SUMMER HAS COME, and FALL work must be done upon the FARM and PLANTATION, and in the GARDEN, and to make this work profitable, it should be well done. The TENNESSEE FARMER AND MECHANIC, in 32ND every issue, will contain, in plain, practical and reliable information as will materially assist in accomplishing this end. It will be round worth ten times the subscription money to every person engaged in these occupations.

Every Farmer in the Southwest would find this Journal a benefit to his out-door labors, as the articles are prepared with a direct reference to this latitude and its productions, giving the most successful methods of cultivation, harvesting and preparation for market.

SOUTHWEST.

This Journal is a large octavo, containing 48 pages of READING MATTER every month, besides advertisements. It contains annually more than six hundred instructive articles, each and every one of which, are valuable and interesting to the farmer, or mechanic. It is hardly possible that any one whether FARMER, PLANTER, GARDENER, FRUIT-GROWER, STOCK-RAISER, or the CULTIVATOR of only a VILLAGE LOT should read a Journal of this character without obtaining information that would render it labor more profitable.

LABOR SAVED

Farmers often expend from $200 to $300 a year, in planting, harvesting, cultivating a hundred and five miles—fifty miles railroad, and but one change of bayage. Time through, thirteen hours. New Coaches, fine teams and careful drivers, and time and money saved—no mistake.

Important to Planters & Millers.

FELTON'S IMPROVED Self-Sharpening Portable Grist Mill.

An Improvement on all Other Patents.

THIS is one of the most valuable inventions of the day. It possesses all the qualifications requisite to render it valuable to the farmer. It is destined to supply a want that has long been felt by every planter and public in general. In so simple in construction, that any person of ordinary skill can run it and keep it in order. The grinding surfaces are of the best quality of chilled iron, warranted to stand any tempered steel, and not liable to get out of order. It will grind wheat, corn, oats, buckwheat, drugs and spices, crush and grind corn and cob admirably, or shelled oats and corn, and cobmeal be well ground together. The small size frame mill, with two-horse power, will grind from five to eight bushels of superior corn meal per hour, and from eight to ten bushels of good feed for stock, and requires but little attention, and may be run by gin-belt without increase of expense. The large size frame mill will grind over twice that amount per hour. The meal is not heated by the stone—as the stones in these mills are, for small size $125; large size $200. We have the right to sell the States of Alabama, Mississippi, Louisiana, Arkansas and Tennessee, and A. M. Rose, Tennessee. A rare chance is here offered for competent and respectable agents to make a fortune.

County and State rights sold on accommodating terms. All orders, communications, and applications for Rights and Mills addressed to us will receive prompt attention.

The Numbers from 1 to 10,000, corresponding with those Numbers on the Tickets printed on separate slips of paper, are enclosed with small tin tubes and placed in one wheel.

The first 965 Prizes, similarly printed and enclosed, are placed in a other wheel.

The wheels are then well received, and a number is drawn from the wheel of numbers, and at the same time a Prize is drawn from the other wheel. The Number and Prize drawn out are opened and exhibited to the audience, and rerized by the Commissioners; the Prize being placed against the Number drawn. This operation is repeated until all the Prizes are drawn out.
